

## Corteva Agriscience Announces Availability of PowerCore® Enlist® Refuge Advanced® Corn

June 6, 2023

*New Integrated Refuge Offering Provides Enhanced Weed and Pest Control in a Single Bag*

INDIANAPOLIS, June 6, 2023 /PRNewswire/ -- Corteva Agriscience (NYSE: CTV) today announced PowerCore® Enlist® Refuge Advanced® (RA) corn will be available for planting in the 2024 growing season in the U.S. and Canada. Farmers will have the added flexibility of integrated refuge, along with an advanced combination of above-ground pest control, herbicide tolerance and industry-leading genetics with PowerCore Enlist RA corn.<sup>1</sup>

"This is yet another example of Corteva Agriscience delivering strong traits to farmers, giving them new options and now offering the flexibility of integrated refuge," said Tim Glenn, Executive Vice President, Seed Business Unit, Corteva Agriscience. "We are putting the power directly in the hands of farmers, so they not only have a single-bag solution, but they can purchase quality Corteva traits from their preferred seed supplier."

With three modes of action, PowerCore Enlist RA corn technology protects against key susceptible above-ground pests.<sup>1</sup> Additionally, the product allows for the ultimate weed management versatility with tolerance to 2,4-D choline, glyphosate, glufosinate and FOP herbicides. Enlist One® and Enlist Duo® herbicides are the only 2,4-D choline formulations that are approved for use on PowerCore Enlist RA. These products stay on target, have near-zero volatility, and reduce the potential for drift compared to dicamba and traditional 2,4-D formulations.

In addition to being available through U.S. Corteva seed brands – including Pioneer®, Brevant® seeds, AgVenture®, Dairyland Seed®, Hoegemeyer®, NuTech Seed® and Seed Consultants® – PowerCore Enlist RA trait technology will be available through authorized independent seed companies. In Canada, the product will be marketed as PowerCore Enlist corn and available through Pioneer and Brevant seed brands.

PowerCore Enlist RA corn will be available in a diverse lineup of genetics across a wide range of maturities. Like all products developed through Corteva's R&D programs, the PowerCore Enlist RA corn must pass through rigorous evaluation in several testing locations. By testing characteristics like root and stalk strength, late-season standability and disease tolerance, farmers can rest assured they have a whole-farm solution.

<sup>1</sup> Various factors, including pest pressure, reduced susceptibility, and insect resistance in some pest populations may affect efficacy of certain corn technology products in some regions. To help extend durability of these technologies, Corteva Agriscience recommends you implement Integrated Pest Management (IPM) practices such as crop rotation, cultural and biological control tactics (including rotating sources of Bt-protected corn traits), pest scouting, and appropriate use of pest thresholds when employing management practices such as insecticide application.

PowerCore® multi-event technology developed by Corteva Agriscience and Monsanto. PowerCore® is a registered trademark of Monsanto Technology LLC. Always follow IRM, grain marketing and all other stewardship practices and pesticide label directions. B.t. products may not yet be registered in all states. Check with your seed representative for the registration status in your state. Liberty®, LibertyLink® and the Water Droplet Design are trademarks of BASF.

Enlist Duo® and Enlist One® herbicides are not registered for sale or use in all states or counties. Contact your state pesticide regulatory agency to determine if a product is registered for sale or use in your area. Enlist Duo and Enlist One are the only 2,4-D products authorized for use with Enlist crops. Consult Enlist herbicide labels for weed species controlled. Always read and follow label directions.
