

EHS&S Commitment

At Corteva Agriscience, our purpose is to enrich the lives of those who produce and those who consume, ensuring progress for generations to come. Our winning aspiration is to be the leader of innovative sustainable solutions for farmers worldwide, today, and tomorrow... to become the world's most valuable Agriculture Solutions company. As an organization we are committed to enriching the organization through our Live Safely Value and the basic safety principles that provide the foundation for our Core for Life Identity.

■ Our Live Safely Value

Leadership instituted the core value Live Safely to demonstrate their commitment to the safety of our people, the environment, and the communities in which we operate. This value also represents Corteva employees' commitment to safety. This commitment is based on making a difference in the world by the way we choose to live each day.

We are committed to Operational Excellence and Partnering with Society. We will continue to make consistent, measurable progress in implementing our purpose and core values throughout our operations worldwide.

■ Safety Principles

Corteva strives to provide a work environment that is safe, healthy, and protective of the environment. The Corteva Agriscience EHS&S philosophy is built upon basic principles that provide the foundation for our Live Safely value.

1. All injuries, occupational illnesses, and EHS&S events can be prevented
2. People are the most important part of the EHS&S program
3. Management is responsible and accountable
4. Working in a safe, healthy, and environmentally responsible manner is a condition of employment
5. Employees are trained to work in a safe, healthy, and environmentally responsible manner
6. All EHS&S deficiencies are mitigated, corrected, and verified promptly
7. All employees are authorized and expected to stop work and reassess hazards whenever the safety of any work is in doubt
8. Interactive EHS&S audits, assessment and inspection processes are implemented in the workplace
9. EHS&S events are reported, investigated, and the learnings shared
10. Off-the-job safety and wellness are important aspects of the EHS&S program

When these principles are understood and internalized by all individuals in the organization, EHS&S becomes integral to the way we operate and conduct business. The Live Safely Value is present in all aspects of work, from simple day-to-day tasks to critical decision making. It is the basis of our Core for Life identity.

■ Our Core for Life Identity

Environment Health, Safety, and Security are at the Core of Corteva; it is who we are. Core for Life is our identity.

CORE FOR LIFE

SAFETY • ENVIRONMENT • HEALTH

The blue O in the Core for Life logo represents our continued commitment to achieving ZERO EHS&S events. The word life represents our goal to eliminate life altering events. All employees and contractors are expected to share this steadfast commitment to drive to zero and ultimately protect the life of all who work in our facilities.
