Explanatory Note

This Annual Report on Form 10-K is a combined report being filed separately by Corteva, Inc. and EID. Corteva, Inc. owns all of the common equity interests in EID, and EID meets the conditions set forth in General Instruction I(1)(a), (b) and (d) of Form 10-K and is therefore filing its information within this Form 10-K with the reduced disclosure format. Each of Corteva, Inc. and EID is filing on its own behalf the information contained in this report that relates to itself, and neither company makes any representation as to information relating to the other company. Where information or an explanation is provided that is substantially the same for each company, such information or explanation has been combined in this report. Where information or an explanation is not substantially the same for each company, separate information and explanation has been provided. In addition, separate consolidated financial statements for each company, along with notes to the consolidated financial statements, are included in this report.

The primary differences between Corteva and EID's financial statements relate to EID's Preferred Stock - \$4.50 Series and EID's Preferred Stock - \$3.50 Series, a related party loan between EID and Corteva, Inc. and the associated tax deductible interest expense for EID, and the capital structure of Corteva, Inc. (See EID's Note 1 - Basis of Presentation to EID's Consolidated Financial Statements, for additional information for above items). The separate EID financial statements and footnotes for areas that differ from Corteva, are included within this Annual Report on Form 10-K and begin on page F-83. Footnotes of EID that are identical to that of Corteva are cross-referenced accordingly.

Part I

ITEM 1. BUSINESS

Unless otherwise indicated or the context otherwise requires, references in this Annual Report on Form 10-K to:

- "Corteva" or "the company" refers to Corteva, Inc. and its consolidated subsidiaries (including EID);
- "EID" refers to E. I. du Pont de Nemours and Company and its consolidated subsidiaries or E. I. du Pont de Nemours and Company excluding its consolidated subsidiaries, as the context may indicate;
- "DowDuPont" refers to DowDuPont Inc. and its subsidiaries prior to the Separation (as defined below) of Corteva;
- "Historical Dow" refers to The Dow Chemical Company and its consolidated subsidiaries prior to the Internal Reorganization as defined on page 4;
- "Historical DuPont" and "Historical EID" refers to EID prior to the Internal Reorganization (as defined on page 4);
- "Dow" refers to Dow Inc. after The Dow Distribution (as defined below);
- "DuPont" refers to DuPont de Nemours, Inc. after the Separation of Corteva;
- "DAS" refers to the agriculture business of Historical Dow, Dow AgroSciences; and
- "Merger" refers to the all-stock merger of equals strategic combination between Historical Dow and Historical DuPont.

Background

Corteva is a leading global provider of seed and crop protection solutions focused on the agriculture industry and contributing to a healthier, more secure and sustainable food supply. Corteva was incorporated in Delaware in March 2018 and maintains its business headquarters in Indianapolis, Indiana. The company is focused on advancing its science-based innovation, which aims to deliver a wide range of improved products and services to its customers. Corteva has one of the broadest and most productive new product pipelines in the agriculture industry. The company intends to leverage its rich heritage of scientific achievement to advance its robust innovation pipeline and continue to shape the future of responsible agriculture. New products are crucial to solving farmers' productivity challenges amid a growing global population while addressing natural resistance, regulatory changes, safety requirements and competitive dynamics. The company's investment in technology-based and solution-based product offerings allows it to meet farmers' evolving needs while ensuring that its investments generate sufficient returns. Meanwhile, through Corteva's unique routes to market, the company continues to work face-to-face with farmers around the world to understand their needs.

The company's broad portfolio of agriculture solutions fuels farmer productivity in approximately 140 countries. See Note 24 - Geographic Information, to the Consolidated Financial Statements for details on the location of the company's sales and property.

On June 1, 2019, Corteva, Inc. became an independent, publicly traded company through the completed separation (the "Separation") of the agriculture business of DuPont de Nemours, Inc. (formerly known as DowDuPont Inc.) ("DuPont" or "DowDuPont"). The separation was effectuated through a pro rata distribution (the "Corteva Distribution") of all of the then- issued and outstanding shares of common stock of Corteva, Inc.

As a result of the Internal Reorganization (defined below), on May 31, 2019, EID was contributed to Corteva, Inc. and, as a result, Corteva, Inc. owns 100% of the outstanding common stock of EID. Prior to March 31, 2019, Corteva, Inc. had engaged in no business operations and had no assets or liabilities of any kind, other than those incident to its formation.

EID continues to be a reporting company and is deemed to be the predecessor to Corteva, Inc., with the historical results of EID to be deemed the historical results of Corteva for periods prior to and including May 31, 2019. Shares of EID preferred stock, \$3.50 Series and \$4.50 Series, issued and outstanding immediately prior to the Separation remain issued and outstanding and were unaffected by the Separation.

Internal Reorganizations and Business Separations

Subsequent to the Merger, Historical Dow and EID engaged in a series of internal reorganization and realignment steps to realign their businesses into three subgroups: agriculture, materials science and specialty products (collectively, the "Business Separations"). On April 1, 2019, DowDuPont completed the separation of its materials science business into a separate and independent public company by way of a distribution of Dow through a pro rata dividend in-kind of all of the then-issued and outstanding shares of Dow's common stock, to holders of DowDuPont's common stock, as of the close of business on March 21, 2019 (the "Dow Distribution" and together with the Corteva Distribution, the "Distributions").

Part I

ITEM 1. BUSINESS, *continued*

Prior to the Dow Distribution, Historical Dow conveyed or transferred the assets and liabilities aligned with Historical Dow's agriculture business to separate legal entities ("Dow Ag Entities") and the assets and liabilities associated with its specialty products business to separate legal entities (the "Dow SP Entities"). On April 1, 2019, Dow Ag Entities and the Dow SP Entities were transferred and conveyed to DowDuPont.

In furtherance of the Business Separations, EID engaged in a series of internal reorganization and realignment steps (the "Internal Reorganization" and the "Business Realignment," respectively) to realign its businesses into three subgroups: agriculture, materials science and specialty products. As part of the Internal Reorganization:

- the assets and liabilities aligned with EID's materials science business ("EID ECP"), were transferred or conveyed to separate legal entities that were ultimately conveyed by DowDuPont to Dow on April 1, 2019;
- the assets and liabilities aligned with EID's specialty products business were transferred or conveyed to separate legal entities that were ultimately distributed to DowDuPont ("EID Specialty Products Entities") on May 1, 2019;
- on May 2, 2019, DowDuPont conveyed Dow Ag Entities to EID and in connection with the foregoing, EID issued additional shares of its common stock to DowDuPont; and
- on May 31, 2019, DowDuPont contributed EID to Corteva, Inc.

On May 6, 2019, the Board of Directors of DowDuPont approved the distribution of all the then issued and outstanding shares of common stock of Corteva, Inc., then a wholly-owned subsidiary of DowDuPont, to DowDuPont stockholders. On June 1, 2019, DowDuPont completed the Separation. Corteva, Inc.'s common stock began trading on the New York Stock Exchange under the ticker symbol "CTVA" on June 3, 2019.

As a result of the Business Realignment and the Internal Reorganization discussed above, Corteva owns 100% of the outstanding common stock of EID. EID is a subsidiary of Corteva, Inc. and continues to be a reporting company, subject to the requirements of the Securities Exchange Act of 1934, as amended.

Separation Agreements

In connection with the Distributions, DuPont, Corteva, and Dow (together, the "Parties" and each a "Party") have entered into certain agreements to effect the separation, provide for the allocation of DowDuPont's assets, employees, liabilities and obligations (including its investments, property and employee benefits and tax-related assets and liabilities) among the Parties, and provide a framework for Corteva's relationship with Dow and DuPont following the separations and Distributions. Effective April 1, 2019, the Parties entered into the following agreements:

- Separation and Distribution Agreement - Effective April 1, 2019, the Parties entered into an agreement that sets forth, among other things, the agreements among the Parties regarding the principal transactions necessary to effect the Distributions. It also sets forth other agreements that govern certain aspects of the Parties' ongoing relationships after the completion of the Distributions (the "Corteva Separation Agreement").
- Tax Matters Agreement - The Parties entered into an agreement effective as of April 1, 2019, as amended on June 1, 2019, that governs their respective rights, responsibilities and obligations with respect to tax liabilities and benefits, tax attributes, the preparation and filing of tax returns, the control of audits and other tax proceedings and other matters regarding taxes.
- Employee Matters Agreement - The Parties entered into an agreement that identifies employees and employee-related liabilities (and attributable assets) to be allocated (either retained, transferred and accepted, or assigned and assumed, as applicable) to the Parties as part of the Distributions and describes when and how the relevant transfers and assignments would occur.
- Intellectual Property Cross-License Agreement - Effective as of April 1, 2019 Corteva and Dow, and effective June 1, 2019, Corteva and DuPont, entered into Intellectual Property Cross-License Agreements. The Intellectual Property Cross-License Agreements set forth the terms and conditions under which the applicable Parties may use in their respective businesses, following each of the Distributions, certain know-how (including trade secrets), copyrights, and software, and certain patents and standards, allocated to another Party pursuant to the Corteva Separation Agreement.

ITEM 1. BUSINESS, *continued*

- Letter Agreement - Effective as of June 1, 2019 DuPont and Corteva entered into a Letter Agreement. The Letter Agreement sets forth certain additional terms and conditions related to the Separation, including certain limitations on each party's ability to transfer certain businesses and assets to third parties without assigning certain of such party's indemnification obligations under the Corteva Separation Agreement to the other party to the transferee of such businesses and assets or meeting certain other alternative conditions.

Business Segments

The company's operations are managed through two reportable segments: seed and crop protection. The seed segment develops and supplies commercial seed combining superior germplasm with advanced traits to produce high yield potential for farmers around the world. The crop protection segment supplies products to protect crop yields against weeds, insects and disease, enabling farmers to achieve optimal results. The combination of these leading platforms creates one of the broadest portfolios of agriculture solutions in the industry. Additional information with respect to business segment results is included in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, on page 47 of this report and Note 25 - Segment Information, to the Consolidated Financial Statements.

Seed

The seed segment is a global leader in developing and supplying commercial seed combining advanced germplasm and traits that produce optimum yield for farms around the world. The company's seed segment is a leader in many key seed markets, including North America corn and soybeans, Europe corn and sunflower, as well as Brazil, India, South Africa and Argentina corn. The company offers trait technologies that improve resistance to weather, disease, insects and herbicides used to control weeds, and trait technologies that enhance food and nutritional characteristics. In addition, the company provides digital solutions that assist farmer decision-making with a view to optimize product selection and, ultimately, help maximize yield and profitability.

Details on the seed segment's net sales by major product line and geographic region (based on customer location) are as follows:

2021 Net Sales by Product Line

2021 Net Sales by Geographic Region

Part I

ITEM 1. BUSINESS, *continued*

Products and Brands

The seed segment's major brands and technologies, by key product line, are listed below:

Seed Solutions Brands	Pioneer [®] ; Brevant [®] seeds; Dairyland Seed [®] ; Hoegemeyer [®] ; Nutech [®] ; Seed Consultants [®] ; AgVenture [®] ; Alforex [®] ; PhytoGen [®] ; Pannar [®] ; VP Maxx [®] ; HPT [®] ; G2 [®] ; Supreme EX [®] ; XL [®] ; Power Plus [®]
Seed Solutions Traits and Technologies	ENLIST E3 [®] soybeans; ENLIST [®] cotton; EXZACT [™] Precision Technology; HERCULEX [®] Insect Protection; Pioneer [®] brand hybrids with Leptra [®] insect protection technology offering protection against above ground pests; POWERCORE [®] trait technology family of products; Pioneer [®] brand Optimum [®] AcreMax [®] family of products offering above and below ground insect protection; REFUGE ADVANCED [®] trait technology; SMARTSTAX [®] trait technology; NEXERA [®] canola trait; Omega-9 Oils; Pioneer [®] brand Optimum [®] AQUAmax [®] hybrids; Pioneer [®] brand A-Series soybeans; Pioneer [®] brand Plenish [®] high oleic soybeans; ExpressSun [®] herbicide tolerant trait; Pioneer Protector [®] products for canola, sunflower and sorghum; Pioneer MAXIMUS [®] rapeseed hybrids; Qrome [®] products for corn; Pioneer [®] brand canola hybrids with Clearfield [®] trait; PROPOUND [™] advanced canola meal; Conkesta E3 [®] soybeans; WideStrike [®] insect protection trait; WideStrike [®] 3 insect protection trait.
Other	LumiGEN [®] seed treatments, LUMIDERM [®] , LUMIVIA [®] and LUMIALZA [™] ; GRANULAR [®] ; Granular [®] Insights [™] (e.g. LANDVisor [™])

U.S. federal regulatory authorizations have been obtained for the commercialization of ENLIST[™] corn, ENLIST E3[®] soybeans and ENLIST[®] cotton, including the U.S. Environmental Protection Agency's registration of ENLIST DUO[®] and ENLIST ONE[®] for use with ENLIST[™] corn, soybeans and cotton in 34 states. The company has also secured cultivation authorizations of ENLIST E3[®] soybeans and ENLIST[™] corn in Argentina, Brazil, and North America

In 2020, Corteva signed an agreement with J.G. Boswell Company to purchase the remaining 46.5 percent interest in PhytoGen[®] Seed Company, LLC – a joint venture between the two companies. With a 100% ownership position in PhytoGen[®] Seed Company, LLC, Corteva became the sole owner of the intellectual property, including patents, trademarks, proprietary germplasm and information, as well as know-how.

In 2020, Corteva announced the launch of Brevant[™] seeds in the U.S. for sale exclusively through retail locations in the Midwest and Eastern Corn Belt starting with 2021 planting. As a global brand, Brevant[™] seeds, which was originally launched in Latin America, Canada, and select European countries in 2018, provides farmers a greater choice with a high-performance retail solution. Brevant[™] provides multiple seed offerings including corn, soybeans, sunflowers and canola.

In connection with the validation of breeding plans and large-scale product development timelines focused on rapidly ramping up differentiated technology solutions, during the fourth quarter of 2019, the company began accelerating the ramp up of the Enlist E3[™] trait platform in the company's soybean portfolio mix across all brands, including Pioneer[®] brands, over the subsequent five years. During the ramp-up period, the company is expected to significantly reduce the volume of products with the Roundup Ready 2 Yield[®] and Roundup Ready 2 Xtend[®] herbicide tolerance traits beginning in 2021, with expected minimal use of the Roundup Ready 2 Yield[®] and Roundup Ready 2 Xtend[®] traits thereafter for the remaining term of the non-exclusive license with the Monsanto Company. Refer to Prepaid Royalties within the Critical Accounting Estimates section on page 63 for additional information.

In 2019, Corteva received import authorization from China for the Conkesta[®] soybean insect control trait, which was a necessary step for commercialization of Conkesta E3[®] soybeans in Latin America. Conkesta E3[®] soybeans received regulatory approvals and was commercialized in the second half of 2021.

In 2019, the company launched Qrome[®] corn products in U.S. Pioneer[®] brands. Qrome[®] products offer growers high yield potential insect control options to help drive productivity for their operations by combining top-tier genetics and strong defensive traits. In 2020, Qrome[®] products were expanded to the U.S. multi-channel and Canada Pioneer[®] brands.

Part I

ITEM 1. BUSINESS, *continued*

The company acquired exclusive rights to the Clearfield® canola production system in North America from BASF in 2019. The Clearfield® canola trait provides non-genetically modified tolerance to imidazolinone herbicides. Clearfield® canola in the Pioneer® and Nexera® brands were already highly established in the market and integrated into the company's breeding, production and commercial processes.

In addition, the company creates digital tools that provide both farmers and internal sales resources with platforms to support agronomic and operational decision-making, particularly in the areas of product selection, targeted crop protection application, and financial analysis, designed to help maximize yield and profitability.

Distribution

The seed segment has a diverse worldwide network which markets and distributes the company's brands to customers, primarily through the company's multi-channel, multi-brand strategy, which includes four differentiated channels: Pioneer agency model, regional brands, retail brands, as well as third parties through licensing and distribution channels.

The Pioneer agency model is unique to Corteva and represents sales made directly to farmers via independent sales representatives. Through this agency model, the company interacts directly with farmers at multiple points in the growing season, from prior to planting all the way through harvest. These regular interactions enable the company to provide the advice and service farmers need while giving the company real-time insights into the customers' future ordering decisions. The company's regional brands connect to customers through regional brand employees and farmer-dealer networks. Retail brands provide a one-stop shop for seed and chemistry solutions and may include sales to distributors, agricultural cooperatives, and dealers. Finally, Corteva out-licenses traits and germplasm to third parties.

Key Raw Materials

The key raw materials for seed include corn and soybean seeds. To produce high-quality seeds, the company contracts with third-party growers globally. Corteva focuses on production close to the customer to provide the seed product, which is suitable for that region and its weed, insect and disease challenges, weather, soil and other conditions. The company conditions and packages the seeds using its own plants and third-party contract manufacturers. By striking a balance between owning production facility assets directly and contracting with third-party growers, the company believes it is best able to maintain flexibility to react to demand changes unique to each geography while minimizing costs. The company seeks to collaborate with strategic seed growers and share its digital agronomy and product management knowledge with them. The company's third-party growers are an important part of its supply chain. Corteva provides them with rigorous training, planning tools and access to a system that tests and advances products matched to specific geographic needs.

The seed segment's R&D and supply chain groups work seamlessly to select and maintain product characteristics that enhance the quality of its seed products and solutions. Corteva focuses on customer-driven innovation to deliver superior germplasm and trait technologies. With its large sets of digitized data and its seed field management solution, the company can manage its field operations efficiently and draw insights from data quickly and effectively. This allows the company's supply chain to react quickly to changing customer needs and provides R&D with tremendous amounts of data to analyze and incorporate into resource allocation decisions. The company continues to invest in and build capabilities that drive value via data digitization and analytics that enable it to create an even more responsive and efficient answer to customer needs.

Crop Protection

The crop protection segment serves the global agricultural input industry with products that protect against weeds, insects and other pests, and disease, and that improve overall crop health both above and below ground via nitrogen management and seed-applied technologies. The company offers crop protection solutions that provide farmers the tools they need to improve productivity and profitability, and help keep fields free of weeds, insects and diseases. The company is a leader in global herbicides, insecticides, nitrogen stabilizers and pasture and range management herbicides.

Part I

ITEM 1. BUSINESS, *continued*

Details on the crop protection segment's net sales by major product line and geographic region (based on customer location) are as follows:

INSTINCT[™]; N-LOCK[™]; N-SERVE[®] Nitrogen Stabilizer

Key Raw Materials

The key raw materials and supplies for crop protection include chlorinated pyridines derivatives, specialty intermediates and technical grade active ingredients, chlorine, and seed treatments. Typically, the company purchases major raw materials through long-term contracts with multiple suppliers, which sometimes require minimum purchase commitments. Certain important raw materials are supplied by a few major suppliers. The company expects the markets for its raw materials to remain balanced, though pricing may be volatile given the current state of the global economy. The company relies on contract manufacturers, both domestically and internationally, to produce certain inputs or key components for its product formulations. These inputs are typically sourced close to where the company ultimately formulates and sells its products. Shifts in customer demand, reduced local availability of raw materials, and/or production capacity constraints may, at times, necessitate sourcing from an alternative geography. The company strives to maintain multiple high-quality supply sources for each input.

Corteva's supply chain strategy will involve managing global supplies of active and intermediate ingredients sourced regionally with global best practices and oversight. Corteva's supply strategy includes a robust and flexible global footprint to meet future

ITEM 1. BUSINESS, continued

portfolio growth. The company's supply chain also provides competitive advantages including reducing time to meet customer requirements in regions while minimizing costs through the value chain.

Seasonality

Corteva's sales are generally strongest in the first half of the calendar year, which aligns with the planting and growing season in the northern hemisphere. The company typically generates about 65 percent of its sales in the first half of the calendar year, driven by northern hemisphere seed and crop protection sales. The company generates about 35 percent of its sales in the second half of the calendar year, led by seed sales in the southern hemisphere. The seasonality in sales impacts both the seed and crop protection segments. The company's direct distribution channel, where products are shipped to farmers, is more affected by planting delays than its competitors. Generally speaking, unfavorable weather slows the planting season and can affect the company's quarterly results and sales mix. Severe unfavorable weather, however, can impact overall sales. Accounts receivable tends to be higher during the first half of the year, consistent with the peak sales period in the northern hemisphere, with cash collection focused in the fourth quarter.

Human Capital Management

Corteva aims to attract the best employees, to retain those employees through offering career development and training opportunities while also prioritizing their safety and wellness in an inclusive and productive work environment. The company's strong employee base of approximately 21,000 employees, along with its commitment to Corteva's core values, is a key element to the success of its business.

Workforce Composition. As of December 31, 2021, the company globally employs approximately 21,000 employees. In order to address regional specific customer needs within its global business, the company has a geographically diverse employee base with 48%, 18%, 17%, 13% and 4% located in North America, Latin America, Europe, Asia-Pacific and Africa regions, respectively.

Approximately 1% of the workforce is unionized in the United States and another 11% participate in work councils and collective bargaining arrangements outside the United States. In 2021, the company did not experience any work stoppages due to strike or lockouts.

Safety. Living safely is one of the company's core values by which the company manages its business. The company has implemented safety programs and management practices to promote a culture of safety to protect its employees, as well as the environment. This includes required trainings for employees, as well as specific qualifications and certifications for certain operational employees.

Diversity. The company has a robust inclusion, diversity, and equity ("ID&E") vision and strategy, based upon the belief that embracing diversity and inclusion benefits the company by creating a workforce with a greater variety of skills and perspectives as a result of their differentiated backgrounds and experiences. Specific ID&E initiatives are identified and tracked to create a culture of belonging where a diverse population of employees are attracted, retained, and engaged. Management is expected to support specific diversity initiatives for their respective geographies and business, as applicable, in order to build a more representative workforce. Critical to creating this environment are company-sponsored employee business resource groups ("BRGs") that support and promote certain mutual objectives of both the employee and the company, including community engagement and the professional development of employees. The BRGs provide a space where employees can foster connections within a supportive environment. As of the 2021 year end, the company had eight global BRGs, each led by a member of the company's senior leadership: Disability Awareness Network; Global African Heritage Alliance; Growing Asian Impact Network; Latin Network; Pride (LGBTQ+); Professional Learning Acceleration Network; Veteran's Network; and Women's Inclusion Network.

The company is focused on recruitment of diverse candidates and on internal talent development of its diverse leaders so that they can advance their careers and move into leadership positions within the company. The company monitors its diversity and inclusion efforts through periodic engagement surveys and other measures. The results of the company's efforts, along with its ID&E strategy, are reviewed periodically with the company's management, and through regular reviews of the company's leadership pipelines with the People and Compensation Committee of the Board of Directors.

Experienced Management. The company believes its management team has the experience necessary to effectively execute its strategy and advance its product pipelines and technology. The company's chief executive officer and executive vice presidents have an average of approximately 26 years of agriculture experience and are supported by an experienced and talented management team who is dedicated to maintaining and expanding its position as a global force in the agriculture industry.

Part I

ITEM 1. BUSINESS, *continued*

Intellectual Property

Corteva considers its intellectual property estate, which includes patents, trade secrets, trademarks and copyrights, in the aggregate, to constitute a valuable asset of Corteva and actively seeks to secure intellectual property rights as part of an overall strategy to protect its investment in innovations and maximize the results of its research and development program. While the company believes that its intellectual property estate, taken as a whole, provides a competitive advantage in many of its businesses, no single patent, trademark, license or group of related patents or licenses is in itself essential to the company as a whole or to any of the company's segments.

Trade secrets are an important element of the company's intellectual property. Many of the processes used to make Corteva products are kept as trade secrets which, from time to time, may be licensed to third parties. Corteva vigilantly protects all of its intellectual property including its trade secrets. When the company discovers that its trade secrets have been unlawfully taken, it reports the matter to governmental authorities for investigation and potential criminal action, as appropriate. In addition, the company takes measures to mitigate any potential impact, which may include civil actions seeking redress, restitution and/or damages based on loss to the company and/or unjust enrichment.

Patents & Trademarks: Corteva continually applies for and obtains U.S. and foreign patents and has access to a large patent portfolio, both owned and licensed. Corteva's rights under these patents and licenses, as well as the products made and sold under them, are important to the company in the aggregate. The protection afforded by these patents varies based on country, scope of individual patent coverage, as well as the availability of legal remedies in each country. This significant patent estate may be leveraged to align with the company's strategic priorities within and across product lines. At December 31, 2021, the company owned about 5,600 U.S. patents and about 11,100 active patents outside of the U.S.

Remaining life of granted patents owned as of December 31, 2021:

	Approximate U.S.	Approximate Other Countries
Within 5 years	700	1,300
6 to 10 years	1,700	4,300
11 to 16 years	2,100	5,100
16 to 20 years	1,100	400
Total	5,600	11,100

In addition to its owned patents, the company owns over 5,500 patent applications.

The company also owns or has licensed a substantial number of trade names, trademarks and trademark registrations in the United States and other countries, including approximately 14,500 registrations and pending trademark applications in a number of jurisdictions.

In addition, the company holds multiple long-term biotechnology trait licenses from third parties in the normal course of business. Most corn hybrids and soybean varieties sold to customers contain biotechnology traits licensed from third parties under these long-term licenses.

Competition

The company competes with producers of seed germplasm, trait developers, and crop protection products on a global basis. The global market for products within the industry is highly competitive and the company believes competition has and will continue to intensify. Corteva competes based on germplasm and trait leadership, price, quality and cost competitiveness and the offering of a holistic solution. The company's key competitors include BASF, Bayer, FMC and ChemChina, as well as companies trading in generic crop protection chemicals and regional seed companies.

Environmental Matters

Information related to environmental matters is included in several areas of this report: (1) Environmental Proceedings beginning on page 28, (2) Management's Discussion and Analysis of Financial Condition and Results of Operations beginning on pages 61, 66-68 and (3) Note 2 - Summary of Significant Accounting Policies, and Note 18 - Commitments and Contingent Liabilities, to the Consolidated Financial Statements.

ITEM 1. BUSINESS, continued**Regulatory Considerations**

Our seed and crop protection products and operations are subject to certain approval procedures, manufacturing requirements and environmental protection laws and regulations in the jurisdictions in which we operate. We evaluate and test products throughout the research and development phases, and each new technology undergoes further rigorous scientific studies and tests to validate that the product can be used effectively and that use of the technology is safe for humans and animals and does not cause undue harm to the environment when used in accordance with the directions for use.

The regulatory approval processes and procedures globally are becoming increasingly more complex, which has resulted in additional testing needs, difficult to predict and longer approval timelines, and higher development and maintenance costs. We continue to invest on an ongoing basis to keep dossiers current, respond to regulators and meet evolving regulatory standards required by global regulatory frameworks. Failure to comply with these regulations or future regulatory bans and requirements related to our products and their use may materially impact our financial performance. The increase in timelines for regulatory approvals may result in the company not achieving its sustainability targets, or its anticipated returns on research and development investments.

Regulation of Genetically Modified Organisms (“GMOs”)

Genetically modified seed products are subject to regulatory approval processes and procedures. For example, in the United States, the Coordinated Framework for Regulation of Biotechnology governs genetically modified organisms, using existing U.S. legislation and legal authorities on food, feed and environmental safety. Plant GMOs are regulated by the U.S. Department of Agriculture’s (the “USDA”) Animal and Plant Health Inspection Service (the “APHIS”) under the Plant Protection Act. The APHIS assesses the trait to ensure that the trait will not pose a plant pest and is not a noxious weed. GMOs in food are regulated by the Food and Drug Administration (the “FDA”) under the Federal Food, Drug, and Cosmetic Act (the “FFDCA”). The FDA ensures that the food is safe for food and feed. Pesticides and microorganisms containing GMOs are regulated by the Environmental Protection Agency (the “EPA”) pursuant to the Federal Insecticide, Fungicide and Rodenticide Act (the “FIFRA”) and the Toxic Substances Control Act. The EPA assesses the trait or the stack containing the traits to ensure that there is no unreasonable adverse effect to the environment.

Other countries also have rigorous approval processes, procedures, and scientific testing requirements for the cultivation or import of genetically modified seed products. In the United States and other countries that have functioning regulatory systems, a rigorous scientific review is conducted by these agencies to demonstrate that genetically modified products are as safe as traditionally bred, non-biotech/GMO counterparts for food, feed and the environment. Various countries in EMEA, Latin America, and Asia have banned GMOs entirely.

Regulation of Crop Protection Products

Globally, manufacturers of crop protection products, including herbicides, fungicides and insecticides are required to submit an application/dossier and obtain government regulatory approval prior to selling products in a particular country. In the United States, the EPA is responsible for registering and overseeing the approval and marketing of pesticides, pursuant to the FIFRA, the FFDCA and the Food Quality Protection Act. Also, the USDA and the FDA monitor levels of pesticide residue that is allowed on or in crops. Already registered pesticides are required to be re-registered every 15 years to ensure that those products continue to meet the rigorous safety standards set by the regulators. The EPA reevaluates pesticide tolerances at least every 10 years, taking into account ecological and human health risks, in addition to cumulative risks as a result of multiple routes of and sources of exposure.

As of January 2022, before registering any new conventional pesticide active ingredient, the EPA will evaluate the potential effects on listed species and their designated critical habitats under the Endangered Species Act (the “ESA”). EPA also has initiated such evaluations for certain other active ingredients in response to existing or threatened litigation. Where the EPA determines that a pesticide in the registration and re-evaluation processes “may affect” a listed species, the EPA must consult with the U.S. Fish and Wildlife Service and the National Marine Fisheries Service. As part of its approval, registration, and reevaluation processes, the EPA may impose certain use restrictions on crop protection products under the ESA. Under the citizen suit provisions, the ESA also includes citizen suit provisions that allow the public to bring suit in court against federal agencies when they believe a listed species is not being adequately protected by the EPA.

The company’s European operations are subject to the European chemical regulation REACH (“Registration, Evaluation, Authorisation, and Restriction of Chemicals”) and the CLP (“Classification, Labeling, and Packaging of Substances and Mixtures”). Other jurisdictions also have rigorous approval processes, procedures and scientific testing requirements for the approval of crop protection products. We continue to monitor legislative and regulatory developments related to pollution and other environmental health and safety matters.

European Farm to Fork Strategy

In October 2021, a majority of the European Parliament adopted the Farm to Fork Strategy setting forth the European Union’s plans to increase organic farming. As part of this strategy, the E.U. Commission has set aggressive 2030 targets to reduce by 50% the use and risk of chemical pesticides and the use of more hazardous pesticides by 50%. Additionally, as part of this strategy, the E.U. Commission is targeting having 25% of the European Union’s agricultural land under organic farming by

Part I

ITEM 1. BUSINESS, *continued*

2030. The E.U. Commission is also expected to propose mandatory front-of-pack nutrition labelling and develop a food labelling framework covering the nutritional, climate, environmental and social aspects of food products. While the company has a growing product portfolio supportive to organic agriculture, the implementation of this strategy may decrease the size of the market for its products within the European Union.

Available Information

The company's annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to those reports are accessible on Corteva's website at <http://investors.corteva.com> by clicking on the section labeled "Financial Information", then on "SEC Filings." These reports are made available, without charge, as soon as is reasonably practicable after the company files or furnishes them electronically with the Securities and Exchange Commission. No portion of the company's website mentioned in this report, or the materials contained on it, have been made part of this annual report on Form 10-K or incorporated herein by reference, unless such incorporation is specifically mentioned herein.

ITEM 1A. RISK FACTORS

Risks Related to our Industry

The successful development and commercialization of Corteva's pipeline products will be necessary for Corteva's growth.

Corteva uses advanced breeding technologies to produce hybrids and varieties with superior performance in farmers' fields and uses biotechnology to introduce traits that enhance specific characteristics of its crops. Corteva also uses advanced analytics, software tools, mobile communications and new planting and monitoring equipment to provide agronomic recommendations to growers. Additionally, Corteva conducts research into biological and chemical products to protect farmers' crops from pests and diseases and enhance plant productivity.

New product concepts may be abandoned for many reasons, including greater anticipated development costs, technical difficulties, lack of efficacy, regulatory obstacles or inability to market under regulatory frameworks, competition, inability to prove the original concept, lack of demand and the need to divert focus, from time to time, to other initiatives with perceived opportunities for better returns. The processes of active ingredient development or discovery, breeding, biotechnology trait discovery and development and trait integration are lengthy, and a very small percentage of the chemicals, genes and germplasm Corteva tests is selected for commercialization. Furthermore, the length of time and the risk associated with the breeding and biotech pipelines are interlinked because both are required as a package for commercial success in markets where biotech traits are approved for growers. For example, the commercial transition to the company's Enlist E3™ and Conkesta E3® soybean technologies, which are packaged with its Enlist One® and Enlist Duo® herbicides, is expected to take the company several years to complete. In countries where biotech traits are not approved for widespread use, Corteva's seed sales depend on the quality of its germplasm. While initial commercialization efforts have been promising, there are no guarantees that anticipated levels of product acceptability within Corteva's markets will be achieved or that higher quality products will not be developed by Corteva's competitors in the future.

Speed in discovering, developing, protecting and responding to new technologies, including new technology-based distribution channels that could facilitate Corteva's ability to engage with customers and end users, and bringing related products to market is a significant competitive advantage. Commercial success frequently depends on being the first company to the market, and many of Corteva's competitors are also making considerable investments in similar new biotechnology products, improved germplasm products, biological and chemical products and agronomic recommendation products.

Corteva may not be able to obtain or maintain the necessary regulatory approvals for some of its products, including its seed and crop protection products, which could restrict its ability to sell those products in some markets.

Regulatory and legislative requirements affect the development, manufacture and distribution of Corteva's products, including the testing and planting of seeds containing Corteva's biotechnology traits and the import of crops grown from those seeds, and non-compliance can harm Corteva's sales and profitability.

Seed products incorporating biotechnology derived traits and crop protection products must be extensively tested for safety, efficacy and environmental impact before they can be registered for production, use, sale or commercialization in a given market. In certain jurisdictions, Corteva must periodically renew its approvals for both biotechnology and crop protection products, which typically require Corteva to demonstrate compliance with then-current standards which generally are more stringent since the prior registration. The regulatory approvals process is lengthy, costly, complex and in some markets unpredictable, with requirements that can vary by product, technology, industry and country. The regulatory approvals process for products that incorporate novel modes of action or new technologies can be particularly unpredictable and uncertain due to the then-current state of regulatory guidelines and objectives, as well as governmental policy considerations and non- governmental organization and other stakeholder considerations. The uncertainty and increased length of regulatory approvals may reduce Corteva's return on its research and development investments, and impede its ability to meet sales, profitability, or sustainability metrics.

Furthermore, the detection of biotechnology traits or chemical residues from a crop protection product not approved in the country in which Corteva sells or cultivates its product, or in a country to which Corteva imports its product, may affect Corteva's ability to supply its products or export its products, or even result in crop destruction, product recalls or trade disruption, which could result in lawsuits and termination of licenses related to biotechnology traits and raw material supply agreements. Delays in obtaining regulatory approvals to import, including those related to the importation of crops grown from

ITEM 1A. RISK FACTORS, *continued*

seeds containing certain traits or treated with specific chemicals, may influence the rate of adoption of new products in globally traded crops.

Additionally, the regulatory environment may be impacted by the activities of non-governmental organizations and special interest groups and stakeholder reaction to actual or perceived impacts of new and existing technology, products or processes on safety, health and the environment. Obtaining and maintaining regulatory approvals requires submitting a significant amount of information and data, which may require participation from technology providers. Regulatory standards and trial procedures are continuously changing. In addition, Corteva has seen an increase in recent years in the number of lawsuits filed by those who identify themselves as public or environmental interest groups seeking to invalidate pesticide product registrations and/or challenge the way federal or state governmental entities apply the rules and regulations governing pesticide produce use. The pace of change together with the lack of regulatory harmony could result in unintended noncompliance. Responding to these changes and meeting existing and new requirements may involve significant costs or capital expenditures or require changes in business practice that could result in reduced profitability. The failure to receive necessary permits or approvals could have near- and long-term effects on Corteva's ability to produce and sell some current and future products.

The degree of public understanding and acceptance or perceived public acceptance of Corteva's biotechnology and other agricultural products and technologies can affect Corteva's sales and results of operations by affecting planting approvals, regulatory requirements and customer purchase decisions.

Concerns and claims regarding the safe use of seeds with biotechnology traits and crop protection products in general, their potential impact on health and the environment, and the perceived impacts of biotechnology on health and the environment, reflect a growing trend in societal demands for increasing levels of product safety and environmental protection. These include concerns and claims that increased use of crop protection products, drift, inversion, volatilization and the use of biotechnology traits meant to reduce the resistance of weeds or pests to control by crop protection products, could increase or accelerate such resistance and otherwise negatively impact health and the environment. These and other concerns could manifest themselves in stockholder proposals, preferred purchasing, delays or failures in obtaining or retaining regulatory approvals, delayed product launches, lack of market acceptance, product discontinuation, continued pressure for and adoption of more stringent regulatory intervention and litigation, termination of raw material supply agreements and legal claims. These and other concerns could also influence public perceptions, the viability or continued sales of certain of Corteva's products, Corteva's reputation and the cost to comply with regulations. As a result, such concerns could have a material adverse effect Corteva's business, results of operations, financial condition and cash flows.

Changes in agricultural and related policies of governments and international organizations may prove unfavorable.

In many markets there are various pressures to reduce government subsidies to farmers, which may inhibit the growth in these markets of products used in agriculture. In addition, government programs that create incentives for farmers may be modified or discontinued. However, it is difficult to predict accurately whether, and if so when, such changes will occur. Corteva expects that the policies of governments and international organizations will continue to affect the planting choices made by growers as well as the income available to growers to purchase products used in agriculture and, accordingly, the operating results of the agriculture industry.

Corteva participates in an industry that is highly competitive and has undergone consolidation, which could increase competitive pressures.

Corteva currently faces significant competition in the markets in which it operates. In most segments of the market, the number of products available to the grower is steadily increasing as new products are introduced. At the same time, certain products are coming off patent and are thus available to generic manufacturers for production and commercialization. Additionally, data analytic tools and web-based new direct purchase models offer increased transparency and comparability, which creates price pressures. Corteva cannot predict the pricing or promotional actions of its competitors. Aggressive marketing or pricing by Corteva's competitors could adversely affect Corteva's business, results of operations and financial conditions. As a result, Corteva continues to face significant competitive challenges.

Corteva's business may be materially affected by competition from manufacturers of generic products.

Competition from manufacturers of generic products is a challenge for Corteva's branded products around the world, and the loss or expiration of intellectual property rights can have a significant adverse effect on Corteva's revenues. The date at which

ITEM 1A. RISK FACTORS, *continued*

generic competition commences may be different from the date that the patent or regulatory exclusivity expires. However, upon the loss or expiration of patent protection for one of Corteva's products or of a product that Corteva licenses, or upon the "at- risk" launch (despite pending patent infringement litigation against the generic product) by a generic manufacturer of a generic version of one of Corteva's patented products or of a product that Corteva licenses, Corteva can lose a major portion of revenues for that product, which can have a material adverse effect on Corteva's business.

The costs of complying with evolving regulatory requirements could negatively impact Corteva's business, results of operations and financial condition. Actual or alleged violations of environmental laws or permit requirements could result in restrictions or prohibitions on plant operations, substantial civil or criminal sanctions, as well as the assessment of strict liability and/or joint and several liability.

Corteva is subject to extensive federal, state, local and foreign laws, regulations, rules and ordinances relating to pollution, protection of the environment, waste water discharges, the generation, storage, handling, transportation, treatment, disposal and remediation of hazardous substances and waste materials and the use of genetically modified seeds and crop protection active ingredients by growers.

Environmental and health and safety laws, regulations and standards expose Corteva to the risk of substantial costs and liabilities, including liabilities associated with Corteva's business and the discontinued and divested businesses and operations of EID. As is typical for businesses like Corteva's, soil and groundwater contamination has occurred in the past at certain sites and may be identified at other sites in the future. Disposal of waste from Corteva's business at off-site locations also exposes it to potential remediation costs. Consistent with past practice, Corteva is continuing to monitor, investigate and remediate soil and groundwater contamination at several of these sites.

Costs and capital expenditures relating to environmental, health or safety matters are subject to evolving regulatory requirements and depend on the timing of the promulgation and enforcement of specific standards which impose the requirements. Moreover, changes in environmental regulations, including those related to climate change, could inhibit or interrupt Corteva's operations, or require modifications to its facilities in the future. Accordingly, environmental, health or safety regulatory matters could result in significant unanticipated costs or liabilities, which may be materially higher than Corteva's accruals.

Climate change and unpredictable seasonal and weather factors could impact Corteva's sales and earnings.

The agriculture industry is subject to seasonal and weather factors, which can vary unpredictably from period to period. Weather factors can affect the presence of disease and pests on a regional basis and, accordingly, can positively or adversely affect the demand for crop protection products, including the mix of products used or the level of returns. The weather also can affect the quality, volume and cost of seed produced for sale as well as demand and product mix. Seed yields can be higher or lower than planned, which could lead to higher inventory and related write-offs. Climate change may increase the frequency or intensity of extreme weather such as storms, floods, heat waves, droughts and other events that could affect the quality, volume and cost of seed produced for sale as well as demand and product mix. Climate change may also affect the availability and suitability of arable land and contribute to unpredictable shifts in the average growing season and types of crops produced.

Corteva's business is subject to various competition and antitrust, rules and regulations around the world, and as the size of its business grows, scrutiny of its business by legislators and regulators in these areas may intensify.

On July 9, 2021, President Biden issued an executive order promoting competition in the American economy. The order encouraged further examination and efforts by U.S. regulatory agencies to avoid market concentrations for agricultural inputs, that could challenge the survival of family farms. The executive order also directs the U.S. Secretary of Agriculture to take action to ensure that the intellectual property system, while still incentivizing innovation, does not also unnecessarily reduce competition in seed and other agricultural input markets beyond what is reasonably contemplated by the U.S. Patent Act and propose strategies for addressing those concerns across intellectual property, antitrust, and other relevant laws. While the ultimate impact of the executive order will depend on the actions ultimately resulting from the U.S. regulatory authorities, actions taken by such authorities may increase the regulation and regulatory costs associated with the agriculture industry in the future and restrict the company from pursuing certain growth opportunities, including mergers and acquisitions.

Scrutiny from regulators in the U.S. and abroad may intensify as Corteva's business presence grows. This scrutiny and related investigations, even when not resulting in an enforcement action, may result in damage to a company's reputation, significant

ITEM 1A. RISK FACTORS, *continued*

defense expense, as well as become a distraction to management. Antitrust and competition enforcement actions may result in regulators imposing fines, penalties, or restrictions on a company's business practices in a manner that may significantly impact its results of operations.

Corteva's sales to its customers may be adversely affected should a company successfully establish an intermediary platform for the sale of Corteva's products or otherwise position itself between Corteva and its customers.

Corteva services customers primarily through the Pioneer direct sales channel in key agricultural geographies, including the United States. In addition, Corteva supplements this approach with strong retail channels, including distributors, agricultural cooperatives and dealers, and with digital solutions that assist farmer decision-making with a view to optimize their product selection and maximize their yield and profitability. While Corteva expects the indirect channels and its digital platform will extend its reach and increase exposure of its products to other potential customers, including smaller farmers or farmers in less concentrated areas, there can be no assurance that Corteva will be successful in this regard. If a competitor were to successfully establish an intermediary platform for distribution of Corteva's products, especially with respect to Corteva's digital platform, it may disrupt Corteva's distribution model and inhibit Corteva's ability to provide a complete go-to-market strategy covering the direct, dealer and retail channels. In such a circumstance, Corteva's sales may be adversely affected.

Risks Related to Our Operations

Corteva is dependent on its relationships or contracts with third parties with respect to certain of its raw materials or licenses and commercialization.

Corteva is dependent on third parties in the research, development and commercialization of its products and enters into transactions including, but not limited to, supply agreements and licensing agreements in connection with Corteva's business. The majority of Corteva's corn hybrids and soybean varieties sold to customers contain biotechnology traits that Corteva licenses from third parties under long-term licenses. If Corteva loses its rights under such licenses, it could negatively impact Corteva's ability to obtain future licenses on competitive terms, commercialize new products and generate sales from existing products. To maintain such licenses, Corteva may elect to out-license its technology, including germplasm. There can be no guarantee that such out-licensing will not ultimately strengthen Corteva's competition thereby adversely impacting Corteva's results of operations.

While Corteva relies heavily on third parties for multiple aspects of its business and commercialization activities, Corteva does not control many aspects of such third parties' activities. Third parties may not complete activities on schedule or in accordance with Corteva's expectations. Failure by one or more of these third parties to meet their contractual or other obligations to Corteva or to comply with applicable laws or regulations, or any disruption in the relationship between Corteva and one or more of these third parties could delay or prevent the development, approval or commercialization of Corteva's products and could also result in non-compliance or reputational harm, all with potential negative implications for Corteva's business.

In addition, Corteva's agreements with third parties may obligate it to meet certain contractual or other obligations to third parties. For example, Corteva may be obligated to meet certain thresholds or abide by certain boundary conditions. If Corteva were to fail to meet such obligations to the third parties, its relationship with such third parties may be disrupted. Such a disruption could negatively impact certain of Corteva's licenses on which it depends, could cause reputational harm, and could negatively affect Corteva's business, results of operations and financial condition.

Corteva's business, results of operations and financial condition could be adversely affected by industrial espionage and other disruptions to its supply chain, information technology or network systems.

Business and/or supply chain disruptions, plant and/or power outages and information technology system and/or network disruptions, regardless of cause including acts of sabotage, employee error or other actions, geo-political activity, military conflict, local epidemics or pandemics, weather events and natural disasters could seriously harm Corteva's operations as well as the operations of its customers and suppliers. For example, a pandemic in locations where Corteva has significant operations, sales, or key suppliers could have a material adverse effect on Corteva's results of operations. In addition, terrorist attacks and natural disasters have increased stakeholder concerns about the security and safety of chemical production and distribution.

Business and/or supply chain disruptions may also be caused by security breaches, which could include, for example, ransomware attacks and attacks on information technology and infrastructure by hackers, viruses, breaches due to employee

ITEM 1A. RISK FACTORS, *continued*

error or actions or other disruptions. Corteva and/or its suppliers may fail to effectively prevent, detect and recover from these or other security breaches and, as a consequence, such breaches could result in misuse of Corteva's assets, business disruptions, loss of property including trade secrets and confidential business information, legal claims or proceedings, reporting errors, processing inefficiencies, negative media attention, loss of sales and interference with regulatory and data privacy compliance.

Like most major corporations, Corteva is the target of industrial espionage, including cyber-attacks, from time to time. Corteva has determined that these incidents have resulted, and could result in the future, in unauthorized parties gaining access to certain confidential business information. However, to date, Corteva has not experienced any material financial impact, changes in the competitive environment or impact on business operations from these events. Although management does not believe that Corteva has experienced any material losses to date related to industrial espionage and security breaches, including cybersecurity incidents, there can be no assurance that Corteva will not suffer such losses in the future.

Corteva actively manages the risks within its control that could lead to business disruptions and security breaches. As these threats continue to evolve, particularly around cybersecurity, Corteva may be required to expend significant resources to enhance its control environment, processes, practices and other protective measures. Despite these efforts, such events could also have a material adverse effect on Corteva's business, financial condition, results of operations and reputation. Additionally, any losses from such an event may be excluded from, or in excess of the coverages provided by Corteva's insurance policies.

Volatility in Corteva's input costs, which include raw materials and production costs, could have a significant impact on Corteva's business, results of operations and financial condition.

Corteva's input costs are variable based on the costs associated with production or with raw materials Corteva uses. For example, Corteva's production costs vary, especially on a seasonal basis where changes in weather influence supply and demand. In addition, Corteva's manufacturing processes consume significant amounts of raw materials, the costs of which are subject to worldwide supply and demand as well as other factors beyond Corteva's control. Corteva refers to these costs collectively as input costs. Significant variations in input costs affect Corteva's operating results from period to period.

When possible, Corteva purchases raw materials through negotiated long-term contracts to minimize the impact of price fluctuations. Corteva also enters into over-the-counter and exchange traded derivative commodity instruments to hedge its exposure to price fluctuations on certain raw material purchases. In addition, Corteva takes actions to offset the effects of higher input costs through selling price increases, productivity improvements and cost reduction programs. Success in offsetting higher input costs with price increases is largely influenced by competitive and economic conditions and could vary significantly depending on the market served. If Corteva is not able to fully offset the effects of higher input costs, it could have a significant impact on its financial results.

Corteva's liquidity, business, results of operations and financial condition could be impaired if it is unable to raise capital through the capital markets or short-term debt borrowings.

Any limitation on Corteva's ability to raise money in the capital markets or through short-term debt borrowings could have a substantial negative effect on Corteva's liquidity. Corteva's ability to affordably access the capital markets and/or borrow short-term debt in amounts adequate to finance its activities could be impaired as a result of a variety of factors, including factors that are not specific to Corteva, such as a severe disruption of the financial markets and, in the case of debt securities or borrowings, interest rate fluctuations. Due to the seasonality of Corteva's business and the credit programs Corteva may offer its customers, net working capital investment and corresponding debt levels will fluctuate over the course of the year.

Corteva regularly extends credit to its customers to enable them to purchase seeds or crop protection products at the beginning of the growing season. The customer receivables may be used as collateral for short-term financing programs. Any material adverse effect upon Corteva's ability to own or sell such customer receivables, including seasonal factors that may impact the amount of customer receivables Corteva owns, may materially impact Corteva's access to capital.

Corteva has additional agreements with financial institutions to establish programs that provide financing for select customers of Corteva's seed and crop protection products in the United States, Latin America, Europe and Asia. The programs are renewed on an annual basis. In most cases, Corteva guarantees the extension of such credit to such customers. If Corteva is unable to renew these agreements or access the debt markets to support customer financing, Corteva's sales may be negatively impacted, which could result in increased borrowing needs to fund working capital.

Part I

ITEM 1A. RISK FACTORS, *continued*

Corteva's earnings, operations and business, among other things, will impact its credit ratings, costs and availability of financing. There can be no assurance that Corteva or EID will maintain its current or prospective credit ratings. A decrease in the ratings assigned to Corteva or EID by the ratings agencies may negatively impact Corteva's liquidity, access to the debt capital markets and increase Corteva's cost of borrowing and the financing of its seasonal working capital.

Corteva's customers may be unable to pay their debts to Corteva, which could adversely affect Corteva's results.

Corteva offers its customers financing programs with credit terms generally less than one year from invoicing in alignment with the growing season. Due to these credit practices as well as the seasonality of Corteva's operations, Corteva may need to issue short-term debt at certain times of the year to fund its cash flow requirements. Corteva's customers may be exposed to a variety of conditions that could adversely affect their ability to pay their debts. For example, customers in economies experiencing an economic downturn or in a region experiencing adverse growing conditions may be unable to repay their obligations to Corteva, which could adversely affect Corteva's results.

Increases in pension and other post-employment benefit plan funding obligations may adversely affect Corteva's results of operations, liquidity or financial condition.

Through Corteva's ownership of EID, Corteva maintains EID defined benefit pension and other post-employment benefit plans. For some of these plans, including EID's principal U.S. pension plan, Corteva continues as sponsor for the entire plan regardless of whether participants, including retirees, are or were associated with EID's agriculture business. Corteva uses many assumptions in calculating its expected future payment obligations under these plans. Significant adverse changes in credit or market conditions could result in actual rates of returns on pension investments being lower than assumed. In addition, expected future payment obligations may be adversely impacted by changes in assumptions regarding participants, including retirees. In 2022, Corteva expects to contribute approximately \$60 million to its pension plans other than the principal U.S. pension plan, and about \$140 million for its other post-employment benefit ("OPEB") plans. While not anticipated for 2022, Corteva may make potential discretionary contributions to the principal U.S. pension plan. Corteva, furthermore, may be required to make significant contributions to its pension plans in the future, which could adversely affect Corteva's results of operations, liquidity and financial condition.

Corteva's business, results of operations and financial condition could be adversely affected by environmental, litigation and other commitments and contingencies.

As a result of Corteva's operations, including past operations and those related to divested businesses and discontinued operations of EID, Corteva incurs environmental operating costs for pollution abatement activities including waste collection and disposal, installation and maintenance of air pollution controls and wastewater treatment, emissions testing and monitoring and obtaining permits. Corteva also incurs environmental operating costs related to environmental related research and development activities including environmental field and treatment studies as well as toxicity and degradation testing to evaluate the environmental impact of products and raw materials. In addition, Corteva maintains and periodically reviews and adjusts its accruals for probable environmental remediation and restoration costs.

Corteva expects to continue to incur environmental operating costs since it will operate global manufacturing, product handling and distribution facilities that are subject to a broad array of environmental laws and regulations. These rules are subject to change by the implementing governmental agency, which Corteva monitors closely. Corteva's policy requires that its operations fully meet or exceed legal and regulatory requirements. In addition, Corteva expects to continue certain voluntary programs, and could consider additional voluntary actions, to reduce air emissions, minimize the generation of hazardous waste, decrease the volume of water use and discharges, increase the efficiency of energy use and reduce the generation of persistent, bioaccumulative and toxic materials. Costs to comply with complex environmental laws and regulations, as well as internal voluntary programs and goals, are significant and Corteva expects these costs will continue to be significant for the foreseeable future. Over the long term, such expenditures are subject to considerable uncertainty and could fluctuate significantly.

Corteva accrues for environmental matters when it is probable that a liability has been incurred and the amount can be reasonably estimated. As remediation activities vary substantially in duration and cost from site to site, it is difficult to develop precise estimates of future site remediation costs. Corteva expects to base such estimates on several factors, including the complexity of the geology, the nature and extent of contamination, the type of remedy, the outcome of discussions with regulatory agencies and other Potentially Responsible Parties ("PRPs") at multi-party sites and the number of, and financial

ITEM 1A. RISK FACTORS, continued

viability of, other PRPs. Considerable uncertainty exists with respect to environmental remediation costs and, under adverse changes in circumstances, the potential liability may be materially higher than Corteva's accruals.

Corteva faces risks arising from various unasserted and asserted litigation matters arising out of the normal course of its current and former business operations, including intellectual property, commercial, product liability, environmental and antitrust lawsuits. Corteva has noted a trend in public and private suits being filed on behalf of states, counties, cities and utilities alleging harm to the general public and the environment, including waterways and watersheds. Claims alleging harm to the public and the environment may be brought against Corteva, notwithstanding years of scientific evidence and regulatory determinations supporting the safety of crop protection products. The litigation involving Monsanto's Roundup® non-selective glyphosate containing weedkiller products has resulted in negative publicity and sentiment and may lead to similar suits with respect to glyphosate-containing products and/or other established crop protection products. Claims and allegations that Corteva's products or products that Corteva manufactures or markets on behalf of third parties are not safe could result in litigation, damage to Corteva's reputation and have a material adverse effect on Corteva's business. It is not possible to predict the outcome of these various proceedings and any potential impact on Corteva. An adverse outcome in any one or more of these matters may result in losses not fully covered by Corteva's insurance policies, and could be material to Corteva's financial results. Various factors or developments can lead to changes in current estimates of liabilities. Such factors and developments may include, but are not limited to, additional data, safety or risk assessments, as well as a final adverse judgment, significant settlement or changes in applicable law. A future adverse ruling or unfavorable development could result in future charges that could have a material adverse effect on Corteva.

The company, pursuant to the respective Separation Agreements, is entitled to cost sharing and indemnification from Chemours, Dow and DuPont, as applicable, for certain litigation, environmental, workers' compensation and other liabilities related to its historical operations. In connection with the recognition of liabilities related to these matters, Corteva records an indemnification asset when recovery is deemed probable. These estimates of recovery are subject to various factors and developments that could result in differences from future estimates or the actual recovery. As of December 31, 2021, the indemnification assets pursuant to the Chemours Separation Agreement and the Corteva Separation Agreement are in aggregate \$72 million within accounts and notes receivable - net and \$254 million within other assets in the company's Consolidated Balance Sheet. Any failure by, or inability to pay, these liabilities in line with the indemnification provisions of the Separation Agreements may have a material adverse effect on Corteva and its financial condition and results of operations.

In the ordinary course of business, Corteva may make certain commitments, including representations, warranties and indemnities relating to current and past operations, including those related to divested businesses and issue guarantees of third-party obligations. If Corteva were required to make payments as a result, they could exceed the amounts accrued, thereby adversely affecting Corteva's financial condition and results of operations.

Corteva's operations outside the United States are subject to risks and restrictions, which could negatively affect Corteva's business, results of operations and financial condition.

Corteva's operations outside the United States are subject to risks and restrictions, including fluctuations in foreign-currency exchange rates; inflation; exchange and price control regulations; corruption risks; competitive restrictions; changes in local political or economic conditions; import and trade restrictions; import or export licensing requirements and trade policy; and other potentially detrimental domestic and foreign governmental practices or policies affecting U.S. companies doing business abroad. In addition, Corteva's international operations are sometimes in countries with unstable governments, economic or fiscal challenges, military or political conflicts, local epidemics or pandemics, significant levels of crime and organized crime, or developing legal systems. This may increase the risk to the company's employees, subcontractors or other parties, and to other liabilities, such as property loss or damage to the company's products, and may affect Corteva's ability to safely operate in, or import into, or receive raw materials from these countries.

Additionally, Corteva's ability to export its products and its sales outside the United States has been, and may continue to be adversely affected by significant changes in trade, tax or other policies, including the risk that other countries may retaliate through the imposition of their own trade restrictions and/or increased tariffs in response to substantial changes to U.S. trade and tax policies.

Although Corteva has operations throughout the world, Corteva's sales outside the United States in 2021 were principally to customers in Brazil, Eurozone countries, and Canada. Further, Corteva's largest currency exposures are the Brazilian Real, Swiss franc, European Euro ("EUR"), and Canadian dollar. Inflation, market uncertainty or an economic downturn in these

ITEM 1A. RISK FACTORS, *continued*

geographic areas could reduce demand for Corteva's products and result in decreased sales volume, which could have a negative impact on Corteva's results of operations. In addition, changes in exchange rates may affect Corteva's results of operations, financial condition and cash flows in future periods. Corteva actively manages currency exposures that are associated with net monetary asset positions and committed purchases.

Failure to effectively manage acquisitions, divestitures, alliances, restructurings, cost savings initiatives and other portfolio actions may not have the results anticipated.

From time to time Corteva evaluates acquisition candidates that may strategically fit Corteva's business and/or growth objectives. If Corteva is unable to successfully integrate and develop acquired businesses, Corteva could fail to achieve anticipated synergies and cost savings, including any expected increases in revenues and operating results, which could have a material adverse effect on Corteva's financial results. Corteva continually reviews its portfolio of assets for contributions to its objectives and alignment with its growth strategy. However, Corteva may not be successful in separating underperforming or non-strategic assets and gains or losses on the divestiture of, or lost operating income from, such assets may affect Corteva's earnings. Moreover, Corteva might incur asset impairment charges related to acquisitions or divestitures that reduce its earnings. In addition, if the execution of these transactions, initiatives, or portfolio actions is not successful, it could adversely impact Corteva's financial condition, cash flows and results of operations.

Sentiment towards climate change and other environmental, social and governance ("ESG") matters could adversely affect our stock price, results of operations, and access to capital.

Since 2020, Corteva has announced sustainability goals, including adopting its greenhouse gas emission reduction strategy and targets for 2030 and inclusion, diversity and equity goals for 2026. Execution of these strategies and the achievements of Corteva's sustainability goals is subject to risk and uncertainties, many of which are out of its control. Failure to achieve its sustainability goals within the currently projected costs and expected timeframes could damage Corteva's reputation, customer and investor relationships, or its access to financing. Further, given investors' increased focus related to ESG matters, such a failure could cause stockholders to reduce their ownership holdings, all of which, in turn could adversely affect Corteva's business, financial condition, results of operations and cash flows and reduce its stock price.

Global or regional health pandemics or epidemics, including COVID-19, could negatively impact the company's business, financial condition and results of operations.

Corteva's business, financial condition, and results of operations could be negatively impacted by COVID-19 or other pandemics or epidemics. The severity, magnitude and duration of the current COVID-19 pandemic and future outbreaks is uncertain, rapidly changing and difficult to predict. To date, the COVID-19 pandemic has negatively impacted foreign currency exchange rates, as a result of a generally stronger U.S. dollar relative to other currencies in the countries in which the company operates, which has adversely affected the company's reported results of operations. These relative differences could widen and further adversely impact our results of operations and financial condition. Increased market volatility resulting from COVID-19 disruptions has also limited the availability of certain manufacturing inputs. Current and future COVID-19 outbreaks and resulting illness, travel restrictions and workforce disruptions could impact Corteva's global supply chain, its operations and its routes to market or those of its suppliers, co-manufacturers, or customers/distributors. These disruptions or the company's failure to effectively respond to them could increase product or distribution costs, alter the timing of recognizing manufacturing costs, or impact the delivery of products to customers.

COVID-19 and the related government-imposed restrictions, including stay at home orders, has significantly impacted other economic activity and markets around the world. Future outbreaks or pandemics could negatively impact the company's business, financial condition, and results of operations in numerous ways, including but not limited to those outlined below:

- Government or regulatory responses to pandemics could negatively impact the company's business. Mandatory lockdowns or other restrictions on operations in certain countries have temporarily disrupted the company's ability to operate or distribute its products in these markets. Continuation or expansion of these disruptions could materially adversely impact the company's operations and results.
- Reductions to the company's forecasted profitability and continued global economic decline could trigger potential impairment of the carrying value of goodwill or other indefinite and definite-lived intangible assets.
- The instability or unavailability of a farm workforce to harvest agricultural products could impact the company's customers' ability to monetize their crop and potentially impact the collection of the company's customer receivables.

ITEM 1A. RISK FACTORS, *continued*

- Continued commodity cost volatility is expected and the company's commodity hedging activities may not sufficiently offset this volatility. Depressed commodity prices may increase the insolvency risk of Corteva's customers in the longer-term, along with reducing the demand for Corteva's products.
- Disruptions or uncertainties related to the COVID-19 outbreak for a sustained period of time could result in delays or modifications to the company's strategic plans and productivity initiatives.
- Increased volatility and pricing in the capital and commercial paper markets may re-occur and impact the company's access to preferred sources of liquidity resulting in higher borrowing costs. The company cannot assure investors that additional liquidity will be readily available or available on favorable terms.
- Increased market volatility may bring unprecedented market conditions making it difficult for the company to adequately forecast customer demand or price its products.

Therefore, the result of the company's consolidated results of operations in face of the ongoing COVID-19 outbreak, or another pandemic, and the unprecedented economic conditions which can result therefrom may negatively impact the company's business operations, financial performance and results of operations in the future.

If we are unable to recruit and retain key personnel, our business may be harmed.

Much of Corteva's future success depends on the continued service, availability and performance of our senior management and highly-skilled personnel across all levels of the organization. Corteva's senior management has acquired specialized knowledge and skills with respect to its business, and the loss of any of these individuals could harm its business, especially if we are not successful in developing adequate succession plans. Our efforts to attract, develop, integrate and retain highly skilled employees with appropriate qualifications may be compounded by difficulties in recruiting, hiring and retaining urgently needed specialized employees at a regional level where there may be significant competition between employers. If we are unable to continue to successfully attract, retain, and develop key personnel, our business may be harmed.

Risks Related to Our Intellectual Property

Enforcing Corteva's intellectual property rights, or defending against intellectual property claims asserted by others, could materially affect Corteva's business, results of operations and financial condition.

Intellectual property rights, including patents, plant variety protection, trade secrets, confidential information, trademarks, trade names and other forms of trade dress, are important to Corteva's business. Corteva endeavors to protect its intellectual property rights in jurisdictions in which its products are produced or used and in jurisdictions into which its products are imported. However, Corteva may be unable to obtain protection for its intellectual property in key jurisdictions. Further, changes in government policies and regulations, including changes made in reaction to pressure from non-governmental organizations, or the public generally, could impact the extent of intellectual property protection afforded by such jurisdictions.

Corteva has designed and implemented internal controls to restrict use of, access to and distribution of its intellectual property. Despite these precautions, Corteva's intellectual property is vulnerable to infringement, misappropriation and other unauthorized access, including through employee or licensee error or actions, theft and cybersecurity incidents, and other security breaches. When unauthorized access and use or counterfeit products are discovered, Corteva reports such situations to governmental authorities for investigation, as appropriate, and takes measures to mitigate any potential impact. Protecting intellectual property related to biotechnology is particularly challenging because theft is difficult to detect and biotechnology can be self-replicating.

Competitors are increasingly challenging intellectual property positions and the outcomes can be highly uncertain. Third parties may claim Corteva's products violate their intellectual property rights. Defending such claims, even those without merit, could be time-consuming and expensive. In addition, any such claim could result in Corteva's having to enter into license agreements, develop non-infringing products or engage in litigation that could be costly. If challenges are resolved adversely, it could negatively impact Corteva's ability to obtain licenses on competitive terms, develop and commercialize new products and generate sales from existing products.

In addition, because of the rapid pace of technological change, the confidentiality of patent applications in some jurisdictions and/or the uncertainty in predicting the outcome of complex proceedings relating to ownership and the scope of patents relating to certain emerging technologies, competitors may be issued patents related to Corteva's business unexpectedly. These patents could reduce the value of Corteva's commercial or pipeline products or, to the extent they cover key technologies on which

Part I

ITEM 1A. RISK FACTORS, *continued*

Corteva has relied, require Corteva to seek to obtain licenses (and Corteva cannot ensure it would be able to obtain such a license on acceptable terms) or cease using the technology, no matter how valuable to Corteva's business.

Legislation and jurisprudence on patent protection is evolving and changes in laws could affect Corteva's ability to obtain or maintain patent protection for, and otherwise enforce Corteva's patents related to, its products.

Corteva's business may be adversely affected by the availability of counterfeit products.

A counterfeit product is one that has been deliberately and fraudulently mislabeled as to its identity and source. A counterfeit Corteva product, therefore, is one manufactured by someone other than Corteva, but which appears to be the same as an authentic Corteva product. The prevalence of counterfeit products is a significant and growing industry-wide issue due to a variety of factors, including, but not limited to, the following: the widespread use of the Internet, which has greatly facilitated the ease by which counterfeit products can be advertised, purchased and delivered to individual consumers; the availability of sophisticated technology that makes it easier for counterfeiters to make counterfeit products; and the relatively modest risk of penalties faced by counterfeiters compared to the large profits that can be earned by them from the sale of counterfeit products. Further, laws against counterfeiting vary greatly from country to country, and the enforcement of existing laws varies greatly from jurisdiction to jurisdiction. For example, in some countries, counterfeiting is not a crime; in others, it may result in only minimal sanctions. In addition, those involved in the distribution of counterfeit products use complex transport routes to evade customs controls by disguising the true source of their products.

Corteva's global reputation makes its products prime targets for counterfeiting organizations. Counterfeit products pose a risk to consumer health and safety because of the conditions under which they are manufactured (often in unregulated, unlicensed, uninspected and unsanitary sites) as well as the lack of regulation of their contents. Failure to mitigate the threat of counterfeit products, which is exacerbated by the complexity of the supply chain, could adversely impact Corteva's business by, among other things, causing the loss of consumer confidence in Corteva's name and in the integrity of its products, potentially resulting in lost sales and an increased threat of litigation.

Corteva undertakes significant efforts to counteract the threats associated with counterfeit products, including, among other things, working with regulatory authorities and multinational coalitions to combat the counterfeiting of products and supporting efforts by law enforcement authorities to prosecute counterfeiters; assessing new and existing technologies to seek to make it more difficult for counterfeiters to copy Corteva's products and easier for consumers to distinguish authentic from counterfeit products; working diligently to raise public awareness about the dangers of counterfeit products; working collaboratively with wholesalers, customs offices and law enforcement agencies to increase inspection coverage, monitor distribution channels and improve surveillance of distributors; and working with other members of an international trade association of agrochemical companies to promote initiatives to combat counterfeiting activity. No assurance can be given, however, that Corteva's efforts and the efforts of others will be entirely successful, and the presence of counterfeit products may continue to increase.

Restrictions under the intellectual property cross-license agreements limit Corteva's ability to develop and commercialize certain products and services and/or prosecute, maintain and enforce certain intellectual property.

The company is dependent to a certain extent on DuPont and Dow to maintain and enforce certain of the intellectual property licensed under the Intellectual Property Cross-License Agreements. For example, DuPont and Dow are responsible for filing, prosecuting and maintaining (at their respective discretion) patents on trade secrets and know-how that they each respectively license to Corteva. They also have the first right to enforce their respective trade secrets and know-how licensed to Corteva. If DuPont or Dow, as applicable, fails to fulfill its obligations or chooses to not enforce the licensed patents, trade secrets or know-how under the Intellectual Property Cross-License Agreements, the company may not be able to prevent competitors from making, using and selling competitive products and services.

In addition, Corteva's use of the intellectual property licensed to it under the Intellectual Property Cross-License Agreements is restricted to certain fields, which could limit Corteva's ability to develop and commercialize certain products and services. For example, the licenses granted to Corteva under the agreement will not extend to all fields of use that the company may decide to enter into in the future. These restrictions may make it more difficult, time consuming and/or expensive for Corteva to develop and commercialize certain new products and services, or may result in certain of its products or services being later to market than those of its competitors.

ITEM 1A. RISK FACTORS, *continued*

Risks Related to The Separation

In connection with the Separation the company has assumed, and agreed to indemnify DuPont and Dow for, certain liabilities. If the company is required to make payments pursuant to these indemnities, the company may need to divert cash to meet those obligations and its financial results could be negatively impacted. In addition, DuPont and Dow will indemnify Corteva for certain liabilities. These indemnities may not be sufficient to insure the company against the full amount of liabilities it incurs, and DuPont and/or Dow, and/or their historical separated businesses, may not be able to satisfy their indemnification obligations in the future.

Pursuant to the Separation Agreement, the Employee Matters Agreement and the Tax Matters Agreement with DuPont and Dow, the company agreed to assume, and indemnify DuPont and Dow for, certain liabilities for uncapped amounts, which may include, among other items, associated defense costs, settlement amounts and judgments, as discussed further in Note 18 - Commitments and Contingent Liabilities, to the Consolidated Financial Statements and Part I - Item 3 - Legal Proceedings. Payments pursuant to these indemnities may be significant and could negatively impact the company's business, particularly indemnities relating to certain litigation for Historical DuPont operations or its actions that could impact the tax-free nature of the Corteva Distribution. Third parties could also seek to hold the company responsible for any of the liabilities allocated to DuPont and Dow, including those related to DowDuPont's specialty products and/or materials science businesses, respectively, and those related to discontinued and/or divested businesses and operations of Historical Dow, which have been allocated to Dow. DuPont and/or Dow, as applicable, will agree to indemnify Corteva for such liabilities, but such indemnities may not be sufficient to protect the company against the full amount of such liabilities. In addition, DuPont and/or Dow, as applicable, may not be able to fully satisfy their indemnification obligations with respect to the liabilities the company incurs. Even if the company ultimately succeeds in recovering from DuPont and/or Dow, as applicable, any amounts for which the company is held liable, the company may be temporarily required to bear these losses itself. Each of these risks could negatively affect the company's business, financial condition, results of operations and cash flows.

Additionally, the company generally has assumed and is responsible for the payment of its share of (i) certain liabilities of DowDuPont relating to, arising out of or resulting from certain general corporate matters of DowDuPont, (ii) certain liabilities of Historical DuPont relating to, arising out of or resulting from general corporate matters of Historical DuPont and discontinued and/or divested businesses and operations of Historical DuPont, including its spin-off of Chemours, and (iii) certain separation expenses not otherwise allocated to DuPont or Dow (or allocated specifically to Corteva) pursuant to the Corteva Separation Agreement, and third parties could seek to hold Corteva responsible for DuPont's or Dow's share of any such liabilities. For more information, see Note 18 - Commitments and Contingent Liabilities, to the Consolidated Financial Statements and Part I - Item 3 - Legal Proceedings. DuPont and/or Dow, as applicable, will indemnify Corteva for their share of any such liabilities; however, such indemnities may not be sufficient to protect Corteva against the full amount of such liabilities, and/or DuPont and/or Dow may not be able to fully satisfy their respective indemnification obligations. In addition, even if the company ultimately succeeds in recovering from DuPont and/or Dow any amounts for which the company is held liable in excess of its agreed share, the company may be temporarily required to bear these losses itself and may not be able to fully insure itself to cover these risks. Each of these risks could materially affect the company's business, financial condition, results of operations and cash flows.

The Separation and related transactions may expose Corteva to potential liabilities arising out of state and federal fraudulent conveyance laws

Although the company received a solvency opinion from an investment bank confirming that the company and DuPont were each adequately capitalized following the Distribution, the Separation could be challenged under various state and federal fraudulent conveyance laws. In connection with fraudulent conveyances or transfers are generally defined to include transfers made or obligations incurred with the actual intent to hinder, delay or defraud current or future creditors or transfers made or obligations incurred for less than reasonably equivalent value when the debtor was insolvent, or that rendered the debtor insolvent, inadequately capitalized or unable to pay its debts as they become due. Any unpaid creditor could claim that DuPont did not receive fair consideration or reasonably equivalent value in the Separation and Corteva Distribution, and that the Separation and Corteva Distribution left DuPont insolvent or with unreasonably small capital or that DuPont intended or believed it would incur debts beyond its ability to pay such debts as they matured. Additionally, under its indemnity provisions of the Separation Agreement, the company could find its liabilities increased as a result of a court concluding that Historical DuPont, Historical Dow or DowDuPont executed a fraudulent conveyance in connection with divestitures and spin-offs of any one of their historical operations, including Chemours. If a court were to agree with such a plaintiff, then such court could void the Separation and Distribution as a fraudulent transfer or impose substantial liabilities on Corteva, which could materially

Part I

ITEM 1A. RISK FACTORS, *continued*

adversely affect its financial condition and results of operations. Among other things, the court could return some of Corteva's assets or shares of Corteva common stock to DuPont, provide DuPont with a claim for money damages against Corteva in an amount equal to the difference between the consideration received by DuPont and the fair market value of Corteva at the time of the Corteva Distribution, or require Corteva to fund liabilities of other companies involved in the Internal Reorganization and Business Realignment for the benefit of creditors.

The Distribution is also subject to review under state corporate Distribution statutes. Under the Delaware General Corporation Law (the "DGCL"), a corporation may only pay dividends to its stockholders either (i) out of its surplus (net assets minus capital) or (ii) if there is no such surplus, out of its net profits for the fiscal year in which the dividend is declared and/or the preceding fiscal year. Although the Distribution was made out of DowDuPont's surplus and the company received an opinion that DowDuPont has adequate surplus under Delaware law to declare the dividend of Corteva common stock in connection with the Corteva Distribution, there can be no assurance that a court will not later determine that some or all of the Corteva Distribution was unlawful.

If the Corteva Distribution, together with certain related transactions, were to fail to qualify for non-recognition treatment for U.S. federal income tax purposes, then the company could be subject to significant tax and indemnification liability and stockholders receiving Corteva common stock in the Corteva Distribution could be subject to significant tax liability.

DowDuPont received an IRS Tax Ruling and tax opinion that, among other things, the Corteva Distribution and certain related transactions will qualify as a tax-free transaction under Section 355 and Section 368(a)(1)(D) of the Internal Revenue Code (the "Code"). The IRS Ruling and tax opinion relied on certain facts, assumptions, and undertakings, and certain representations from DowDuPont and Corteva, regarding the past and future conduct of both respective businesses and other matters. Despite the tax opinion and the IRS Ruling, the IRS could determine on audit that the Distribution or certain related transactions should be treated as a taxable transaction if it determines that any of these facts, assumptions, representations or undertakings are not correct or have been violated, or that the Distribution should be taxable for other reasons, including if the IRS were to disagree with the conclusions of the tax opinion.

If the Corteva Distribution ultimately is determined to be taxable, then a stockholder of DuPont that received shares of Corteva common stock would be treated as having received a distribution of property in an amount equal to the fair market value of such shares (including any fractional shares sold on behalf of such stockholder) on the distribution date and could incur significant income tax liabilities. Such distribution would be taxable to such stockholder as a dividend to the extent of DuPont's current and accumulated earnings and profits, which would include any earnings and profits attributable to the gain recognized by DuPont on the taxable distribution and could include earnings and profits attributable to certain internal transactions preceding the Corteva Distribution. Any amount that exceeded DuPont's earnings and profits would be treated first as a non-taxable return of capital to the extent of such stockholder's tax basis in its shares of DuPont stock with any remaining amount being taxed as a gain on the DuPont stock. In the event the Distribution is ultimately determined to be taxable, DuPont would recognize corporate level taxable gain on the Distribution in an amount equal to the excess, if any, of the fair market value of Corteva common stock distributed to DuPont stockholders on the distribution date over DuPont's tax basis in such stock. In addition, if certain related transactions fail to qualify for tax-free treatment under U.S. federal, state, local tax and/or foreign tax law, Corteva and DuPont could incur significant tax liabilities under U.S. federal, state, local and/or foreign tax law.

Generally, taxes resulting from the failure of the Separation and Distributions to qualify for non-recognition treatment for U.S. federal income tax purposes would be imposed on DuPont or DuPont stockholders. Under the Tax Matters Agreement that the company entered into with DuPont and Dow, subject to the exceptions described below, the company is generally obligated to indemnify DuPont against such taxes imposed on DuPont. However, if the Distributions fail to qualify for non-recognition treatment for U.S. federal income tax purposes for certain reasons relating to the overall structure of the Merger and the Distributions, then under the Tax Matters Agreement, DuPont and Dow would share the tax liability resulting from such failure in accordance with their relative equity values on the first full trading day following the Dow Distribution. The company and DuPont would share any liabilities of DuPont described in the preceding sentence in accordance with its relative equity values on the first full trading day following the Corteva Distribution. Furthermore, under the terms of the Tax Matters Agreement, the company also generally will be responsible for any taxes imposed on DuPont or Dow that arise from the failure of the Corteva Distribution to qualify as tax-free for U.S. federal income tax purposes within the meaning of Section 355 of the Code or the failure of certain related transactions to qualify for tax-free treatment, to the extent such failure to qualify is attributable to actions, events or transactions relating to its, or its affiliates', stock, assets or business, or any breach of its representations made in any representation letter provided to its counsel in connection with the tax opinion. DuPont and Dow will be separately

ITEM 1A. RISK FACTORS, *continued*

responsible for any taxes imposed on Corteva that arise from the failure of the Corteva Distribution to qualify as tax-free for U.S. federal income tax purposes within the meaning of Section 355 of the Code or the failure of certain related transactions to qualify for tax-free treatment, to the extent such failure to qualify is attributable to actions, events or transactions relating to such company's or its affiliates' stock, assets or business, or any breach of such company's representations made in connection with the IRS Ruling or in the representation letter provided to counsel in connection with the tax opinion. Events triggering an indemnification obligation under the tax matters agreement include events occurring after the Corteva Distribution that cause DuPont to recognize a gain under Section 355(e) of the Code, as discussed further below. Such tax amounts could be significant. To the extent that the company is responsible for any liability under the tax matters agreement, there could be a material adverse impact on Corteva's business, financial condition, results of operations and cash flows in future reporting periods.

The IRS may assert that the Merger causes the Distributions and other related transactions to be taxable to DuPont, in which case the company could be subject to significant indemnification liability.

Even if the Distributions otherwise constitutes a tax-free transaction to stockholders under Section 355 of the Code, DuPont may be required to recognize corporate level tax on the Distributions and certain related transactions under Section 355(e) of the Code if, as a result of the Merger or other transactions considered part of a plan with the Distributions, there is a 50 percent or greater change of ownership in DuPont or Corteva. In connection with the Merger, DowDuPont received a private letter ruling from the IRS regarding the proper time, manner and methodology for measuring common ownership in the stock of DowDuPont, Historical DuPont and Historical Dow for purposes of determining whether there has been a 50 percent or greater change of ownership under Section 355(e) of the Code as a result of the Merger. The tax opinion relied on the continued validity of the private letter ruling, as well as certain factual representations from DowDuPont as to the extent of common ownership in the stock of Historical DuPont and Historical Dow immediately prior to the Merger. Based on the representations made by DowDuPont as to the common ownership in the stock of Historical DuPont and Historical Dow immediately prior to the Merger and assuming the continued validity of the IRS Ruling, the tax opinion concluded that there was not a 50 percent or greater change of ownership in DowDuPont, Historical DuPont or Historical Dow for purposes of Section 355(e) as a result of the Merger. Notwithstanding the tax opinion and the IRS Ruling, the IRS could determine that the Distributions or a related transaction should nevertheless be treated as a taxable transaction to DuPont if it determines that any of the facts, assumptions, representations or undertakings of DowDuPont is not correct or that the Distributions should be taxable for other reasons, including if the IRS were to disagree with the conclusions in the tax opinion that are not covered by the private letter ruling. If DuPont is required to recognize corporate level tax on either of the Distributions and certain related transactions under Section 355(e) of the Code, then under the Tax Matters Agreement, the company may be required to indemnify DuPont and/or Dow for all or a portion of such taxes, which could be a material amount, if such taxes were the result of either direct or indirect transfers of Corteva common stock or certain reasons relating to the overall structure of the Merger and the Distributions.

The company is subject to continuing contingent tax-related liabilities of DowDuPont following the Distribution.

There are several significant areas where the liabilities of DowDuPont may become Corteva's obligations either in whole or in part. For example, under the Code and the related rules and regulations, each corporation that was a member of DowDuPont's consolidated tax reporting group during any taxable period or portion of any taxable period ending on or before the effective time of the Distribution is jointly and severally liable for the U.S. federal income tax liability of the entire consolidated tax reporting group for such taxable period. Additionally, to the extent that any subsidiary of Corteva was included in the consolidated tax reporting group of either Historical DuPont or Historical Dow for any taxable period or portion of any taxable period ending on or before the effective date of the Merger, such subsidiary is jointly and severally liable for the U.S. federal income tax liability of the entire consolidated tax reporting group of Historical DuPont or Historical Dow, as applicable, for such taxable period. In connection with the Distributions, on April 1, 2019, the company entered into the Tax Matters Agreement with DuPont and Dow that allocates the responsibility for prior period consolidated taxes among Corteva, DuPont and Dow. If DuPont or Dow were unable to pay any prior period taxes for which it is responsible, however, the company could be required to pay the entire amount of such taxes, and such amounts could be significant. Other provisions of federal, state, local, or foreign law may establish similar liability for other matters, including laws governing tax-qualified pension plans, as well as other contingent liabilities.

Part I

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

The company moved its headquarters from Wilmington, Delaware to Indianapolis, Indiana effective February 8, 2022. It also maintains a global business center in Johnston, Iowa, for its seed business. Its manufacturing, processing, marketing and research and development facilities, as well as regional purchasing offices and distribution centers, are located throughout the world. The company has 92 manufacturing sites in the following geographic regions:

	Number of Sites		
	Crop	Seed	Total
North America ¹	6	42	48
EMEA ²	4	15	19
Latin America	7	10	17
Asia Pacific	4	4	8
Total	21	71	92

¹. North America consists of U.S. & Canada.

². Europe, Middle East, and Africa ("EMEA").

The company's principal sites include facilities which, in the opinion of management, are suitable and adequate for their use and have sufficient capacity for the company's current needs and expected near-term growth. In 2019, the company announced an expansion to increase its Spinosyns fermentation capacity (refer to page 56 for further discussion). Properties are primarily owned by the company; however, certain properties are leased. No title examination of the properties has been made for the purpose of this report and certain properties are shared with other tenants under long-term leases.

ITEM 3. LEGAL PROCEEDINGS

The company is subject to various legal proceedings, including, but not limited to, product liability, intellectual property, antitrust, commercial, property damage, personal injury, environmental and regulatory matters arising out of the normal course of its current businesses or legacy EID businesses unrelated to Corteva's current businesses but allocated to Corteva as part of the Separation of Corteva from DuPont. Information regarding certain of these matters is set forth below and in Note 18 - Commitments and Contingent Liabilities, to the Consolidated Financial Statements. Even when the Company believes liabilities are not expected to be material or the probability of loss or an adverse unappealable final judgment is remote, the Company may consider settlement of these matters, and may enter into settlement agreements, if it believes settlement is in the best interest of the Company, including avoidance of future distraction and litigation defense cost, and its shareholders.

Litigation related to Corteva's current businesses

Canadian Competition Bureau Formal Inquiry

On January 30, 2020, the Canadian Competition Bureau (the "Bureau") filed a court order for the company to produce records and information as part of a formal inquiry under civil sections of Canada's competition laws. The inquiry is in response to allegations by the Farmers Business Network ("FBN") that Corteva and other seeds and crop protection manufacturers and wholesalers unilaterally or in coordination refused, restricted and/or impaired supply of products to FBN in western Canada. This inquiry follows an informal request for information from the Bureau pursuant to which the company voluntarily provided documents and engaged in discussions with the Bureau outlining how its conduct was and continues to be compliant with Canadian competition laws. In February 2022, the Commissioner of the Bureau notified Corteva that the Bureau had discontinued the inquiry. The Bureau made no final determination with respect to Corteva's conduct, thereby retaining discretion to investigate or to take enforcement action in the future. Corteva believes the likelihood of material liability is remote.

Federal Trade Commission Investigation

On May 26, 2020, Corteva received a subpoena from the Federal Trade Commission ("FTC") directing it to submit documents pertaining to its crop protection products generally, as well as business plans, rebate programs, offers, pricing and marketing materials specifically related to its acetochlor, oxamyl, rimsulfuron and other related products in order to determine whether Corteva engaged in unfair methods of competition through anticompetitive conduct. Corteva has cooperated with the FTC's subpoena, and continues to believe the likelihood of material liability is remote.

Chlorpyrifos Lawsuits

As of December 31, 2021, there were pending personal injury and remediation lawsuits filed against the former Dow Agrosciences LLC in California alleging injuries related to exposure to, or contamination by, chlorpyrifos, the active ingredient in Lorsban®, an insecticide used by commercial farms for field fruit, nut and vegetable crops. Corteva ended its production of Lorsban® in 2020. Further information with respect to these proceedings is set forth under "Chlorpyrifos Lawsuits" in Note 18 – Commitments and Contingent Liabilities, to the Consolidated Financial Statements.

Litigation related to legacy EID businesses unrelated to Corteva's current businesses

As discussed below and in Note 18 - Commitments and Contingent Liabilities, to the Consolidated Financial Statements, certain of the environmental proceedings and litigation allocated to Corteva as part of the Separation from DuPont relate to the legacy EID businesses, including their use of PFOA, which, for purposes of this report, means collectively perfluorooctanoic acid and its salts, including the ammonium salt and does not distinguish between the two forms, and PFAS, which means per- and polyfluoroalkyl substances, including PFOA, PFOS (perfluorooctanesulfonic acid), GenX and other perfluorinated chemicals and compounds ("PFCs"). Management believes that it is reasonably possible that EID could incur liabilities related to PFOA in excess of amounts accrued. However, any such losses are not estimable at this time due to various reasons, including, among others, that the underlying matters are in their early stages and have significant factual issues to be resolved.

On January 22, 2021, Chemours, DuPont, Corteva and EID entered into a binding memorandum of understanding containing a settlement to resolve legal disputes related to Chemours' responsibility for litigation and environmental liabilities allocated to it, and to establish a cost sharing arrangement and escrow account to be used to support and manage potential future legacy PFAS liabilities arising out of pre-July 1, 2015 conduct (the "MOU"). See Note 18 - Commitments and Contingent Liabilities, to the Consolidated Financial Statements for further discussion.

ITEM 3. LEGAL PROCEEDINGS, continued

Environmental Proceedings

The company believes it is remote that the following matters will have a material impact on its financial position, liquidity or results of operations. The matters below involve the potential for \$1 million or more in monetary fines and are included per Item 103(3)(c)(iii) of Regulation S-K of the Securities Exchange Act of 1934, as amended.

Related to Corteva's current businesses

La Porte Plant, La Porte, Texas - Crop Protection - Release Incident Investigations

On November 15, 2014, there was a release of methyl mercaptan at EID's La Porte, Texas, facility. The release occurred at the site's crop protection unit resulting in four employee fatalities inside the unit. The Chemical Safety Board ("CSB") issued its final report on June 18, 2019, which included recommendations related to the emergency response program at La Porte. Corteva responded to the CSB on September 30, 2019 outlining the actions it has taken to date to address the recommendations for the site and providing its plan to address the CSB's remaining recommendations. After the conclusion of the CSB investigation, criminal U.S. Environmental Protection Agency ("EPA") and the Department of Justice ("DOJ") investigations related to the incident continued.

On January 8, 2021, EID and the facility's former unit operations leader were indicted by the DOJ on two felony and one misdemeanor charges of violations of the Clean Air Act related to the release. On January 18, 2022, the U.S. District Court of the Southern District of Texas dismissed the felony charge for failing to implement a safety practice. The maximum statutory penalties per charge are \$500,000, or twice the gross gain or loss derived from the incident, as well as up to three years of probation and related ongoing reporting obligations. The company intends to move to dismiss the remaining charges and the trial is currently scheduled for October 2022.

Related to legacy EID businesses unrelated to Corteva's current businesses

Sabine Plant, Orange, Texas - EPA Multimedia Inspection

In June 2012, EID began discussions with the EPA and the DOJ related to a multimedia inspection that the EPA conducted at the Sabine facility in March 2009 and December 2015. The discussions involve the management of materials in the facility's wastewater treatment system, hazardous waste management, flare and air emissions, including leak detection and repair. A final consent decree was approved by the federal court in January 2022, pursuant to which EID agreed to pay a civil penalty of \$3.1 million and attorney's fees to the State of Texas. Under the Separation Agreement, Corteva and DuPont will share liabilities under the decree proportionally on the basis of 29% and 71%, respectively.

Divested Neoprene Facility, La Place, Louisiana - EPA Compliance Inspection

In 2016, the EPA conducted a focused compliance investigation at the Denka Performance Elastomer LLC ("Denka") neoprene manufacturing facility in La Place, Louisiana. EID sold the neoprene business, including this manufacturing facility, to Denka in the fourth quarter of 2015. In the spring of 2017, the EPA, the DOJ, the Louisiana Department of Environmental Quality, EID and Denka began discussions relating to the inspection conclusions and allegations of noncompliance arising under the Clean Air Act, including leak detection and repair. These discussions, which include potential settlement options, continue. Under the Separation Agreement, DuPont is defending and indemnifying the company in this matter.

New Jersey Directive PFAS

On March 25, 2019, the New Jersey Department of Environmental Protection ("NJDEP") issued a Statewide PFAS Directive to several companies, including Chemours, DuPont, and EID. The Directive seeks information relating to the use and environmental release of PFAS and PFAS-replacement chemicals at and from two former EID sites in New Jersey, Chambers Works and Parlin, and a funding source for costs related to the NJDEP's investigation of PFAS issues and PFAS testing and remediation.

New Jersey Directive Pompton Lakes

On March 27, 2019, the NJDEP issued to Chemours and EID a Natural Resource Damages Directive relating to chemical contamination (non-PFAS) at and around EID's former Pompton Lakes facility in New Jersey. The Directive alleges that this contamination has harmed the natural resources of New Jersey. It seeks \$125,000 as reimbursement for the cost of preparing a natural resource damages assessment, which the State will use to determine the extent of such damage and the amount it expects to seek to restore the affected natural resources to their pre-damage state.

Part I

ITEM 3. LEGAL PROCEEDINGS, *continued*

Natural Resource Damage Cases

Since May 2017, several municipal water districts and state attorneys general have filed lawsuits against EID, Corteva, Chemours, 3M, and others, claiming contamination of public water systems by PFCs, including but not limited to PFOA. These actions with the municipalities and states seeking economic impact damages for alleged harm to natural resources, punitive damages, present and future costs to cleanup PFOA contamination and the abatement of alleged nuisance with filtration systems. Further information with respect to these proceedings is set forth under "Other PFOA Matters" in Note 18 - Commitments and Contingent Liabilities, to the Consolidated Financial Statements.

Netherlands Municipality Cases

In April 2021, four municipalities in the Netherlands filed complaints alleging contamination of land and groundwater resulting from the emission of PFOA and GenX by Corteva, DuPont and Chemours. Further information with respect to these proceedings is set forth under "Other PFOA Matters" in Note 18 - Commitments and Contingent Liabilities, to the Consolidated Financial Statements.

Settlement with the State of Delaware

On July 13, 2021, Chemours, DuPont, EID and Corteva entered into a settlement agreement with the State of Delaware reflecting the companies' and the State's agreement to settle and fully resolve claims alleged against the companies regarding their historical Delaware operations, manufacturing, use and disposal of all chemical compounds, including PFAS. Further information with respect to this settlement is set forth under "Other PFOA Matters" in Note 18 - Commitments and Contingent Liabilities, to the Consolidated Financial Statements.

Nebraska Department of Environment and Energy, AltEn Facility

The Environmental Protection Agency ("EPA") and the Nebraska Department of the Environmental and Energy ("NDEE") are pursuing investigations, response and removal actions, litigation and enforcement action related to an ethanol plant located near Mead, Nebraska and owned and operated by AltEn LLC ("AltEn"). The agencies have alleged violations under the Resource Conservation and Recovery Act ("RCRA") and other federal and state laws stemming from AltEn's lack of compliance with the terms and conditions of its operating permits and other regulatory requirements. Corteva is one of six seed companies, who were customers of AltEn, participating in the NDEE's Voluntary Cleanup Program to address certain interim remediation needs at the site.

ITEM 4. MINE SAFETY DISCLOSURES

Part II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Market for Registrant's Common Equity and Related Stockholder Matters

The company's common stock is listed on the New York Stock Exchange, Inc. (symbol: CTVA). The number of record holders of common stock was approximately 76,000 at January 31, 2022.

During 2021 and 2020, the company paid four quarterly dividends on its common stock. See the below table for dividend information for each quarter during 2021 and 2020.

	2021	2020
Fourth Quarter	\$ 0.14	\$ 0.13
Third Quarter	\$ 0.14	\$ 0.13
Second Quarter	\$ 0.13	\$ 0.13
First Quarter	\$ 0.13	\$ 0.13
Total	\$ 0.54	\$ 0.52

See Part III, Item 11. Executive Compensation for information relating to the company's equity compensation plans.

Issuer Purchases of Equity Securities

The following table summarizes information with respect to the company's purchase of its common stock during the three months ended December 31, 2021:

Month	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of the Company's Publicly Announced Share Buyback Program ¹	Approximate Value of Shares that May Yet Be Purchased Under the Program ¹ (Dollars in millions)
October 2021	1,461,297	\$ 42.91	1,461,297	\$ 1,387
November 2021	1,484,410	46.68	1,484,410	1,318
December 2021	1,458,668	46.62	1,458,668	1,250
Fourth quarter 2021	4,404,375	\$ 45.41	4,404,375	\$ 1,250

¹ On August 5, 2021, Corteva, Inc. announced that its Board of Directors authorized a \$1.5 billion share repurchase program to purchase Corteva, Inc.'s common stock, par value \$0.01 per share, without an expiration date. The timing, price and volume of purchases will be based on market conditions, relevant securities laws and other factors.

Part II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES, *continued*

Stock Performance Graph

The following graph illustrates the cumulative total return to Corteva stockholders following the completion of the Separation and beginning as of the closing price of its first NYSE listing date, June 3, 2019. The Chart compares the cumulative total return of Corteva's common stock with the S&P 500 Stock Index and the S&P 500 Chemicals Index.

	6/3/2019	12/31/2019	12/31/2020	12/31/2021
Corteva	\$ 100	\$ 120	\$ 161	\$ 198
S&P 500 Index	100	119	141	181
S&P 500 Chemicals Index	100	112	129	160

The chart depicts a hypothetical \$100 investment in each of the Corteva common stock, the S&P 500 Index and the S&P 500 Chemicals Index as of the closing price on June 3, 2019 and illustrates the value of each investment over time (assuming the reinvestment of dividends) until December 31, 2021.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

CAUTIONARY STATEMENTS ABOUT FORWARD-LOOKING STATEMENTS

This report contains certain estimates and forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended, and Section 27A of the Securities Act of 1933, as amended, which are intended to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995, and may be identified by their use of words like “plans,” “expects,” “will,” “anticipates,” “believes,” “intends,” “projects,” “estimates,” “outlook,” or other words of similar meaning. All statements that address expectations or projections about the future, including statements about Corteva’s financial results or outlook; strategy for growth; product development; regulatory approvals; market position; capital allocation strategy; liquidity; environmental, social and governance (“ESG”) targets; the anticipated benefits of acquisitions, restructuring actions, or cost savings initiatives; and the outcome of contingencies, such as litigation and environmental matters, are forward-looking statements.

Forward-looking statements and other estimates are based on certain assumptions and expectations of future events which may not be accurate or realized. Forward-looking statements and other estimates also involve risks and uncertainties, many of which are beyond Corteva’s control. While the list of factors presented below is considered representative, no such list should be considered to be a complete statement of all potential risks and uncertainties. Unlisted factors may present significant additional obstacles to the realization of forward-looking statements. Consequences of material differences in results as compared with those anticipated in the forward-looking statements could include, among other things, business disruption, operational problems, financial loss, legal liability to third parties and similar risks, any of which could have a material adverse effect on Corteva’s business, results of operations and financial condition. Some of the important factors that could cause Corteva’s actual results to differ materially from those projected in any such forward-looking statements include: (i) failure to successfully develop and commercialize Corteva’s pipeline; (ii) failure to obtain or maintain the necessary regulatory approvals for some of Corteva’s products; (iii) effect of the degree of public understanding and acceptance or perceived public acceptance of Corteva’s biotechnology and other agricultural products; (iv) effect of changes in agricultural and related policies of governments and international organizations; (v) effect of competition and consolidation in Corteva’s industry; (vi) effect of competition from manufacturers of generic products; (vii) costs of complying with evolving regulatory requirements and the effect of actual or alleged violations of environmental laws or permit requirements; (viii) effect of climate change and unpredictable seasonal and weather factors; (ix) failure to comply with competition and antitrust laws; (x) competitor’s establishment of an intermediary platform for distribution of Corteva’s products; (xi) impact of Corteva’s dependence on third parties with respect to certain of its raw materials or licenses and commercialization; (xii) effect of industrial espionage and other disruptions to Corteva’s supply chain, information technology or network systems; (xiii) effect of volatility in Corteva’s input costs; (xiv) failure to raise capital through the capital markets or short-term borrowings on terms acceptable to Corteva; (xv) failure of Corteva’s customers to pay their debts to Corteva, including customer financing programs; (xvi) increases in pension and other post-employment benefit plan funding obligations; (xvii) risks related to environmental litigation and the indemnification obligations of legacy EID liabilities in connection with the separation of Corteva; (xviii) risks related to Corteva’s global operations; (xix) failure to effectively manage acquisitions, divestitures, alliances, restructurings, cost savings initiatives, and other portfolio actions; (xx) capital markets sentiment towards ESG matters; (xxi) risks related to COVID-19; (xxii) Corteva’s ability to recruit and retain key personnel; (xxiii) Corteva’s intellectual property rights or defend against intellectual property claims asserted by others; (xxiv) effect of counterfeit products; (xxv) Corteva’s dependence on intellectual property cross-license agreements; and (xxvi) other risks related to the Separation from DowDuPont.

Additionally, there may be other risks and uncertainties that Corteva is unable to currently identify or that Corteva does not currently expect to have a material impact on its business. Where, in any forward-looking statement or other estimate, an expectation or belief as to future results or events is expressed, such expectation or belief is based on the current plans and expectations of Corteva’s management and expressed in good faith and believed to have a reasonable basis, but there can be no assurance that the expectation or belief will result or be achieved or accomplished. Corteva disclaims and does not undertake any obligation to update or revise any forward-looking statement, except as required by applicable law. A detailed discussion of some of the significant risks and uncertainties which may cause results and events to differ materially from such forward-looking statements is included in the section titled “Risk Factors” (Part I, Item 1A of this Form 10-K).

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, *continued***Overview**

Refer to pages 3 - 5 for a discussion of the DowDuPont Merger, the Internal Reorganizations, and the Business Separations.

Basis of Presentation*Dow AgroSciences ("DAS") Common Control Combination*

The transfer or conveyance of DAS to Corteva was treated as a transfer of entities under common control. As such, the company recorded the assets, liabilities, and equity of DAS on its balance sheet at their historical basis. Transfers of businesses between entities under common control requires the financial statements to be presented as if the transaction had occurred at the point at which common control first existed (the "Merger Effectiveness Time," or August 31, 2017 at 11:59 pm ET). As a result, the accompanying Consolidated Financial Statements and Notes thereto include the results of DAS as of the Merger Effectiveness Time. See Note 1 - Background and Basis of Presentation and Note 4 - Common Control Business Combination, to the Consolidated Financial Statements for additional information.

Divestiture of EID ECP and EID Specialty Products Entities

The transfer of EID ECP and EID Specialty Products Entities meets the criteria for discontinued operations and as such, results of operations are presented as discontinued operations and have been excluded from continuing operations for all periods presented. The comprehensive income (loss), stockholder's equity and cash flows related to EID ECP and EID Specialty Products Entities, respectively, have not been segregated and are included in the Consolidated Statements of Comprehensive Income (Loss), Consolidated Statements of Equity and Consolidated Statements of Cash Flows, respectively, for 2019. Amounts related to EID ECP and EID Specialty Products Entities are consistently included or excluded from the Notes to the Consolidated Financial Statements based on the respective financial statement line item. See Note 5 - Divestitures and Other Transactions, to the Consolidated Financial Statements for additional information.

Items Affecting Comparability of Financial Results

In addition to the Analysis of Operations discussion based on GAAP as reported results, the following includes a supplemental Analysis of Operations discussion reflecting unaudited pro forma financial information, prepared in accordance with Article 11 of Regulation S-X that was in effect prior to recent amendments. This unaudited pro forma financial information, for the year ended December 31, 2019 assumes the Merger, the debt retirement transactions related to paying off or retiring portions of EID's existing debt liabilities (as discussed in Note 17 - Long-Term Debt and Available Credit Facilities, to the Consolidated Financial Statements), and the separation and distribution to DowDuPont stockholders of all the outstanding shares of Corteva common stock as if they had been consummated on January 1, 2016. For additional information, see the Supplemental Unaudited Pro Forma Combined Financial Information in this section.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, *continued***Overview**

The following is a summary of results from continuing operations for the year ended December 31, 2021:

- The company reported net sales of \$15,655 million, an increase of 10 percent versus the year ended December 31, 2020, reflecting a 5 percent increase in volume, a 4 percent increase in price, and a 1 percent favorable impact from currency. Volume and price gains were driven by continued penetration of new products, continued focus on the company's price for value strategy and pricing for higher raw material and logistical costs.
- Cost of goods sold ("COGS") totaled \$9,220 million, up from \$8,507 million for the year ended December 31, 2020, primarily driven by increased volumes, higher input costs, freight and logistics, which are primarily market-driven, and unfavorable currency, partially offset by ongoing cost and productivity actions.
- Restructuring and asset related charges - net were \$289 million, a decrease from \$335 million for the year ended December 31, 2020. The year ended December 31, 2021 primarily included \$167 million related to severance and related benefit costs, asset related charges, and contract termination charges associated with 2021 Restructuring Activities and \$125 million of non-cash accelerated prepaid royalty amortization expense related to Roundup Ready 2 Yield® and Roundup Ready 2 Xtend® herbicide tolerance traits.
- Income from continuing operations after income taxes was \$1,822 million, as compared to \$756 million for the year ended December 31, 2020.
- Operating EBITDA was \$2,576 million, up from \$2,087 million for the year ended December 31, 2020, driven by strong price execution and volume gains in all regions and both segments.

In addition to the financial highlights above, the following events occurred during or subsequent to the year ended December 31, 2021:

- The company returned approximately \$1.3 billion to shareholders during the year ended December 31, 2021 under its previously announced share repurchase programs and through common stock dividends.
- On July 21, 2021, the company's Board of Directors approved an increase in the common stock dividend of \$0.13 per share to \$0.14 per share.

Priorities

The company believes the following priorities will enable it to create significant value for its customers while delivering strong financial returns to its shareholders over the mid-term:

- ***Deliver sales and earnings growth*** by continuing to leverage an industry-leading innovation pipeline to introduce new proprietary seed traits and crop protection formulations that anticipate and meet evolving customer needs and utilizing a comprehensive multi-channel, multi-brand strategy to align brands and capabilities across different sales channels.
- ***Drive actions to expand margins*** through pricing for high value technology and new products and operational excellence, which includes integrating its operations and continuing to drive operating efficiencies and creating a strong culture based on accountability.
- ***Generate cash flow growth reflecting*** operating discipline of working capital, including net working capital turns appropriate across the cycle.
- ***Deploy capital*** in a balanced and disciplined way investing in high return organic and inorganic growth opportunities as well as providing attractive returns to shareholders via dividends and share repurchases.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, *continued***Analysis of Operations*****Global Economic Conditions***

On March 11, 2020, the World Health Organization (“WHO”) declared the novel coronavirus disease (“COVID-19”) a pandemic. The global health crisis caused by COVID-19 and the related government actions and stay at home orders have negatively impacted economic activity and increased political instability across the globe. Since the crisis began, Corteva has engaged its global Integrated Health Services Pandemic & Infectious Disease Team to take actions and implement guidelines and protocols in response to the COVID-19 pandemic.

As COVID-19 becomes more contained, a rebound in economic activity has occurred, although varying regionally depending on government policies and regulations and the rate, pace, and effectiveness of the containment efforts deployed by various national, state, and local governments, vaccination rates, and the ability of COVID-19 variants to overcome containment efforts, available vaccines, and medical treatments. These varying levels of recovery have created a misalignment of supply and demand for labor, transportation and logistic services, energy, raw materials and other inputs, which have been exasperated in certain regions by one-time events, including extreme weather events. Corteva will continue to actively monitor the situation and may take further actions altering its business operations that it determines are in the best interests of its stakeholders, or as required by federal, state, or local authorities. These alterations or modifications may impact the company's business, including the effects on its customers, employees, and prospects, or on its financial results through at least 2022. With the ongoing volatility in global markets, the company will continue to monitor various factors that could impact earnings and cash flows of the business, including, but not limited to the inflation of, or unavailability of raw material inputs and transportation and logistics services, currency fluctuations, expectations of future planted area (as influenced by consumer demand, ethanol markets and government policies and regulations), trade and purchasing of commodities globally and relative commodity prices.

2021 Restructuring Actions

During the first quarter of 2021, Corteva approved restructuring actions designed to right-size and optimize footprint and organizational structure according to the business needs in each region with the focus on driving continued cost improvement and productivity. During the year ended December 31, 2021, the company recorded net pre-tax restructuring charges of approximately \$167 million, comprised of \$74 million of severance and related benefit costs, \$45 million of asset related charges, \$6 million of asset retirement obligations and \$42 million of costs related to contract terminations (contract terminations includes early lease terminations). The company does not anticipate any additional material charges from the 2021 Restructuring Activities as actions associated with this charge are substantially complete.

Future cash payments related to this charge are anticipated to be approximately \$70 million, primarily related to the payment of severance and related benefits, asset retirement obligations, and costs related to contract terminations.

The 2021 Restructuring Actions are expected to contribute to the company's ongoing cost and productivity improvement efforts through achieving an estimated \$70 million of savings on a run rate basis by 2023. See Note 7 - Restructuring and Asset Related Charges - Net, to the Consolidated Financial Statements, for additional information.

Share Buyback Plan

On August 5, 2021, Corteva, Inc. announced that its Board of Directors authorized a \$1.5 billion share repurchase program to purchase Corteva, Inc.'s common stock, par value \$0.01 per share, without an expiration date ("2021 Share Buyback Plan"). The timing, price and volume of purchases will be based on market conditions, relevant securities laws and other factors. In connection with the 2021 Share Buyback Plan, the company repurchased and retired 5,572,000 shares during the year ended December 31, 2021 in the open market for a total cost of \$250 million.

On June 26, 2019, Corteva, Inc. announced that its Board of Directors authorized a \$1 billion share repurchase program to purchase Corteva, Inc.'s common stock, par value \$0.01 per share, without an expiration date ("2019 Share Buyback Plan"). The company completed the 2019 Share Buyback Plan during the third quarter of 2021. In connection with the 2019 Share Buyback Plan, the company repurchased and retired 15,378,000 shares, 8,503,000 shares, and 824,000 shares during the years ended December 31, 2021, 2020, and 2019, respectively, in the open market for a total cost of \$700 million, \$275 million, and \$25 million, respectively.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, *continued*

Execute to Win Productivity Program

During the first quarter of 2020, Corteva approved restructuring actions designed to improve productivity through optimizing certain operational and organizational structures primarily related to the Execute to Win Productivity Program. The company recorded net pre-tax restructuring charges of \$185 million from inception-to-date under the Execute to Win Productivity Program, consisting of \$124 million of asset related charges and \$61 million of severance and related benefit costs. Actions associated with the Execute to Win Productivity Program were substantially complete by the end of 2020.

DowDuPont Cost Synergy Program

In September and November 2017, DowDuPont and EID approved post-merger restructuring actions under the DowDuPont Cost Synergy Program (the "Synergy Program"), adopted at the time by the DowDuPont Board of Directors. The Synergy Program was designed to integrate and optimize the organization following the Merger and in preparation for the Business Separations. The company recorded net pre-tax restructuring charges of \$833 million from inception-to-date under the Synergy Program, consisting of severance and related benefit costs of \$316 million, contract termination costs of \$190 million, and asset-related charges of \$327 million. Actions associated with the Synergy Program, including employee separations, were substantially complete in 2019.

The company included cumulative savings associated with these actions within its cost synergy commitment of approximately \$1.2 billion through 2021. See Note 7 - Restructuring and Asset Related Charges - Net, to the Consolidated Financial Statements, for additional information.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, *continued*

Net Sales

(In millions)	For the Year Ended December 31,		
	2021	2020	2019
Net Sales	\$ 15,655	\$ 14,217	\$ 13,846

2021 versus 2020

Net sales were \$15,655 million for the year ended December 31, 2021, compared to \$14,217 million for the year ended December 31, 2020. Volume increased 5 percent versus the year-ago period with increases in all regions, led by Latin America. The volume increases were primarily driven by strong demand, the continued penetration of new and differentiated products and increased planted area. Price increased 4 percent versus prior year, driven by a continued focus on the company's price for value strategy and pricing for higher raw material and logistical costs.

2020 versus 2019

Net sales were \$14,217 million for the year ended December 31, 2020, compared to \$13,846 million for the year ended December 31, 2019. Volume increased 5 percent versus the year-ago period, primarily driven by sales of new and differentiated products globally and across both segments. Price grew 3 percent on a full-year basis, with higher prices in all regions, led by Latin America partly to offset currency. Currency represented a headwind of 5 percent, led by the impact of the Brazilian Real.

(In millions)	For the Year Ended December 31,					
	2021		2020		2019

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, *continued*

COGS

(In millions)	For the Year Ended December 31,		
	2021	2020	2019
COGS	\$ 9,220	\$ 8,507	\$ 8,575

(In millions)	For the Year Ended December 31, 2019
Pro Forma COGS	\$ 8,386

2021 versus 2020

COGS was \$9,220 million (59 percent of net sales) for the year ended December 31, 2021 compared to \$8,507 million (60 percent of net sales) for the year ended December 31, 2020. The increase was primarily driven by increased volumes in both seed and crop protection, higher input costs, freight and logistics, which are primarily market-driven, and unfavorable currency, partially offset by ongoing cost and productivity actions. The market driven trends are expected to continue as global supply chains and logistics remain constrained across industries.

2020 versus 2019

COGS was \$8,507 million (60 percent of net sales) for the year ended December 31, 2020 compared to \$8,575 million (62 percent of net sales) for the year ended December 31, 2019. The decrease was primarily driven by currency benefits, lack of inventory step-up in 2020 as compared to \$272 million recognized in 2019, and ongoing cost and productivity actions. The decrease was partially offset by increased volumes, higher input costs in both seed and crop protection and higher royalties in seed. Amortization of inventory step-up was 2 percent of net sales for the year ended December 31, 2019.

COGS was \$8,507 million (60 percent of net sales) on an as reported basis for the year ended December 31, 2020 compared to \$8,386 million (61 percent of net sales) on a pro forma basis for the year ended December 31, 2019. The increase was driven by increased volumes, higher input costs in both seed and crop protection and higher royalties in seed, partially offset by the above noted currency benefits and ongoing cost and productivity actions.

Research and Development Expense ("R&D")

(In millions)	For the Year Ended December 31,		
	2021	2020	2019
R&D	\$ 1,187	\$ 1,142	\$ 1,147

2021 versus 2020

R&D expense was \$1,187 million (8 percent of net sales) for the year ended December 31, 2021 and \$1,142 million (8 percent of net sales) for the year ended December 31, 2020. The increase was primarily driven by increases in contract labor, variable compensation and unfavorable currency, partially offset by ongoing cost and productivity actions.

2020 versus 2019

R&D expense was \$1,142 million (8 percent of net sales) for the year ended December 31, 2020 and \$1,147 million (8 percent of net sales) for the year ended December 31, 2019. The decrease was primarily driven by currency benefits and ongoing cost and productivity actions, partially offset by increased investments to support new products in crop protection.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, *continued*

Selling, General and Administrative Expenses ("SG&A")

(In millions)	For the Year Ended December 31,		
	2021	2020	2019
SG&A	\$ 3,209	\$ 3,043	\$ 3,065

(In millions)	For the Year Ended December 31, 2019
Pro Forma SG&A	\$ 3,068

2021 versus 2020

SG&A was \$3,209 million (20 percent of net sales) for the year ended December 31, 2021 and \$3,043 million (21 percent of net sales) for the year ended December 31, 2020. The increase was driven primarily by increases in commission expense, employee related benefit costs, salaries and wages, variable compensation, enterprise resource planning ("ERP") costs and unfavorable currency, partially offset by a decrease in bad debt expense and ongoing cost and productivity actions.

2020 versus 2019

SG&A was \$3,043 million (21 percent of net sales) for the year ended December 31, 2020 and \$3,065 million (22 percent of net sales) for the year ended December 31, 2019. The decrease was primarily driven by currency benefits and ongoing cost and productivity actions taken to curtail spending, partially offset by higher commissions and selling expenses due to higher volumes, higher ERP costs and higher product launch costs.

Amortization of Intangibles

(In millions)	For the Year Ended December 31,		
	2021	2020	2019
Amortization of Intangibles	\$ 722	\$ 682	\$ 475

2021 versus 2020

Intangible asset amortization was \$722 million for the year ended December 31, 2021 and \$682 million for the year ended December 31, 2020. The increase was primarily driven by the full year impact of the trade name asset, which changed from an indefinite lived intangible asset to definite lived with a useful life of 25 years in the fourth quarter of 2020. See Note 15 - Goodwill and Other Intangible Assets, to the Consolidated Financial Statements, for additional information for the above items.

2020 versus 2019

Intangible asset amortization was \$682 million for the year ended December 31, 2020 and \$475 million for the year ended December 31, 2019. The increase was primarily driven by the full year impact of germplasm assets, which changed from an indefinite lived intangible asset to a definite lived with a useful life of 25 years in the fourth quarter of 2019. The remaining increase in amortization expense is primarily due to amortization of the trade name asset that was changed from an indefinite lived intangible asset to definite lived in the fourth quarter of 2020.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, *continued***Restructuring and Asset Related Charges - Net**

(In millions)	For the Year Ended December 31,		
	2021	2020	2019
Restructuring and Asset Related Charges - Net	\$ 289	\$ 335	\$ 222

2021

Restructuring and asset related charges - net were \$289 million for the year ended December 31, 2021, which was primarily comprised of a \$167 million net charge related to the 2021 Restructuring Actions and \$125 million of restructuring and asset related charges - net from non-cash accelerated prepaid royalty amortization expense related to the Roundup Ready 2 Yield® and Roundup Ready 2 Xtend® herbicide tolerance traits. The \$167 million net charge associated with the 2021 Restructuring Actions was comprised of \$74 million of severance and related benefit costs, \$45 million of asset related charges, \$6 million of asset retirement obligations and \$42 million of costs related to contract terminations (contract terminations includes early lease terminations).

2020

Restructuring and asset related charges - net were \$335 million for the year ended December 31, 2020, which was comprised of a \$176 million net charge related to the Execute to Win Productivity Program and \$159 million of restructuring and asset related charges - net from non-cash accelerated prepaid royalty amortization expense related to the Roundup Ready 2 Yield® and Roundup Ready 2 Xtend® herbicide tolerance traits. The \$176 million net charge associated with the Execute to Win Productivity Program was comprised of \$113 million of asset related charges and \$63 million of severance and related benefit costs.

2019

Restructuring and asset related charges - net were \$222 million for the year ended December 31, 2019, which was comprised of \$144 million of asset related charges (discussed in the "Asset Impairment" section, below) and a \$92 million net charge related to the Synergy Program, offset by a net benefit of \$14 million related to the DowDuPont Agriculture Division Restructuring Program. The \$92 million net charge associated with the Synergy Program was comprised of \$69 million of contract termination charges and \$30 million of asset related charges, partially offset by a \$7 million benefit on the reduction of severance and related benefit costs. The \$14 million net benefit associated with the DowDuPont Agriculture Division Restructuring Program included a \$17 million benefit on the reduction of severance and related benefit costs, partially offset by \$3 million of asset related charges.

Asset Impairment

For the year ended December 31, 2019, the company recognized a \$144 million pre-tax (\$110 million after-tax) non-cash impairment charge in restructuring and asset related charges - net in the company's Consolidated Statements of Operations related to certain IPR&D assets within the seed segment. See Note 7 - Restructuring and Asset Related Charges - Net, and Note 23 - Fair Value Measurements, to the Consolidated Financial Statements for additional information.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, *continued***Integration and Separation Costs**

(In millions)	For the Year Ended December 31,		
	2021	2020	2019
Integration and Separation Costs	\$ —	\$ —	\$ 744

(In millions)	For the Year Ended December 31, 2019
Pro Forma Integration and Separation Costs	\$ 632

Integration and separation costs were \$744 million for the year ended December 31, 2019. These costs consisted primarily of financial advisory, information technology, legal, accounting, consulting, and other professional advisory fees associated with the preparation and execution of activities related to the Business Separations and the integration of EID's Pioneer and Crop Protection businesses with DAS. Pro forma integration and separation costs were \$632 million for the year ended December 31, 2019. These costs were primarily driven by financial advisory, information technology, legal, accounting, consulting, and other professional advisory fees associated with the preparation and execution of activities related to the Business Separations and the integration of EID's Pioneer and Crop Protection businesses with DAS.

Other Income - Net

(In millions)	For the Year Ended December 31,		
	2021	2020	2019
Other Income - Net	\$ 1,348	\$ 212	\$ 215

2021 versus 2020

Other income - net was income of \$1,348 million for the year ended December 31, 2021 and income of \$212 million for the year ended December 31, 2020. The increase was primarily driven by an increase in non-operating pension and other post-employment benefit credits, driven by the 2020 OPEB Plan Amendments, a decrease in net exchange losses, and the Employee Retention Credit pursuant to the Coronavirus Aid, Relief, and Economic Security ("CARES") Act as enhanced by the Consolidated Appropriations Act ("CAA") and American Rescue Plan Act ("ARPA"). The increases are partially offset by the 2021 officer indemnification payment and a charge related to a contract termination with a third-party service provider. See Note 9 - Supplementary Information, to the Consolidated Financial Statements for additional information.

2020 versus 2019

Other income - net was income of \$212 million for the year ended December 31, 2020 and income of \$215 million for the year ended December 31, 2019. The increase in non-operating pension and other post-employment benefit credits was offset by higher net exchange losses as well as net losses on sales of businesses and other assets for the year ended December 31, 2020, compared to net gains in 2019 and a change in miscellaneous income. Other income - net for the year ended December 31, 2020 includes a \$(53) million loss on the expected sale of the La Porte site. See Note 9 - Supplementary Information, to the Consolidated Financial Statements for additional information.

The company routinely uses forward exchange contracts to offset its net exposures, by currency denominated monetary assets and liabilities of its operations. The objective of this program is to maintain an approximately balanced position in foreign currencies in order to minimize, on an after-tax basis, the effects of exchange rate changes. The net pre-tax exchange gains and losses are recorded in other income - net and the related tax impact is recorded in provision for (benefit from) income taxes on continuing operations in the Consolidated Statement of Operations. See Note 9 - Supplementary Information, to the Consolidated Financial Statements for additional information.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, *continued*

Interest Expense

(In millions)	For the Year Ended December 31,		
	2021	2020	2019
Interest Expense	\$ 30	\$ 45	\$ 136

(In millions)	For the Year Ended December 31, 2019
Pro Forma Interest Expense	\$ 91

2021 versus 2020

Interest expense was \$30 million and \$45 million for the years ended December 31, 2021 and 2020, respectively. The change was primarily driven by lower average short-term borrowings and lower interest rates, partially offset by higher average long-term borrowings.

2020 versus 2019

Interest expense was \$45 million and \$136 million for the years ended December 31, 2020 and 2019, respectively. The change was primarily driven by lower average debt balances as a result of the redemption/repayment transactions in the second quarter of 2019 related to paying off or retiring portions of EID's existing debt liabilities (refer to Note 17 - Long-Term Debt and Available Credit Facilities, to the Consolidated Financial Statements) and lower average interest rates.

Provision for (Benefit from) Income Taxes on Continuing Operations

(In millions)	For the Year Ended December 31,		
	2021	2020	2019
Provision for (Benefit from) Income Taxes on Continuing Operations	\$ 524	\$ (81)	\$ (46)
Effective Tax Rate	22.3 %	(12.0)%	14.6 %

(In millions)	For the Year Ended December 31, 2019
Pro Forma Provision for (Benefit from) Income Taxes on Continuing Operations	\$ 1
Pro Forma Effective Tax Rate	3.7 %

2021

For the year ended December 31, 2021, the company's effective tax rate of 22.3 percent on pre-tax income from continuing operations of 2,346 million was unfavorably impacted by the tax impact of certain net exchange losses recognized on the re-measurement of the net monetary asset positions which were not deductible in their local jurisdictions, the tax impact of income from pension and other post employment benefits, and a \$23 million charge associated with repatriation of cash held outside of the U.S. These items were partially offset by the impacts of favorable geographic mix of earnings and a \$(57) million benefit related to U.S. tax credits for increasing research activities.

2020

For the year ended December 31, 2020, the company's effective tax rate of (12.0) percent on pre-tax income from continuing operations of \$675 million was favorably impacted by a \$(182) million tax benefit associated with the recognition of an elective cantonal component of the recent enactment of the Federal Act on Tax Reform and AHV Financing ("Swiss Tax Reform"), a \$(51) million tax benefit related to a return to accrual adjustment associated with an elective change in accounting method for the 2019 tax year impact of The Act's foreign tax provisions, a \$(14) million tax benefit related to a return to accrual adjustment to reflect a change in estimate on the impact of a tax law enactment in a foreign jurisdiction, as well as an additional \$(14) million of net tax benefits associated with changes in accruals for certain prior year tax positions in various other jurisdictions. These benefits were partially offset by the impacts of unfavorable geographic mix of earnings, the tax impact of certain net exchange losses recognized on the re-measurement of the net monetary asset positions which were not deductible in their local jurisdictions, and a \$19 million tax charge associated with a state tax valuation allowance in the U.S. based on a change in judgment about the realizability of a deferred tax asset.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, continued**2019**

For the year ended December 31, 2019, the company's effective tax rate of 14.6 percent on pre-tax loss from continuing operations of \$(316) million was unfavorably impacted by a tax charge of \$146 million related to the U.S. state blended tax rate changes associated with the Business Separations and a tax charge of \$35 million related to application of foreign tax provisions. Other net unfavorable effective tax rate impacts included those related to the Argentine peso devaluation, integration and separation costs, non-tax-deductible amortization of the fair value step-up in inventories as a result of the Merger, the tax impact of certain net exchange losses recognized on the re-measurement of the net monetary asset positions which were not deductible in their local jurisdictions, as well as geographic mix of earnings. Those unfavorable impacts were partially offset by a tax benefit of \$(102) million related to an internal legal entity restructuring associated with the Business Separations, tax benefits of \$(38) million associated with the enactment of the Federal Act on Tax Reform and AHV Financing ("Swiss Tax Reform"), a \$(34) million tax benefit associated with the release of a valuation allowance recorded against the net deferred tax asset position of a legal entity in Switzerland, as well as \$(19) million of tax benefits associated with changes in accruals for certain prior year tax positions and reductions in the company's unrecognized tax benefits due to the closure of various tax statutes of limitations.

For the year ended December 31, 2019, the company's effective tax rate was 3.7 percent on pro forma pre-tax income from continuing operations of \$27 million. The pro forma pre-tax income from continuing operations excludes pre-tax charges of \$205 million, \$45 million and \$93 million primarily related to the removal of amortization of the fair value-step-up of inventories as a result of the Merger, removal of interest expense related to paying off or retiring portions of EID's existing debt liabilities (as discussed in Note 17 - Long-Term Debt and Available Credit Facilities, to the Consolidated Financial Statements), and removal of expenses directly attributable to the Separation, respectively. The pro forma provision for income taxes on continuing operations excludes net tax benefits of \$(36) million, \$(10) million and \$(1) million related to the above items, respectively.

(Loss) Income from Discontinued Operations After Tax

(In millions)	For the Year Ended December 31,		
	2021	2020	2019
(Loss) Income from Discontinued Operations After Income Taxes	\$ (53)	\$ (55)	\$ (671)

2021 versus 2020

(Loss) income from discontinued operations after income taxes was \$(53) million for the year ended December 31, 2021 and \$(55) million for the year ended December 31, 2020. The year ended December 31, 2021 primarily reflects charges relating to PFAS environmental remediation activities at the Chemours Fayetteville Works facility and the settlement with the State of Delaware for PFAS related natural resource damage claims. See Note 18 - Commitments and Contingent Liabilities, to the Consolidated Financial Statements, for further discussion. See below for discussion of discontinued operations for the year ended December 31, 2020.

2020 versus 2019

(Loss) income from discontinued operations after income taxes was \$(55) million for the year ended December 31, 2020 and \$(671) million for the year ended December 31, 2019. The year ended December 31, 2020 primarily reflects an after-tax charge of \$(65) million as a result of the MOU, and the settlement of approximately 95 matters, as well as unfilled matters remaining in the Ohio MDL. See Note 18 - Commitments and Contingent Liabilities, to the Consolidated Financial Statements, for further discussion. The year ended December 31, 2019 reflects the financial results recognized for the EID Specialty Entities of \$(859) million, which includes a non-cash goodwill impairment charge of \$(1,102) million and impairment charge relating to equity method investment of \$(63) million, partially offset by changes in accruals for certain prior tax positions relating to the Divested Ag Business of \$80 million, adjustments of certain unrecognized tax benefits for positions taken on items from prior years from previously divested businesses of \$89 million and the financial results recognized for EID ECP of \$19 million.

EID Analysis of Operations

As discussed in Note 1 - Basis of Presentation, to the EID Consolidated Financial Statements, EID is a subsidiary of Corteva, Inc. and continues to be a reporting company, subject to the requirements of the Exchange Act. The below relates to EID only and is presented to provide an Analysis of Operations, only for the differences between EID and Corteva, Inc.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, *continued*

Interest Expense

2021 versus 2020

EID's interest expense was \$80 million for the year ended December 31, 2021 and \$145 million for the year ended December 31, 2020. The change was primarily driven by the items noted on page 42, under the header "Interest Expense – 2021 versus 2020," and by lower interest expense incurred on the related party loan between EID and Corteva, Inc. See Note 2 - Related Party Transactions, to the EID Consolidated Financial Statements for further information.

2020 versus 2019

EID's interest expense was \$145 million for the year ended December 31, 2020 and \$242 million for the year ended December 31, 2019. The change was primarily driven by the items noted on page 42, under the header "Interest Expense - 2020 versus 2019," and by lower interest expense incurred on the related party loan between EID and Corteva, Inc. See Note 2 - Related Party Transactions, to the EID Consolidated Financial Statements for further information.

Provision for (Benefit from) Income Taxes

2021

For the year ended December 31, 2021, EID had an effective tax rate of 22.2 percent on pre-tax income from continuing operations of \$2,296 million, driven by the items noted on page 42, under the header "Provision for Income Taxes - 2021" and a tax benefit related to the interest expense incurred on the related party loan between EID and Corteva, Inc. See Note 3 - Income Taxes, to the EID Consolidated Financial Statements for further information.

2020

For the year ended December 31, 2020, EID had an effective tax rate of (18.3) percent on pre-tax income from continuing operations of \$575 million, driven by the items noted on page 42, under the header "Provision for Income Taxes - 2020" and a tax benefit related to the interest expense incurred on the related party loan between EID and Corteva, Inc. See Note 3 - Income Taxes, to the EID Consolidated Financial Statements for further information.

2019

For the year ended December 31, 2019, EID had an effective tax rate of 16.8 percent on pre-tax loss from continuing operations of \$(422) million, driven by the items noted on page 43, under the header "Provision for Income Taxes - 2019" and a tax benefit related to the interest expense incurred on a related party loan between EID and Corteva, Inc. See Note 3 - Income Taxes, to the EID Consolidated Financial Statements for further information.

Corporate Outlook - 2022

Global demand for agricultural products continues to be strong with an expected record demand for grain and oilseeds. The company anticipates total U.S. corn and soybean planted area to be flat, with a modest shift towards soybeans.

The company expects net sales to be in the range of \$16.7 billion and \$17.0 billion, driven by new product sales and continued focus on the company's price for value strategy, partially offset by currency headwinds.

The company expects Operating EBITDA to be in the range of \$2.8 billion and \$3.0 billion with new product sales, pricing and ongoing cost savings actions offsetting the expected increased input costs. Operating Earnings Per Share is expected to be in the range of \$2.30 and \$2.50 per share. Refer to further discussion of Non-GAAP metrics on pages 52 - 54.

The above outlook does not contemplate any extreme weather events, operational disruptions, significant changes in customers' demand or ability to pay, or further acceleration of currency and inflation impacts resulting from global economic conditions. Corteva is not able to reconcile its forward-looking non-GAAP financial measures to its most comparable U.S. GAAP financial measures, as it is unable to predict with reasonable certainty items outside of the company's control, such as Significant Items, without unreasonable effort (refer to page 53 for Significant Items recorded in the years ended December 31, 2021, 2020 and 2019). However, the company expects non-operating benefits to be approximately \$1 billion lower, as a result of the 2020 OPEB Plan Amendments, an increase in the discount rates, and a change in the expected long-term rate of return on plan assets. Refer to the company's discussion on Long-term Employee Benefits on page 65. Additionally, beginning January 1, 2020, the company recognizes non-cash accelerated prepaid royalty amortization expense as a restructuring and asset related charge. For further discussion of accelerated prepaid royalty amortization refer to the Company's Critical Accounting Estimates for Prepaid Royalties on page 63.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, *continued*

Supplemental Unaudited Pro Forma Financial Information

The supplemental unaudited pro forma statements of operations (the "unaudited pro forma statements of operations") for Corteva for the year ended December 31, 2019 gives effect to the Merger, the debt retirement transactions related to paying off or retiring portions of EID's existing debt liabilities (as discussed in Note 17 - Long-Term Debt and Available Credit Facilities, to the Consolidated Financial Statements), and the separation and distribution to DowDuPont stockholders of all the outstanding shares of Corteva common stock as if they had been consummated on January 1, 2016.

For the periods presented below, Corteva's results for all periods prior to the Business Realignment and Internal Reorganization consist of the combined results of operations for Historical EID and DAS, and Corteva's results for all periods after the Business Realignment and Internal Reorganization represent the consolidated balances of the company. The unaudited pro forma statements of operations below were prepared in accordance with Article 11 of Regulation S-X that was in effect prior to recent amendments, and events that are not expected to have a continuing impact on the combined results (e.g., amortization of inventory step-up costs) are excluded. One-time transaction-related costs incurred prior to, or concurrent with, the closing of the Merger, the debt redemptions/repayments, and the Corteva Distribution are not included in the unaudited pro forma combined statements of operations through March 31, 2019. The unaudited pro forma combined statements of operations do not reflect restructuring or integration activities or other costs, that were not already reflected in GAAP results, following the separation and distribution transactions that may be incurred to achieve cost or growth synergies of Corteva. As no assurance can be made that these costs will be incurred or the growth synergies will be achieved, no adjustment has been made.

The unaudited pro forma statements of operations have been presented for informational purposes only and are not necessarily indicative of what Corteva's results of operations actually would have been had the above transactions been completed on January 1, 2016. In addition, the unaudited pro forma statements of operations do not purport to project the future operating results of the company. The unaudited pro forma statements of operations were based on and should be read in conjunction with the audited Consolidated Financial Statements and Notes contained within this Annual Report on Form 10-K.

1. Represents the removal of amortization of EID's agriculture business' inventory step-up recognized in connection with the Merger, as the incremental amortization is directly attributable to the Merger and will not have a continuing impact.
2. Represents removal of interest expense related to the debt redemptions/repayments.
3. Adjustments directly attributable to the separations and distributions of Corteva, Inc. include the following: removal of Telone® Soil Fumigant business ("Telone®") results (as Telone® did not transfer to Corteva as part of the common control combination of DAS); impact from the distribution agreement entered into between Corteva and Dow that allows for Corteva to become the exclusive distributor of Telone® products for Dow; elimination of one-time transaction costs directly attributable to the Corteva Distribution; the impact of certain manufacturing, leasing and supply agreements entered into in connection with the Corteva Distribution; and the related tax impacts of these items.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, *continued***Recent Accounting Pronouncements**

See Note 3 - Recent Accounting Guidance, to the Consolidated Financial Statements for a description of recent accounting pronouncements.

Segment Reviews

The company operates in two reportable segments: seed and crop protection. The company's seed segment is a global leader in developing and supplying advanced germplasm and traits that produce optimum yield for farms around the world. The segment offers trait technologies that improve resistance to weather, disease, insects and herbicides used to control weeds, and trait technologies that enhance food and nutritional characteristics, and also provides digital solutions that assist farmer decision-making with a view to optimize product selection and, ultimately, help maximize yield and profitability. The segment competes in a wide variety of agricultural markets. The crop protection segment serves the global agricultural input industry with products that protect against weeds, insects and other pests, and disease, and that improve overall crop health both above and below ground via nitrogen management and seed-applied technologies. The segment is a leader in global herbicides, insecticides, nitrogen stabilizers and pasture and range management herbicides.

Summarized below are comments on individual segment net sales and segment operating EBITDA for the years ended December 31, 2021, 2020 and 2019. For the year ended December 31, 2019, segment operating EBITDA is calculated on a pro forma basis, as this is the manner in which the chief operating decision maker ("CODM") assesses performance and allocates resources. Pro forma adjustments used in the calculation of pro forma segment operating EBITDA were determined in accordance with Article 11 of Regulation S-X that was in effect prior to recent amendments. For the year ended December 31, 2019, these adjustments give effect to the Merger, the debt retirement transactions related to paying off or retiring portions of EID's existing debt liabilities (as discussed in Note 17 - Long-Term Debt and Available Credit Facilities, to the Consolidated Financial Statements), and the separation and distribution to DowDuPont stockholders of all the outstanding shares of Corteva common stock as if they had been consummated on January 1, 2016 (refer to supplemental unaudited pro forma financial statements on page 45). The company defines segment operating EBITDA as earnings (loss) (i.e., income (loss) from continuing operations before income taxes) before interest, depreciation, amortization, corporate expenses, non-operating benefits (costs), foreign exchange gains (losses), and net unrealized gain or loss from mark-to-market activity for certain foreign currency derivative instruments that do not qualify for hedge accounting, excluding the impact of significant items. Non-operating benefits (costs) consists of non-operating pension and OPEB benefit (costs), tax indemnification adjustments, environmental remediation and legal costs associated with legacy EID businesses and sites, and the 2021 officer indemnification payment. Tax indemnification adjustments relate to changes in indemnification balances, as a result of the application of the terms of the Tax Matters Agreement, between Corteva and Dow and/or DuPont that are recorded by the company as pre-tax income or expense. See Note 25 - Segment Information, to the Consolidated Financial Statements for details related to significant pre-tax benefits (costs) excluded from segment operating EBITDA. All references to prices are based on local price unless otherwise specified.

A reconciliation of segment operating EBITDA to income (loss) from continuing operations after income taxes for the years ended December 31, 2021, 2020 and 2019 is included in Note 25 - Segment Information, to the Consolidated Financial Statements.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, *continued*

Seed

Seed net sales were \$8,402 million in 2021, up 8 percent from \$7,756 million in 2020. The increase was driven by a 4 percent increase in price and a 4 percent increase in volume. Local price gains were driven by strong adoption of new Seed technology, including price execution in Latin America and EMEA, with corn price up 5 percent globally. These gains were partially offset by competitive pricing pressure in North America soybeans, where price was down 2 percent. The increase in volume was driven by strong demand for corn in Brazil, coupled with higher soybean and corn sales in North America.

Seed operating EBITDA was \$1,512 million in 2021, up 25 percent from \$1,208 million in 2020. Continued price execution, volume gains, ongoing cost and productivity actions, lower royalties, and lower bad debt expense more than offset higher input costs, higher freight and warehousing costs, and higher variable compensation costs.

Seed net sales were \$7,756 million in 2020, up 2 percent from \$7,590 million in 2019. The increase was driven by a 5 percent increase in volume and 1 percent increase in price, partially offset by a 4 percent unfavorable impact from currency. Volume growth was driven by the recovery of soybean planted area in North America and strong summer and Safrinha sales in Brazil. Global corn price grew 2 percent year over year, primarily driven by continued penetration from products such as Qrome[®] and PowerCore ULTRA[™]. North America soybean price increased 2 percent versus the year-ago period due to superior product performance and strong execution. Unfavorable currency impacts were led by the Brazilian Real.

Seed operating EBITDA was \$1,208 million in 2020, up 16 percent from pro forma operating EBITDA of \$1,040 million in 2019. Favorable mix, volume gains and ongoing cost and productivity actions more than offset the unfavorable impact of currency, higher input costs and higher royalties.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, *continued*

Crop Protection

Crop protection net sales were \$7,253 million in 2021, up 12 percent from \$6,461 million in 2020. The increase was due to a 6 percent increase in volume, a 5 percent increase in price and a 2 percent favorable impact from currency, partially offset by a 1 percent unfavorable portfolio impact.

Volume gains were led by continued penetration of new products globally, with combined sales of over \$1.4 billion in 2021, up nearly \$450 million compared to the prior-year period, led by Enlist™ and Arylex™ herbicides and Isoclast™ insecticide. These volume gains were partially offset by an approximate \$275 million impact from the company's decision to phase out select low-margin products.

The increase in price was primarily driven by gains in North America and Latin America, including pricing for higher raw material and logistical costs. Favorable currency impacts were primarily from the Euro. The portfolio impact was driven by a divestiture in Asia Pacific.

Crop protection operating EBITDA was \$1,202 million in 2021, up 20 percent from \$1,004 million from 2020. Pricing execution, continued penetration of new products, ongoing cost and productivity actions, and a favorable impact from currency more than offset higher input costs, including raw material and logistical costs, and higher variable compensation costs.

Crop protection net sales were \$6,461 million in 2020, up from \$6,256 million in 2019. Sales gains were driven by a 7 percent increase in volume and a 4 percent increase in price, which was partially offset by a 7 percent impact from currency and a 1 percent impact from portfolio.

The increase in volume was driven by continued penetration of new products globally, with combined sales of \$1 billion in 2020, up \$265 million compared to the prior-year period, led by Enlist™, Arylex™, and Rinskor™ herbicides and Isoclast™ insecticide. Local price growth was driven by increases in Latin America to offset currency, coupled with favorable mix globally from new product launches. Unfavorable currency impacts were led by the Brazilian Real. The Company has recognized approximately \$150 million in pricing to offset the weakening Brazilian Real for the full year. The portfolio impact was driven by divestitures in Asia Pacific and North America.

Crop Protection operating EBITDA was \$1,004 million in 2020, down from pro forma segment operating EBITDA of \$1,066 million in 2019. Favorable mix, ongoing cost and productivity actions, together with volume gains, were more than offset by the negative impact of currency, increased investment to fund growth and higher input costs. Currency net of pricing was a \$70 million headwind, inclusive of \$150 million in pricing actions.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, *continued***Non-GAAP Financial Measures**

The company presents certain financial measures that do not conform to U.S. GAAP and are considered non-GAAP measures. These measures include Operating EBITDA and operating earnings (loss) per share. Management uses these measures internally for planning and forecasting, including allocating resources and evaluating incentive compensation. Management believes that these non-GAAP measures best reflect the ongoing performance of the company during the periods presented and provide more relevant and meaningful information to investors as they provide insight with respect to ongoing operating results of the company and a more useful comparison of year over year results. These non-GAAP measures supplement the company's U.S. GAAP disclosures and should not be viewed as an alternative to U.S. GAAP measures of performance. Furthermore, such non-GAAP measures may not be consistent with similar measures provided or used by other companies. Reconciliations for these non-GAAP measures to U.S. GAAP are provided below. For the year ended December 31, 2019, information is on a pro forma basis and these non-GAAP measures are being reconciled to a pro forma GAAP financial measure prepared and presented in accordance with Article 11 of Regulation S-X that was in effect prior to recent amendments, which are reconciled to the GAAP reported figures. See Article 11 Pro Forma Combined Statements of Operations on page 46.

Operating EBITDA is defined as earnings (loss) (i.e., income (loss) from continuing operations before income taxes) before interest, depreciation, amortization, non-operating benefits (costs), foreign exchange gains (losses), and net unrealized gain or loss from mark-to-market activity for certain foreign currency derivative instruments that do not qualify for hedge accounting, excluding the impact of significant items. Effective January 1, 2021, on a prospective basis, the company excludes from segment operating EBITDA net unrealized gain or loss from mark-to-market activity for certain foreign currency derivative instruments that do not qualify for hedge accounting. Non-operating benefits (costs) consists of non-operating pension and OPEB benefits (costs), tax indemnification adjustments, environmental remediation and legal costs associated with legacy EID businesses and sites, and the 2021 officer indemnification payment. Tax indemnification adjustments relate to changes in indemnification balances, as a result of the application of the terms of the Tax Matters Agreement, between Corteva and Dow and/or DuPont that are recorded by the company as pre-tax income or expense. Operating earnings (loss) per share is defined as "earnings (loss) per common share from continuing operations - diluted" excluding the after-tax impact of significant items, the after-tax impact of non-operating benefits (costs), the after-tax impact of amortization expense associated with intangible assets existing as of the Separation from DowDuPont, and the after-tax impact of net unrealized gain or loss from mark-to-market activity for certain foreign currency derivative instruments that do not qualify for hedge accounting. Although amortization of the company's intangible assets is excluded from these non-GAAP measures, management believes it is important for investors to understand that such intangible assets contribute to revenue generation. Amortization of intangible assets that relate to past acquisitions will recur in future periods until such intangible assets have been fully amortized. Any future acquisitions may result in amortization of additional intangible assets. Net unrealized gain or loss from mark-to-market activity for certain foreign currency derivative instruments that do not qualify for hedge accounting represents the non-cash net gain (loss) from changes in fair value of certain undesignated foreign currency derivative contracts. Upon settlement, which is within the same calendar year of execution of the contract, the realized gain (loss) from the changes in fair value of the non-qualified foreign currency derivative contracts will be reported in the relevant non-GAAP financial measures, allowing quarterly results to reflect the economic effects of the foreign currency derivative contracts without the resulting unrealized mark to fair value volatility.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, *continued*

Reconciliation of Income (Loss) from Continuing Operations after Income Taxes to Operating EBITDA

(In millions)	Year Ended December 31,		
	2021	2020	2019
	<i>As Reported</i>	<i>As Reported</i>	<i>Pro Forma</i>
Income (loss) from continuing operations after income taxes	\$ 1,822	\$ 756	\$ 26
Provision for (benefit from) income taxes on continuing operations	524	(81)	1
Income (loss) from continuing operations before income taxes	2,346	675	27
Depreciation and amortization	1,243	1,177	1,000
Interest income	(77)	(56)	(59)
Interest expense	30	45	91
Exchange (gains) losses	54	174	66
Non-operating (benefits) costs	(1,256)	(316)	(129)
Mark-to-market (gains) losses on certain foreign currency contracts not designated as hedges ¹	—		
Significant items (benefit) charge	236	388	991
Operating EBITDA (Non-GAAP)	\$ 2,576	\$ 2,087	\$ 1,987

1. Effective January 1, 2021, on a prospective basis, the company excludes net unrealized gains or losses from mark-to-market activity for certain foreign currency derivative instruments that do not qualify for hedge accounting. There were no unrealized mark-to-market (gains) losses for the years ended December 31, 2020 and 2019.

Significant Items

(In millions)	Year Ended December 31,		
	2021	2020	2019
	<i>As Reported</i>	<i>As Reported</i>	<i>Pro Forma</i>
Integration and separation costs	\$ —	\$ —	\$ 632
Restructuring and asset related charges - net	289	335	222
Equity securities mark-to-market gain	(47)	—	—
Loss on divestiture	—	53	24
Amortization of inventory step-up	—	—	67
Argentina currency devaluation	—	—	33
Loss on early extinguishment of debt	—	—	13
Employee Retention Credit	(60)	—	—
Contract termination	54	—	—
Total pretax significant items (benefit) charge	236	388	991
Total tax (benefit) charge impact of significant items ¹	(51)	(86)	(135)
Tax only significant item (benefit) charge ²	(9)	(192)	(72)
Total significant items (benefit) charge, net of tax	\$ 176	\$ 110	\$ 784

^{1.} The tax benefit impact of significant items for the year ended December 31, 2019 includes a net tax charge of \$35 million related to application of foreign tax provisions, a net tax charge of \$146 million related to U.S. state blended tax rate changes associated with the Internal Reorganizations, and a net tax benefit of \$(102) million related to an internal legal entity restructuring associated with the Internal Reorganizations. Unless specifically addressed above, the income tax effect on significant items was calculated based upon the enacted tax laws and statutory income tax rates applicable in the tax jurisdiction(s) of the underlying non-GAAP adjustment.

^{2.} The tax only significant item benefit for the year ended December 31, 2021 reflects a net benefit for the impact of changes in valuation allowances recorded against the net deferred tax asset positions of two legal entities in Brazil of \$(57) million and \$44 million, as well as an adjustment related to the impacts of Swiss Tax Reform of \$4 million. The tax only significant item benefit for the year ended December 31, 2020 reflects the impacts of the recognition of an elective cantonal component of the recent enactment of the Federal Act on Tax Reform and AHV Financing ("Swiss Tax Reform") (\$182) million benefit) and a benefit due to an elective change in accounting method that alters the 2019 impact of the business separation on foreign tax provisions (\$29) million benefit), partially offset by a state tax valuation allowance in the U.S. based on a change in judgment about the realizability of a deferred tax asset (\$19 million charge). The tax only significant item benefit for the year ended December 31, 2019 reflects the impacts of Swiss Tax Reform (\$(38) million

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, *continued*

benefit) and the release of a tax valuation allowance recorded against the net deferred tax asset position of a Swiss legal entity (\$(34) million benefit).

- Effective January 1, 2021, on a prospective basis, the company excludes net unrealized gain or loss from mark-to-market activity for certain foreign currency derivative instruments that do not qualify for hedge accounting. There were no unrealized mark-to-market (gains) losses for the years ended December 31, 2020 and 2019.

Liquidity & Capital Resources

The company continually reviews its sources of liquidity and debt portfolio and occasionally may make adjustments to one or both to ensure adequate liquidity.

(Dollars in millions)	December 31, 2021	December 31, 2020
Cash, cash equivalents and marketable securities	\$ 4,545	\$ 3,795
Total debt	\$ 1,117	\$ 1,105

The company's cash, cash equivalents and marketable securities at December 31, 2021 and December 31, 2020 were \$4.5 billion, and \$3.8 billion respectively. Total debt at December 31, 2021 and 2020 was \$1.1 billion, respectively. See further information under Note 17 - Long-Term Debt and Available Credit Facilities, to the Consolidated Financial Statements.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, continued

The company's credit ratings impact its access to the debt capital markets and cost of capital. The company remains committed to a strong financial position and strong investment-grade rating. The company's long-term and short-term credit ratings assigned to EID are as follows:

	Long-term	Short-term	Outlook
Standard & Poor's ¹	A-	A-2	Stable
Moody's Investors Service	A3	P-2	Stable
Fitch Ratings ¹	A	F1	Stable

1. In addition, Corteva, Inc. has been assigned a long-term issuer credit rating of A- with Stable outlook by Standard & Poor's and an Issuer Default Rating of A with Stable outlook by Fitch Ratings.

The company believes its ability to generate cash from operations and access to capital markets and commercial paper markets will be adequate to meet anticipated cash requirements to fund its operations, including seasonal working capital, capital spending, dividend payments, share repurchases and pension obligations. Corteva's strong financial position, liquidity and credit ratings will provide access as needed to capital markets and commercial paper markets to fund seasonal working capital needs. The company's liquidity needs can be met through a variety of sources, including cash provided by operating activities, commercial paper, syndicated credit lines, bilateral credit lines, long-term debt markets, bank financing and committed receivable repurchase facilities. Corteva considers the borrowing costs and lending terms when selecting the source to fund its operations and working capital needs.

The company had access to approximately \$6.4 billion in committed and uncommitted unused credit lines at December 31, 2021 and 2020, respectively. These facilities provide support to meet the company's short-term liquidity needs and for general corporate purposes which may include funding of discretionary and non-discretionary contributions to certain benefit plans, severance payments, repayment and refinancing of debt, working capital, capital expenditures, repurchases and redemptions of securities and funding Corteva's costs and expenses.

On January 22, 2021, Chemours, DuPont, Corteva and EID entered into a binding memorandum of understanding containing a settlement to resolve legal disputes originating from the Delaware Litigation and Pending Arbitration, and to establish a cost sharing arrangement and escrow account to be used to support and manage potential future legacy per- and polyfluoroalkyl substances ("PFAS") liabilities arising out of pre-July 1, 2015 conduct (the "MOU"). The MOU replaces the 2017 amendment to the Chemours Separation Agreement. According to the terms of the cost sharing arrangement within the MOU, Corteva and DuPont together, on one hand, and Chemours, on the other hand, agreed to a 50-50 split of certain qualified expenses related to PFAS liabilities incurred over a term not to exceed twenty years or \$4 billion of qualified spend and escrow account contributions in the aggregate. DuPont's and Corteva's 50% share under the MOU will be limited to \$2 billion, including qualified expenses and escrow contributions (see below for discussion of escrow contributions). These expenses and escrow account contributions will be subject to the existing Letter Agreement, under which DuPont and Corteva will each bear 50% of the first \$300 million (up to \$150 million each), and thereafter DuPont bears 71% and Corteva bears the remaining 29%.

In order to support and manage any potential future PFAS liabilities, the parties have also agreed to establish an escrow account. The MOU provides that (1) no later than each of September 30, 2021 and September 30, 2022, Chemours shall deposit \$100 million into an escrow account and DuPont and Corteva shall together deposit \$100 million in the aggregate into an escrow account and (2) no later than September 30 of each subsequent year through and including 2028, Chemours shall deposit \$50 million into an escrow account and DuPont and Corteva shall together deposit \$50 million in the aggregate into an escrow account. Subject to the terms and conditions set forth in the MOU, each party may be permitted to defer funding in any year (excluding 2021). Over this period, Chemours will deposit a total of \$500 million in the account and DuPont and Corteva will deposit an additional \$500 million pursuant to the terms of the Letter Agreement. Additionally, if on December 31, 2028, the balance of the escrow account (including interest) is less than \$700 million, Chemours will make 50% of the deposits and DuPont and Corteva together will make 50% of the deposits necessary to restore the balance of the escrow account to \$700 million. Such payments will be made in a series of consecutive annual equal installments commencing on September 30, 2029 pursuant to the escrow account replenishment terms as set forth in the MOU. During 2021, the company contributed its initial deposit into the MOU Escrow Account, which is classified as noncurrent restricted cash equivalents and is included in other assets in the Consolidated Balance Sheets. Refer to Note 18 - Commitments and Contingent Liabilities, to the Consolidated Financial Statements for further details on the MOU and Letter Agreement.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, *continued*

In November 2018, EID entered into a \$3.0 billion five-year revolving credit facility and a \$3.0 billion three-year revolving credit facility (the "Revolving Credit Facilities"). The 2018 Revolving Credit Facilities became effective May 2019. Corteva, Inc. became a party at the time of the Corteva Distribution. In May 2021, the company entered into an amendment that extended the maturity date of the 3-year revolving credit facility from May 2022 to May 2023. Other than the change in maturity date, there were no material modifications to the terms of the credit facility. The Revolving Credit Facilities may serve as a substitute to the company's commercial paper program, and can be used, from time to time, for general corporate purposes including, but not limited to, the funding of seasonal working capital needs. The Revolving Credit Facilities contain customary representations and warranties, affirmative and negative covenants and events of default that are typical for companies with similar credit ratings. The Revolving Credit Facilities also contain a financial covenant requiring that the ratio of total indebtedness to total capitalization for Corteva and its consolidated subsidiaries not exceed 0.60. At December 31, 2021 the company was in compliance with these covenants.

In March 2020, the company drew down \$500 million under the three-year revolving credit facility to finance its short term liquidity needs as a result of the volatility and increased borrowing costs of commercial paper resulting from the unstable market conditions caused by the COVID-19 pandemic, and repaid that borrowing in full in June 2020.

In May 2020, EID issued \$500 million of 1.70 percent Senior Notes due 2025 and \$500 million of 2.30 percent Senior Notes due 2030 (the May 2020 Debt Offering). The proceeds of this offering are intended to be used for general corporate purposes.

The company's indenture covenants include customary limitations on liens, sale and leaseback transactions, and mergers and consolidations affecting manufacturing plants, mineral producing properties or research facilities located in the U.S. and the consolidated subsidiaries owning such plants, properties and facilities subject to certain limitations. The outstanding long-term debt also contains customary default provisions.

The company has meaningful seasonal working capital needs based in part on providing financing to its customers. Working capital is funded through multiple methods including cash, commercial paper, a receivable repurchase facility, the Revolving Credit Facilities, and factoring.

In February 2021, the company entered into a committed receivable repurchase facility of up to \$1 billion (the "2021 Repurchase Facility") which expired in December 2021. Under the 2021 Repurchase Facility, Corteva sold a portfolio of available and eligible outstanding customer notes receivables to participating institutions and simultaneously agreed to repurchase at a future date.

In February 2022, the company entered into a new committed receivable repurchase facility of up to \$500 million (the "2022 Repurchase Facility") which expires in December 2022. See further discussion of the 2022 Repurchase Facility in Note 26 - Subsequent Events, to the Consolidated Financial Statements.

The company has factoring agreements with third-party financial institutions to sell its trade receivables under both recourse and non-recourse agreements in exchange for cash proceeds in an effort to reduce its receivables risk. For arrangements that include an element of recourse, the company provides a guarantee of the trade receivables in the event of customer default. Refer to Note 12 - Accounts and Notes Receivable - Net, to the Consolidated Financial Statements for more information.

The company also organizes agreements with third-party financial institutions who directly provide financing for select customers of its seed and crop protection products in each region. Terms of the third-party loans are less than a year and programs are renewed on an annual basis. In some cases, the company guarantees a portion of the extension of such credit to such customers. Refer to Note 18 - Commitments and Contingent Liabilities, to the Consolidated Financial Statements, for more information on the company's guarantees.

Capacity Expansion

During 2021, the company's Board of Directors authorized a \$113 million increase in the capital investment (approximately \$260 million in total) for the previously announced expansion of Spinosyns fermentation capacity. The 30 percent increase in capacity is staged to come online over the next several years. Higher capital investment is primarily due to updated design requirements impacting materials, labor and engineering costs.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, continued*Debt Redemptions/Repayments*

On March 22, 2019, EID issued notices of redemption in full of all of its outstanding notes (the "Make Whole Notes") listed in the table below:

<i>(in millions)</i>	Amount
4.625% Notes due 2020	\$ 474
3.625% Notes due 2021	296
4.250% Notes due 2021	163
2.800% Notes due 2023	381
6.500% Debentures due 2028	57
5.600% Senior Notes due 2036	42
4.900% Notes due 2041	48
4.150% Notes due 2043	69
Total	\$ 1,530

The Make Whole Notes were redeemed on April 22, 2019 at the make-whole redemption prices set forth in the respective Make Whole Notes. On and after the date of redemption, the Make Whole Notes were no longer deemed outstanding, interest on the Make Whole Notes ceased to accrue and all rights of the holders of the Make Whole Notes were terminated. For further information on the Make Whole Notes, see Note 17 - Long-Term Debt and Available Credit Facilities, to the Consolidated Financial Statements.

In March 2016, EID entered into a credit agreement that provides for a three-year, senior unsecured term loan facility in the aggregate principal amount of \$4.5 billion (as amended, from time to time, the "Term Loan Facility") under which EID could make up to seven term loan borrowings and amounts repaid or prepaid were not available for subsequent borrowings. On May 2, 2019, EID terminated its Term Loan Facility and repaid the aggregate outstanding principal amount of \$3 billion plus accrued and unpaid interest through and including May 1, 2019. For further information on the termination of the Term Loan Facility, see Note 17 - Long-Term Debt and Available Credit Facilities, to the Consolidated Financial Statements.

In connection with the repayment of the Make Whole Notes and the Term Loan Facility, EID paid a total of \$4.6 billion in the second quarter 2019, which included breakage fees and accrued and unpaid interest on the Make Whole Notes and Term Loan Facility. The repayment of the Make Whole Notes and Term Loan Facility was funded with cash from operations and a contribution from DowDuPont.

On May 7, 2019, DowDuPont publicly announced the record date in connection with the Corteva Distribution. In connection with such announcement, EID was required to redeem \$1.25 billion aggregate principal amount of 2.200% Notes due 2020 and \$750 million aggregate principal amount of Floating Rate Notes due 2020 (collectively, the Special Mandatory Redemption or "SMR Notes") setting forth the date of redemption of the SMR Notes. The date of redemption was May 17, 2019 and EID paid a total of \$2.0 billion, which included accrued and unpaid interest on the SMR Notes. The company funded the payment with a contribution from DowDuPont. Following the redemption, the SMR Notes are no longer outstanding and no longer bear interest and all rights of the holders of the SMR Notes have terminated.

The company's cash, cash equivalents and marketable securities at December 31, 2021 and December 31, 2020 are \$4.5 billion and \$3.8 billion, respectively, of which \$2.9 billion and \$3.1 billion at December 31, 2021 and 2020, respectively, was held by subsidiaries in foreign countries, including United States territories. Upon actual repatriation, such earnings could be subject to withholding taxes, foreign and/or U.S. state income taxes, and taxes resulting from the impact of foreign currency movements. The cash held by foreign subsidiaries is generally used to finance the subsidiaries' operational activities and future foreign investments. At December 31, 2021, management believed that sufficient liquidity is available in the U.S. with global operating cash flows, borrowing capacity from existing committed credit facilities, and access to capital markets and commercial paper markets.

Part II

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, continued

	For the Year Ended December 31,		
<i>(Dollars in millions)</i>	2021	2020	2019
Cash provided by (used for) operating activities	\$ 2,727	\$ 2,064	\$ 1,070

Cash provided by (used for) operating activities for the year ended December 31, 2021 was \$2,727 million compared to \$2,064 million for the year ended December 31, 2020. The increase in cash provided by (used for) operating activities was driven by an increase in net income, and improvement in working capital primarily driven by higher customer prepayments and higher accounts payable.

Cash provided by (used for) operating activities for the year ended December 31, 2020 was \$2,064 million compared to \$1,070 million for the year ended December 31, 2019. The increase in cash provided by (used for) operating activities was driven by an increase in net income, including a decrease in integration and separation costs, and improvement in working capital, partially offset by the absence of the net impact of cash earnings from EID ECP and EID Specialty Products entities, as a result of the Internal Reorganizations and Business Realignments in 2019.

	For the Year Ended December 31,		
<i>(Dollars in millions)</i>	2021	2020	2019
Cash provided by (used for) investing activities	\$ (362)	\$ (674)	\$ (904)

Cash provided by (used for) investing activities was \$(362) million for the year ended December 31, 2021 compared to \$(674) million for the year ended December 31, 2020. The change was primarily due to lower purchases of investments and proceeds of marketable securities, partially offset by higher capital expenditures.

Cash provided by (used for) investing activities was \$(674) million for the year ended December 31, 2020 compared to \$(904) million for the year ended December 31, 2019. The change was primarily due to lower capital expenditures driven by the Internal Reorganizations and Business Realignments in 2019, partially offset by higher net purchases of investments and lower proceeds from sales of property, businesses, and consolidated companies.

Capital expenditures totaled \$573 million, \$475 million, and \$1,163 million for the years ended December 31, 2021, 2020 and 2019, respectively. The year ended December 31, 2019 includes capital expenditures of \$497 million, related to the EID Specialty Products and EID ECP (i.e., ethylene copolymers business, excluding its ethylene acrylic elastomers business) Entities. The company expects 2022 capital expenditures to be approximately \$645 million.

	For the Year Ended December 31,		
<i>(Dollars in millions)</i>	2021	2020	2019
Cash provided by (used for) financing activities	\$ (1,266)	\$ 303	\$ (2,929)

Cash provided by (used for) financing activities was \$(1,266) million for the year ended December 31, 2021 compared to \$303 million for the year ended December 31, 2020. The change was primarily due to lower borrowings and higher repurchases of Corteva common stock.

Cash provided by (used for) financing activities was \$303 million for the year ended December 31, 2020 compared to \$(2,929) million for the year ended December 31, 2019. The change was primarily due to lower payments on long-term debt, due to the 2019 debt retirement transactions related to paying off or retiring portions of EID's existing debt liabilities (using a portion of the contributions from DowDuPont), lower net payment on borrowings (less than 90 days), the May 2020 Debt Offering, and the absence of distributions to DowDuPont (which in 2019 were used primarily to fund a portion of DowDuPont's dividend payments). This was partially offset by dividends to Corteva stockholders, repurchases of Corteva common stock and payments for the acquisition of noncontrolling interests. In addition, during the year ended December 31, 2019 there was a transfer of cash to DowDuPont as part of the Internal Reorganizations.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, *continued*

During 2021, the company's Board of Directors authorized and paid quarterly dividends on its common stock of \$0.13, \$0.13, \$0.14, and \$0.14 in the first, second, third and fourth quarters, respectively.

On August 5, 2021, the company's Board of Directors authorized a \$1.5 billion share repurchase program to purchase Corteva, Inc.'s common stock, par value \$0.01 per share, without an expiration date ("2021 Share Buyback Plan"). In connection with the 2021 Share Buyback Plan, the company repurchased and retired 5,572,000 shares during the year ended December 31, 2021 in the open market for a total cost of \$250 million.

On June 26, 2019, the company's Board of Directors authorized a \$1 billion share repurchase program to purchase Corteva, Inc.'s common stock, par value \$0.01 per share, without an expiration date ("2019 Share BuyBack Plan"). The company completed the 2019 Share Buyback Plan during the third quarter of 2021. In connection with the 2019 Share Buyback Plan, the company repurchased and retired 15,378,000 shares, 8,503,000 shares, and 824,000 shares during the years ended December 31, 2021, 2020, and 2019, respectively, in the open market for a total cost of \$700 million, \$275 million, and \$25 million, respectively. See Note 19 - Stockholders' Equity, to the Consolidated Financial Statements, for additional information related to the share buyback plans.

EID Liquidity Discussion

As discussed in Note 1 - Basis of Presentation, to the EID Consolidated Financial Statements, EID is a subsidiary of Corteva, Inc. and continues to be a reporting company, subject to the requirements of the Exchange Act. The below relates to EID only and is presented to provide a Liquidity discussion, only for the differences between EID and Corteva, Inc.

Cash provided by (used for) operating activities

EID's cash provided by (used for) operating activities for the year ended December 31, 2021 was \$2,689 million compared to \$1,986 million for the year ended December 31, 2020. The change was primarily driven by the items noted on page 58, under the header "Cash provided by (used for) operating activities."

EID's cash provided by (used for) operating activities for the year ended December 31, 2020 was \$1,986 million compared to \$996 million for the year ended December 31, 2019. The change was primarily driven by the items noted on page 58, under the header "Cash provided by (used for) operating activities."

Cash provided by (used for) financing activities

EID's cash provided by (used for) financing activities was \$(1,228) million for the year ended December 31, 2021 compared to \$381 million for the year ended December 31, 2020. The change was primarily driven by lower proceeds from issuance of long-term debt partially offset by lower payments on long-term debt on related party debt.

EID's cash provided by (used for) financing activities was \$381 million for the year ended December 31, 2020 compared to \$(2,855) million for the year ended December 31, 2019. The change was due to lower payments on long-term debt due to the 2019 debt retirement transactions related to paying off or retiring portions of EID's existing debt liabilities (using a portion of the contributions from DowDuPont and proceeds from related party debt), lower net payment on borrowings (less than 90 days), the May 2020 Debt Offering, and the absence of distributions to DowDuPont (which in 2019 were used primarily to fund a portion of DowDuPont's dividend payments). This activity was partially offset by lower proceeds from related party debt and higher payments on related party debt, and payments for the acquisition of noncontrolling interests. In addition, during 2019 there was a transfer of cash to DowDuPont as part of the Internal Reorganizations.

See Note 2 - Related Party Transactions, to the EID Consolidated Financial Statements for further information on the related party loan between EID and Corteva, Inc.

Critical Accounting Estimates

The company's significant accounting policies are more fully described in Note 2 - Summary of Significant Accounting Policies, to the Consolidated Financial Statements. Management believes that the application of these policies on a consistent basis enables the company to provide the users of the financial statements with useful and reliable information about the company's operating results and financial condition.

The preparation of the Consolidated Financial Statements in conformity with generally accepted accounting principles ("GAAP") in the United States of America requires management to make estimates and assumptions that affect the reported

Part II

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, *continued*

amounts, including, but not limited to, receivable and inventory valuations, impairment of tangible and intangible assets, long-term employee benefit obligations, income taxes, environmental matters and litigation. Management's estimates are based on historical experience, facts and circumstances available at the time and various other assumptions that are believed to be reasonable. The company reviews these matters and reflects changes in estimates as appropriate. Management believes that the following represent some of the more critical judgment areas in the application of the company's accounting policies which could have a material effect on the company's financial position, liquidity or results of operations.

Pension Plans and Other Post Employment Benefits

Accounting for employee benefit plans involves numerous assumptions and estimates. Discount rate and expected long-term rate of return on plan assets are two critical assumptions in measuring the cost and benefit obligation of the company's pension and OPEB plans. Management reviews these two key assumptions when plans are re-measured. These and other assumptions are updated periodically to reflect the actual experience and expectations on a plan specific basis as appropriate. As permitted by GAAP, actual results that differ from the assumptions are accumulated on a plan by plan basis and to the extent that such differences exceed 10 percent of the greater of the plan's benefit obligation or the applicable plan assets, the excess is amortized over the average remaining service period of active employees or the average remaining life expectancy of plan participants if all or almost all of a plan's participants are inactive.

Substantially all of the company's benefit obligation for pensions and OPEB are attributable to the benefit plans in the U.S. In the U.S., the single equivalent discount rate is developed by matching the expected cash flow of the benefit plans to a yield curve constructed from a portfolio of high quality fixed-income instruments provided by the plans' actuaries as of the measurement date. The company measures the service and interest cost components utilizing a full yield curve approach by applying the specific spot rates along the yield curve used in the determination of the benefit obligation to the relevant projected cash flows. For non-U.S. benefit plans, historically the company utilized prevailing long-term high quality corporate bond indices to determine the discount rate, applicable to each country, at the measurement date. The weighted average discount rates used in developing the 2022 net periodic pension and OPEB costs are expected to be 2.82 percent and 2.59 percent, respectively.

Within the U.S., the company establishes strategic asset allocation percentage targets and appropriate benchmarks for significant asset classes with the aim of achieving a prudent balance between return and risk. Strategic asset allocations in other countries are selected in accordance with the laws and practices of those countries. Where appropriate, asset-liability studies are also taken into consideration. The expected long-term rate of return on plan assets in the U.S. is based upon historical real returns (net of inflation) for the asset classes covered by the investment policy, expected performance, and projections of inflation and interest rates over the long-term period during which benefits are payable to plan participants. In determining the 2021 net periodic pension cost in the U.S., 5.75 percent of expected long-term rate of return on plan assets assumption was used. After re-evaluating the current strategic asset allocation and recent market conditions, the company lowered the expected long-term rate of return on plan assets assumption to 4.50 percent to be used in determining the 2022 net periodic pension cost in the U.S. Consistent with prior years, the expected long-term rate of return on plan assets in the U.S. reflects the asset allocation of the plan and the effect of the company's active management of the plan's assets.

In determining annual expense for the principal U.S. pension plan, the company uses a market-related value of assets rather than its fair value. Accordingly, there may be a lag in recognition of changes in market valuation. As a result, changes in the fair value of assets are not immediately reflected in the company's calculation of net periodic pension cost. For the years ended December 31, 2021 and 2020, the market-related value of assets is calculated by averaging market returns over 36 months, however, as a result of the Merger, the market-related value of assets was calculated by averaging market returns from September 1, 2017 through the year ended December 31, 2019.

The following table shows the market-related value and fair value of plan assets for the principal U.S. pension plan:

<i>(Dollars in billions)</i>	December 31, 2021	December 31, 2020	December 31, 2019
Market-related value of assets	\$ 17.2	\$ 16.3	\$ 16.4
Fair value of plan assets	17.5	17.5	16.6

For plans other than the principal U.S. pension plan, pension expense is determined using the fair value of assets.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, continued

The following table highlights the potential impact on the company's pre-tax earnings due to changes in certain key assumptions with respect to the company's pension and OPEB plans, based on assets and liabilities at December 31, 2021:

Pre-tax Earnings Benefit (Charge)	1/4 Percentage Point Increase	1/4 Percentage Point Decrease
<i>(Dollars in millions)</i>		
Discount rate	\$ (33)	\$ 36
Expected rate of return on plan assets	42	(42)

Additional information with respect to pension and OPEB expenses, liabilities and assumptions is discussed under "Long-term Employee Benefits" beginning on page 65 and in Note 20 - Pension Plans and Other Post Employment Benefits, to the Consolidated Financial Statements.

Environmental Matters

Accruals for environmental matters are recorded when it is probable that a liability has been incurred and the amount of the liability can be reasonably estimated. At December 31, 2021, the company had accrued obligations of \$452 million for probable environmental remediation and restoration costs, including \$68 million for the remediation of Superfund sites. As remediation activities vary substantially in duration and cost from site to site, it is difficult to develop precise estimates of future site remediation costs. The company's estimates are based on a number of factors, including the complexity of the geology, the nature and extent of contamination, the type of remedy, the outcome of discussions with regulatory agencies and other Potentially Responsible Parties ("PRPs") at multi-party sites and the number of and financial viability of other PRPs. Therefore, considerable uncertainty exists with respect to environmental remediation and costs, and, under adverse changes in circumstances, it is reasonably possible that the ultimate cost with respect to these particular matters could range up to \$592 million above that amount. Consequently, it is reasonably possible that environmental remediation and restoration costs in excess of amounts accrued could have a material impact on the company's results of operations, financial condition and cash flows. It is the opinion of the company's management, however, that the possibility is remote that costs in excess of the range disclosed will have a material impact on the company's results of operations, financial condition or cash flows. For further discussion, see Environmental Matters in Management's Discussion and Analysis of Financial Condition and Results of Operations and Note 18 - Commitments and Contingent Liabilities, to the Consolidated Financial Statements.

Legal Contingencies

The company's results of operations could be affected by significant litigation adverse to the company, including product liability claims, patent infringement and antitrust claims, and claims for third-party property damage or personal injury stemming from alleged environmental torts. The company records accruals for legal matters when the information available indicates that it is probable that a liability has been incurred and the amount of the loss can be reasonably estimated. Management makes adjustments to these accruals to reflect the impact and status of negotiations, settlements, rulings, advice of counsel and other information and events that may pertain to a particular matter. Predicting the outcome of claims and lawsuits and estimating related costs and exposure involves substantial uncertainties that could cause actual costs to vary materially from estimates. In making determinations of likely outcomes of litigation matters, management considers many factors. These factors include, but are not limited to, the nature of specific claims including unasserted claims, the company's experience with similar types of claims, the jurisdiction in which the matter is filed, input from outside legal counsel, the likelihood of resolving the matter through alternative dispute resolution mechanisms, and the matter's current status. Considerable judgment is required in determining whether to establish a litigation accrual when an adverse judgment is rendered against the company in a court proceeding. In such situations, the company will not recognize a loss if, based upon a thorough review of all relevant facts and information, management believes that it is probable that the pending judgment will be successfully overturned on appeal. A detailed discussion of significant litigation matters is contained in Note 18 - Commitments and Contingent Liabilities, to the Consolidated Financial Statements.

Indemnification Assets

The company has entered into various agreements where the company is indemnified for certain liabilities by DuPont, Dow, and Chemours. The term of this indemnification is generally indefinite and includes defense costs and expenses, as well as monetary and non-monetary settlements and judgments. In connection with the recognition of liabilities related to these matters, the company records an indemnification asset when recovery is deemed probable. In assessing the probability of recovery, the company considers the contractual rights under the separation agreements and any potential credit risk. Future events, such as potential disputes related to recovery as well as the solvency of DuPont, Dow, and / or Chemours, could cause the indemnification assets to have a lower value than anticipated and recorded. The company evaluates the recovery of the

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, *continued*

indemnification assets recorded when events or changes in circumstances indicate the carrying values may not be fully recoverable. See Note 5 - Divestitures and Other Transactions and Note 18 - Commitments and Contingent Liabilities, to the Consolidated Financial Statements, for additional information related to indemnifications.

Income Taxes

The breadth of the company's operations and the global complexity of tax regulations require assessments of uncertainties and judgments in estimating taxes the company will ultimately pay. The final taxes paid are dependent upon many factors, including negotiations with taxing authorities in various jurisdictions, outcomes of tax litigation and resolution of disputes arising from federal, state and international tax audits in the normal course of business. The resolution of these uncertainties may result in adjustments to the company's tax assets and tax liabilities. It is reasonably possible that changes to the company's global unrecognized tax benefits could be significant; however, due to the uncertainty regarding the timing of completion of audits and possible outcomes, a current estimate of the range of increases or decreases that may occur within the next twelve months cannot be made.

Deferred income taxes result from differences between the financial and tax basis of the company's assets and liabilities and are adjusted for changes in tax rates and tax laws when changes are enacted. Valuation allowances are recorded to reduce deferred tax assets when it is more likely than not that a tax benefit will not be realized. Significant judgment is required in evaluating the need for and magnitude of appropriate valuation allowances against deferred tax assets. The realization of these assets is dependent on generating future taxable income, as well as successful implementation of various tax planning strategies. For example, changes in facts and circumstances that alter the probability that the company will realize deferred tax assets could result in recording a valuation allowance, thereby reducing the deferred tax asset and generating a deferred tax expense in the relevant period. In some situations, these changes could be material. See Note 10 - Income Taxes, to the Consolidated Financial Statements for additional information.

At December 31, 2021, the company had a net deferred tax liability balance of \$782 million, inclusive of a valuation allowance of \$366 million. Realization of deferred tax assets is expected to occur over an extended period of time. As a result, changes in tax laws, assumptions with respect to future taxable income, and tax planning strategies could result in adjustments to deferred tax assets. See Note 10 - Income Taxes, to the Consolidated Financial Statements for additional details related to the deferred tax liability balance.

Valuation of Assets and Impairment Considerations

The assets and liabilities of acquired businesses are measured at their estimated fair values at the dates of acquisition. The excess of the purchase price over the estimated fair value of the net assets acquired, including identified intangibles, is recorded as goodwill. The determination and allocation of fair value to the assets acquired and liabilities assumed is based on various assumptions and valuation methodologies requiring considerable management judgment, including estimates based on historical information, current market data and future expectations. The principal assumptions utilized in the company's valuation methodologies include revenue growth rates, operating margin estimates, royalty rates, and discount rates. Although the estimates are deemed reasonable by management based on information available at the dates of acquisition, those estimates are inherently uncertain.

Assessment of the potential impairment of goodwill, other intangible assets, property, plant and equipment, investments in nonconsolidated affiliates, and other assets is an integral part of the company's normal ongoing review of operations. Testing for potential impairment of these assets is significantly dependent on numerous assumptions and reflects management's best estimates at a particular point in time. The dynamic economic environment in which the company's segments operate, and key economic and business assumptions with respect to projected selling prices, market growth and inflation rates, can significantly affect the outcome of impairment tests. Estimates based on these assumptions may differ significantly from actual results. Changes in factors and assumptions used in assessing potential impairments can have a significant impact on the existence and magnitude of impairments, as well as the time in which such impairments are recognized. In addition, the company continually reviews its portfolio of assets to ensure they are achieving their greatest potential and are aligned with the company's growth strategy. Strategic decisions involving a particular group of assets may trigger an assessment of the recoverability of the related assets. Such an assessment could result in impairment losses.

The company performs its annual goodwill impairment assessment during the fourth quarter at the reporting unit level which is defined as the operating segment or one level below the operating segment. One level below the operating segment, or component, is a business in which discrete financial information is available and regularly reviewed by segment management.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, *continued*

The company aggregates certain components into reporting units based on economic similarities. The company's reporting units include seed, crop protection and digital.

For purposes of the annual goodwill impairment test, the company has the option to first perform qualitative testing to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value. Qualitative factors assessed at the company level include, but are not limited to, GDP growth rates, long-term commodity prices, equity and credit market activity, discount rates, foreign exchange rates, and overall financial performance. Qualitative factors assessed at the reporting unit level include, but are not limited to, changes in industry and market structure, competitive environments, planned capacity and new product launches, cost factors such as raw material prices, and financial performance of the reporting unit. If the company chooses not to complete a qualitative assessment for a given reporting unit or if the initial assessment indicates that it is more likely than not that the carrying value of a reporting unit exceeds its estimated fair value, additional quantitative testing is required.

If additional quantitative testing is required, the reporting unit's fair value is compared with its carrying amount, and an impairment charge, if any, is recognized for the amount by which the carrying amount exceeds the reporting unit's fair value, limited to the amount of goodwill associated with the reporting unit. The company determines fair values for each of the reporting units using a discounted cash flow model (a form of the income approach), utilizing Level 3 unobservable inputs, or the market approach.

Under the income approach, fair value is determined based on the present value of estimated future cash flows, discounted at an appropriate risk-adjusted rate. The company's significant assumptions in these analyses include future cash flow projections, weighted average cost of capital, the terminal growth rate and the tax rate. The company's estimates of future cash flows are based on current regulatory and economic climates, recent operating results, and planned business strategy and includes an estimate of long-term future growth rates based on its most recent views of the long-term outlook for each reporting unit. Actual results may differ from those assumed in the company's forecasts. The company derives its discount rates using a capital asset pricing model and analyzes published rates for industries relevant to its reporting units to estimate the cost of equity financing. The company uses discount rates that are commensurate with the risks and uncertainty inherent in the respective reporting units and in its internally developed forecasts. Discount rates used in the company's valuations ranged from 9.25 percent to 16.5 percent. Under the market approach, the company uses metrics of publicly traded companies or historically completed transactions for comparable companies.

Estimating the fair value of reporting units requires the use of estimates and significant judgments that are based on a number of factors including actual operating results. It is reasonably possible that the judgments and estimates described above could change in future periods. The company believes the current assumptions and estimates utilized are both reasonable and appropriate. Based on the goodwill impairment analyses performed in the fourth quarter 2021, the company concluded the fair value of each of the reporting units exceeded their respective carrying values by more than 20 percent, and no goodwill impairment charge was necessary.

Prepaid Royalties

The company's seed segment currently has certain third-party biotechnology trait license agreements, which require up-front and variable payments subject to the licensor meeting certain conditions. These payments are reflected as other current assets and other assets and are amortized to cost of goods sold as seeds containing the respective trait technology are utilized over the term of the license. The rate of royalty amortization expense recognized is based on the company's strategic plans which include various assumptions and estimates including product portfolio, market dynamics, farmer preferences, growth rates and projected planted acres. Changes in factors and assumptions included in the strategic plans, including potential changes to the product portfolio in favor of internally developed biotechnology, could impact the rate of recognition of the relevant prepaid royalty.

At December 31, 2021, the balance of prepaid royalties reflected in other current assets and other assets was \$303 million and \$256 million, respectively. The majority of the balance of prepaid royalties relates to the company's wholly owned subsidiary, Pioneer Hi-Bred International, Inc.'s ("Pioneer") non-exclusive license in the United States and Canada for the Monsanto Company's Genuity® Roundup Ready 2 Yield® glyphosate tolerance trait and Roundup Ready 2 Xtend® glyphosate and dicamba tolerance trait for soybeans ("Roundup Ready 2 License Agreement"). The prepaid royalty asset relates to a series of up-front, fixed and variable royalty payments to utilize the traits in Pioneer's soybean product mix. The company's historical expectation has been that the technology licensed under the Roundup Ready 2 License Agreement would be used as the primary herbicide tolerance trait platform in the Pioneer® brand soybean through the term of the agreement. DAS and MS Technologies,

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, continued

L.L.C. jointly developed and own the Enlist E3™ herbicide tolerance trait for soybeans which provides tolerance to 2, 4-D choline in Enlist Duo® and Enlist One® herbicides, as well as glyphosate and glufosinate herbicides. In connection with the validation of breeding plans and large-scale product development timelines, during the fourth quarter of 2019, the company accelerated the ramp up of the Enlist E3™ trait platform in the company's soybean portfolio mix across all brands, including Pioneer® brands, over the subsequent five years. During the ramp-up period, the company is expected to significantly reduce the volume of products with the Roundup Ready 2 Yield® and Roundup Ready 2 Xtend® herbicide tolerance traits beginning in 2021, with expected minimal use of the trait platform thereafter for the remainder of the Roundup Ready 2 License Agreement (the "Transition Plan"). The rate of royalty expense is therefore expected to significantly increase through higher amortization of the prepaid royalty as fewer seeds containing the respective trait are expected to be utilized.

In connection with the departure from these traits in the company's product portfolio, beginning January 1, 2020 the company presents and discloses the accelerated prepaid royalty amortization expense as a component of restructuring and asset related charges - net in the Consolidated Statement of Operations. The accelerated prepaid royalty amortization expense represents the difference between the rate of amortization based on the revised number of units expected to contain the Roundup Ready 2 Yield® and Roundup Ready 2 Xtend® trait technology and the per unit cash rate per the Roundup Ready 2 License Agreement. For the year ended December 31, 2021, the company recognized \$125 million in restructuring and asset related charges - net in the Consolidated Statement of Operations from non-cash accelerated prepaid royalty amortization expense. The expected non-cash accelerated prepaid royalty amortization expense estimated for 2022 is approximately \$102 million, aggregating to approximately \$235 million over the next 3 years.

Further changes in factors and assumptions associated with usage of the trait platform licensed under the Roundup Ready 2 License Agreement, including the Transition Plan, could further impact the rate of recognition of the prepaid royalty and statement of operations presentation of the accelerated prepaid royalty amortization expense.

Off-Balance Sheet Arrangements*Certain Guarantee Contracts*

Information with respect to the company's guarantees is included in Note 18 - Commitments and Contingent Liabilities, to the Consolidated Financial Statements. Historically, the company has not made significant payments to satisfy guarantee obligations; however, the company believes it has the financial resources to satisfy these guarantees.

Contractual Obligations

Our principal commitments consist of long-term debt, operating and finance lease obligations and environmental remediation obligations. Refer to further discussion on long-term debt and operating and finance lease obligations in Note 17 - Long-Term Debt and Available Credit Facilities and Note 16 - Leases, to the Consolidated Financial Statements, respectively. Refer to discussion on environmental remediation obligations on page 68 of this report.

Information related to the company's other significant contractual obligations are summarized in the following table:

	Total at December 31, 2021	Payments Due In	
		2022	2023 and beyond
<i>(Dollars in millions)</i>			
Expected cumulative cash requirements for interest payments through maturity	\$ 138	\$ 20	\$ 118
Purchase obligations ¹	1,363	741	622
License agreements ^{2, 3}	307	121	186
Other liabilities ^{2, 4}	285	53	232
Total ⁵	\$ 2,093	\$ 935	\$ 1,158

1. Represents enforceable and legally binding agreements in excess of \$1 million to purchase goods or services that specify fixed or minimum quantities; fixed, minimum or variable price provisions; and the approximate timing of the agreement.
2. Included in the Consolidated Financial Statements.
3. Represents undiscounted remaining payments under Pioneer license agreements (\$305 million on a discounted basis).
4. Includes liabilities related to employee-related benefits other than pension and other post employment benefits, asset retirement obligations and other noncurrent liabilities.
5. Due to uncertainty regarding the completion of tax audits and possible outcomes, the timing of certain payments of obligations related to unrecognized tax benefits cannot be made and have been excluded from the table above. See Note 10 - Income Taxes, to the Consolidated Financial Statements for additional detail.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, *continued*

The company expects to meet its contractual obligations through its normal sources of liquidity and believes it has the financial resources to satisfy the contractual obligations that arise in the ordinary course of business.

Long-term Employee Benefits

The company has various obligations to its employees and retirees. The company maintains retirement-related programs in many countries that have a long-term impact on the company's earnings and cash flows. These plans are typically defined benefit pension plans, as well as medical, dental and life insurance benefits for pensioners and survivors and disability benefits for employees ("other post employment benefits" or "OPEB"). Substantially all of the company's worldwide benefit obligation for pensions and essentially all of the company's worldwide OPEB obligations are attributable to the U.S. benefit plans.

Pension coverage for employees of the company's non-U.S. consolidated subsidiaries is provided, to the extent deemed appropriate, through separate plans. The company regularly explores alternative solutions to meet its global pension obligations in the most cost effective manner possible as demographics, life expectancy and country-specific pension funding rules change. Where permitted by applicable law, the company reserves the right to change, modify or discontinue its plans that provide pension, medical, dental, life insurance and disability benefits.

Benefits under defined benefit pension plans are based primarily on years of service and employees' pay near retirement. In November 2016, the company announced changes to the U.S. pension and OPEB plans. The company froze the pay and service amounts used to calculate pension benefits for active employees who participate in the U.S. pension plans on November 30, 2018, resulting in the participants no longer accruing additional benefits. In addition to the changes to the U.S. pension plans, OPEB eligible employees who were under the age of 50 as of November 30, 2018 will not receive post-retirement medical, dental and life insurance benefits. The majority of employees hired in the U.S. on or after January 1, 2007 are not eligible to participate in the pension and post-retirement medical, dental and life insurance plans, but receive benefits in the defined contribution plans.

In September 2021, the company transferred approximately \$250 million of certain benefit obligations and related assets associated with the principal U.S. pension plan to an insurance company through the purchase of nonparticipating group annuity contracts. The company may consider additional annuity purchases in the future.

In December 2020, the company amended its retiree medical, dental and life insurance plans resulting in the company no longer providing retiree dental and life insurance benefits effective January 1, 2022 and Corteva's portion of the cost of non-Medicare retiree medical coverage no longer being adjusted for cost increases, which capped the Corteva cost at the level as of December 31, 2021 ("2020 OPEB Plan Amendments"). As a result of these changes, the company recorded a \$(939) million decrease in OPEB benefit obligations as of December 31, 2020 with a corresponding prior service benefit within other comprehensive income (loss) for the year ended December 31, 2020. During 2021, a substantial amount of the prior service benefit within other comprehensive income (loss) in 2020 was recognized in other income - net in the Consolidated Statement of Operations.

Pension benefits are paid primarily from trust funds established to comply with applicable laws and regulations. The actuarial assumptions and procedures utilized are reviewed periodically by the plans' actuaries to provide reasonable assurance that there will be adequate funds for the payment of benefits. The company did not make contributions to the principal U.S. pension plan for the years ended December 31, 2021, 2020 or 2019.

Funding for each pension plan other than the principal U.S. pension plan is governed by the rules of the sovereign country in which it operates. Thus, there is not necessarily a direct correlation between pension funding and pension expense. In general, however, improvements in plans' funded status tends to moderate subsequent funding needs. The company contributed \$8 million, \$9 million, and \$39 million to its funded pension plans other than the principal U.S. pension plan for the years ended December 31, 2021, 2020 and 2019, respectively.

U.S. pension benefits that exceed federal limitations are covered by separate unfunded plans and these benefits are paid to pensioners and survivors from operating cash flows. The company's remaining pension plans with no plan assets are paid from operating cash flows. The company made benefit payments of \$41 million, \$53 million, and \$82 million to its unfunded plans for the years ended December 31, 2021, 2020 and 2019, respectively.

The company's OPEB plans are unfunded and the cost of the approved claims is paid from operating cash flows. Pre-tax cash requirements to cover actual net claims costs and related administrative expenses were \$198 million, \$207 million, and \$202 million for the years ended December 31, 2021, 2020 and 2019, respectively. Changes in cash requirements reflect the net

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, continued

impact of per capita health care cost, demographic changes, plan amendments and changes in participant premiums, co-pays and deductibles.

In 2022, the company expects to contribute approximately \$60 million to its pension plans other than the principal U.S. pension plan and approximately \$140 million to its OPEB plans. The company does not anticipate making contributions to its principal U.S. pension plan in 2022.

The company's income can be significantly affected by pension and defined contribution benefits as well as OPEB costs. The following table summarizes the extent to which the company's income (loss) from continuing operations before income taxes for the years ended December 31, 2021, 2020 and 2019 was affected by pre-tax charges related to long-term employee benefits:

(Dollars in millions)	For the Year Ended December 31,		
	2021	2020	2019
Net periodic benefit (credit) cost - pension and OPEB	\$ (1,292)	\$ (340)	\$ (163)
Defined contributions ¹	125	127	115
Long-term employee benefit plan (credit) charges - continuing operations	\$ (1,167)	\$ (213)	\$ (48)

1. The year ended December 31, 2021 includes a charge of \$33 million for the company contributions to be paid in 2022, which was included in accrued and other current liabilities in the Consolidated Balance Sheet.

The above (credit) charges for pension and OPEB are determined as of the beginning of each period. Long-term employee benefit plan credits were \$(1,167) million and \$(213) million for the years ended December 31, 2021 and 2020, respectively. The change is due to the 2020 OPEB Plan Amendments and lower discount rates. See "Pension Plans and Other Post Employment Benefits" under the Critical Accounting Estimates section beginning on page 60 of this report for additional information on determining annual expense.

For 2022, long-term employee benefits credit is expected to decrease by about \$1 billion. The decrease is mainly due to the 2020 OPEB Plan Amendments, an increase in the discount rates, and a change in the expected long-term rate of return on plan assets from 5.75 percent to 4.50 percent.

Environmental Matters

The company operates global manufacturing, product handling and distribution facilities that are subject to a broad array of environmental laws and regulations. Such rules are subject to change by the implementing governmental agency, and the company monitors these changes closely. Company policy requires that all operations fully meet or exceed legal and regulatory requirements. In addition, the company implements voluntary programs to reduce air emissions, minimize the generation of hazardous waste, decrease the volume of water use and discharges, increase the efficiency of energy use and reduce the generation of persistent, bioaccumulative and toxic materials. Management has noted a global upward trend in the amount and complexity of proposed chemicals regulation. The costs to comply with complex environmental laws and regulations, as well as internal voluntary programs and goals, are significant and will continue to be significant for the foreseeable future.

Pre-tax environmental expenses charged to income (loss) from continuing operations before income taxes are summarized below:

(Dollars in millions)	For the Year Ended December 31,		
	2021	2020	2019
Environmental operating costs	\$ 144	\$ 138	\$ 136
Environmental remediation costs ¹	46	63	29
	\$ 190	\$ 201	\$ 165

- ¹ Environmental remediation costs include costs that are subject to the \$200 million threshold and sharing arrangements as discussed in Note 18 - Commitments and Contingent Liabilities, to the Consolidated Financial Statements, under the header Corteva Separation Agreement.

Environmental Operating Costs

As a result of its operations, the company incurs costs for pollution abatement activities including waste collection and disposal, installation and maintenance of air pollution controls and wastewater treatment, emissions testing and monitoring, and obtaining permits. The company also incurs costs related to environmental related research and development activities including

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, continued

environmental field and treatment studies as well as toxicity and degradation testing to evaluate the environmental impact of products and raw materials.

About 85 percent of total pre-tax environmental operating costs charged to income (loss) from continuing operations for the year ended December 31, 2021 resulted from operations in the U.S. Based on existing facts and circumstances, management does not believe that year-over-year changes, if any, in environmental operating costs charged to current operations will have a material impact on the company's financial position, liquidity or results of operations. Annual expenditures in the near term are not expected to vary significantly from the range of such expenditures experienced in the past few years. Longer term, expenditures are subject to considerable uncertainty and may fluctuate significantly.

Remediation Accrual

Changes in the remediation accrual balance are summarized below:

<i>(Dollars in millions)</i>	
Balance at December 31, 2019	\$ 336
Remediation payments	(57)
Net increase in remediation accrual ¹	63
Net change, indemnification ²	(13)
Balance at December 31, 2020	\$ 329
Remediation payments	(35)
Net increase in remediation accrual ¹	46
Net change, indemnification ²	112
Balance at December 31, 2021	\$ 452

1. Excludes indemnified remediation obligations.

2. Represents the net change in indemnified remediation obligations based on activity as well as the removal from EID's accrued remediation liabilities of obligations that have been fully transferred to Chemours and DuPont. Pursuant to the Chemours Separation Agreement and subsequent MOU, and the Corteva Separation Agreement, as discussed in Note 5 - Divestitures and Other Transactions, and Note 18 - Commitments and Contingent Liabilities, to the Consolidated Financial Statements, EID is indemnified by Chemours and DuPont for certain environmental matters.

Considerable uncertainty exists with respect to environmental remediation costs and, under adverse changes in circumstances, the potential liability may range up to \$592 million above the amount accrued as of December 31, 2021. However, based on existing facts and circumstances, management does not believe that any loss, in excess of amounts accrued, related to remediation activities at any individual site will have a material impact on the financial position, liquidity or results of operations of the company.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, continued

The above noted \$452 million accrued obligations includes the following:

(In millions)	As of December 31, 2021		
	Indemnification Asset	Accrual balance ^{3,5}	Potential exposure above amount accrued ³
Environmental Remediation Stray Liabilities			
Chemours related obligations - subject to indemnity ^{1,2}	\$ 159	\$ 159	\$ 262
Other discontinued or divested businesses obligations ¹	15	75	187
Environmental remediation liabilities primarily related to DuPont - subject to indemnity from DuPont ²	37	37	66
Environmental remediation liabilities not subject to indemnity	—	82	49
Indemnification liabilities related to the MOU ⁴	9	99	28
Total	\$ 220	\$ 452	\$ 592

1. Represents liabilities that are subject to the \$200 million threshold and sharing arrangements as discussed in Note 18 - Commitments and Contingent Liabilities, to the Consolidated Financial Statements, under the header "Corteva Separation Agreement."
2. The company has recorded an indemnification asset related to these accruals, including \$40 million related to the Superfund sites.
3. Accrual balance represents management's best estimate of the costs of remediation and restoration, although it is reasonably possible that the potential exposure, as indicated, could range above the amounts accrued, as there are inherent uncertainties in these estimates. Accrual balance includes \$68 million for remediation of Superfund sites. Amounts do not include possible impacts from the remediation elements of the EPAs October 2021 PFAS Strategic Roadmap (as applicable) or possible revisions to Chemours' Consent Order with the North Carolina Department of Environmental Quality, as any possible impacts, to the extent such items would be reimbursable under the MOU, are not yet determinable.
4. Represents liabilities that are subject to the \$150 million threshold and sharing agreements as discussed in Note 18 - Commitments and Contingent Liabilities, to the Consolidated Financial Statements, under the header "Chemours/ Performance Chemicals."
5. Included accrued obligations of \$133 million due in the next twelve months with the remainder being due subsequent to 2022.

As of December 31, 2021, the company has been notified of potential liability under the Comprehensive Environmental Response, Compensation and Liability Act ("Superfund") or similar state laws at about 500 sites around the U.S., including approximately 130 sites for which the company does not believe it has liability based on current information. Active remediation is under way at approximately 70 of the 500 sites. In addition, the company has resolved its liability at approximately 210 sites, either by completing remedial actions with other PRPs or by participating in "de minimis buyouts" with other PRPs whose waste, like the company's, represented only a small fraction of the total waste present at a site. There were no new notices in 2021 or 2020.

Environmental Capital Expenditures

Capital expenditures for environmental projects, either required by law or necessary to meet the company's internal environmental goals, were approximately \$9 million for the year ended December 31, 2021. The company currently estimates expenditures for environmental-related capital projects to be approximately \$9 million in 2022.

Climate Change

The company believes that climate change is an important global environmental concern that presents risks and opportunities. The Board of Directors maintains oversight of these risks and opportunities. Management regularly assesses and manages climate-related issues. Across its business, individuals who are responsible for climate-related initiatives may have annual performance goals tied to the delivery of projects related to these initiatives.

Continuing political and social attention to climate change and its impacts has resulted in regulatory and market-based approaches to limit greenhouse gas emissions. The company believes there is a way forward for sustainable climate change mitigation that both enables farmers to meet the demands of a growing population and secures the economic future for the vast majority of the world's population who depend on agriculture for their livelihoods.

Extreme and volatile weather due to climate change may have an adverse impact on our customers' ability to use the company's products, potentially reducing sales volumes, revenues and margins. The company continuously evaluates opportunities for

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, *continued*

existing and new product and service offerings to meet the anticipated demands of climate-smart agriculture and mitigate the impact of extreme and volatile weather. The company integrates processes for identifying, assessing and managing climate-related risk into its overall risk management.

The company completed a non-financial materiality assessment and identified short-, medium- and long-term climate-related risks and opportunities. The results of this assessment are integrated into the company's businesses, strategy and financial planning and are presented in the 14 ten-year sustainability goals that were set in 2020. For each goal, the company established key performance indicators and criteria to achieve the goals, which are provided on the company's website at: <https://www.corteva.com/sustainability.html>. The information contained on the company's website is not part of, nor incorporated by reference into, this Annual Report on Form 10-K or the company's other SEC filings.

As demonstrated by the goals, Corteva is working to shrink its role in the emission of greenhouse gasses while enabling a more resilient agriculture value chain. Corteva has an established climate strategy, including appropriate Scopes 1, 2 and 3 greenhouse gas reduction targets. The company is seeking ways to reduce its impact and providing tools and incentives for customers to do the same. Corteva champions climate positive agriculture, utilizing carbon storage and other means to remove more carbon from the atmosphere than it emits without sacrificing farmer productivity or ongoing profitability.

The company is committed to engaging with multiple stakeholders and partners around the globe who have innovative and actionable ideas to help safeguard the health and well-being of the planet and its people. By doing more to address climate change today, the company is fortifying its ability to grow food, grow progress and build a sustainable industry that will help humanity thrive for generations to come.

Part II

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The company's global operations are exposed to financial market risks relating to fluctuations in foreign currency exchange rates, commodity prices, and interest rates. The company has established a variety of programs including the use of derivative instruments and other financial instruments to manage the exposure to financial market risks as to minimize volatility of financial results. In the ordinary course of business, the company enters into derivative instruments to hedge its exposure to foreign currency and commodity price risks under established procedures and controls. For additional information on these derivatives and related exposures, see Note 22 - Financial Instruments, to the Consolidated Financial Statements. Decisions regarding whether or not to hedge a given commitment are made on a case-by-case basis, taking into consideration the amount and duration of the exposure, market volatility and economic trends. Foreign currency exchange contracts may be used, from time to time, to manage near-term foreign currency cash requirements.

Foreign Currency Exchange Rate Risks

The company has significant international operations resulting in a large number of currency transactions that result from international sales, purchases, investments and borrowings. The primary currencies for which the company has an exchange rate exposure are the Brazilian Real, Swiss franc, Canadian dollar and European Euro ("EUR"). The company uses foreign exchange contracts to offset its net exposures, by currency, related to the foreign currency denominated monetary assets and liabilities of its operations. The company also uses foreign currency exchange contracts to offset a portion of the company's exposure to certain forecasted transactions, investment in foreign subsidiaries, as well as the translation of foreign currency-denominated earnings and uses commodity contracts to offset risks associated with foreign currency devaluation in certain countries. In addition to the contracts disclosed in Note 22 - Financial Instruments, to the Consolidated Financial Statements, from time to time, the company will enter into foreign currency exchange contracts to establish with certainty the U.S. dollar ("USD") amount of future firm commitments denominated in a foreign currency.

Certain foreign entities of the company held USD denominated marketable securities, mainly U.S. government securities, at December 31, 2020. The USD/EUR was the primary foreign exchange exposure for these nonfunctional currency denominated marketable securities. These debt securities were classified as available-for-sale marketable securities and as such, fluctuations in foreign exchange were recorded in accumulated other comprehensive income (loss) within the Consolidated Statements of Equity. These fluctuations were subsequently reclassified from accumulated other comprehensive income (loss) to earnings during 2021, which was the period in which the marketable securities were sold. At December 31, 2021, the company no longer held these USD denominated marketable securities.

The following table illustrates the fair values of outstanding foreign currency contracts at December 31, 2021 and 2020, and the effect on fair values of a hypothetical adverse change in the foreign exchange rates that existed at December 31, 2021 and 2020. The sensitivities for foreign currency contracts are based on a 10 percent adverse change in foreign exchange rates.

	Fair Value (Liability)/Asset		Fair Value Sensitivity	
	2021	2020	2021	2020
(Dollars in millions)				
Foreign currency contracts	\$ 44	\$ (80)	\$ (211)	\$ (388)
Marketable securities	\$ —	\$ 226	\$ —	\$ (36)

Since the company's risk management programs are highly effective, the potential loss in value for each risk management portfolio described above would be largely offset by changes in the value of the underlying exposure.

Concentration of Credit Risk

The company maintains cash and cash equivalents, marketable securities, derivatives and certain other financial instruments with various financial institutions. These financial institutions are generally highly rated and geographically dispersed and the company has a policy to limit the dollar amount of credit exposure with any one institution.

As part of the company's financial risk management processes, it continuously evaluates the relative credit standing of all of the financial institutions that service Corteva and monitors actual exposures versus established limits. The company has not sustained credit losses from instruments held at financial institutions.

The company's sales are not materially dependent on any single customer. Credit risk associated with its receivables balance is representative of the geographic, industry and customer diversity associated with the company's global product lines.

Part II

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK, *continued*

The company also maintains strong credit controls in evaluating and granting customer credit. As a result, it may require that customers provide some type of financial guarantee in certain circumstances. Length of terms for customer credit varies by region.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

The financial statements and supplementary data required by this Item are included herein, commencing on page F-1 of this report.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

Corteva, Inc.

a) Evaluation of Disclosure Controls and Procedures

The company maintains a system of disclosure controls and procedures to give reasonable assurance that information required to be disclosed in the company's reports filed or submitted under the Securities Exchange Act of 1934 ("Exchange Act") is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission. These controls and procedures also give reasonable assurance that information required to be disclosed in such reports is accumulated and communicated to management to allow timely decisions regarding required disclosures.

As of December 31, 2021, the company's Chief Executive Officer ("CEO") and Chief Financial Officer ("CFO"), together with management, conducted an evaluation of the effectiveness of the company's disclosure controls and procedures pursuant to Rules 13a-15(e) and 15d-15(e) of the Exchange Act. Based on that evaluation, the CEO and CFO concluded that these disclosure controls and procedures are effective.

b) Changes in Internal Control over Financial Reporting

There have been no changes in the company's internal control over financial reporting that occurred during the quarter ended December 31, 2021 that have materially affected, or are reasonably likely to materially affect, the company's internal control over financial reporting.

E. I. du Pont de Nemours and Company

a) Evaluation of Disclosure Controls and Procedures

EID maintains a system of disclosure controls and procedures to give reasonable assurance that information required to be disclosed in EID's reports filed or submitted under the Securities Exchange Act of 1934 ("Exchange Act") is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission. These controls and procedures also give reasonable assurance that information required to be disclosed in such reports is accumulated and communicated to management to allow timely decisions regarding required disclosures.

As of December 31, 2021, EID's CEO and CFO, together with management, conducted an evaluation of the effectiveness of EID's disclosure controls and procedures pursuant to Rules 13a-15(e) and 15d-15(e) of the Exchange Act. Based on that evaluation, the CEO and CFO concluded that these disclosure controls and procedures are effective.

b) Changes in Internal Control over Financial Reporting

There have been no changes in EID's internal control over financial reporting that occurred during the quarter ended December 31, 2021 that have materially affected, or are reasonably likely to materially affect, EID's internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

None.

ITEM 9C. Disclosure Regarding Foreign Jurisdictions that Prevent Inspections.

Not applicable.

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Information with respect to this Item is incorporated herein by reference to the Proxy, including information within the sections entitled, "Election of Directors," "Corporate Governance," and "Delinquent Section 16(a) Reports".

The company has adopted a Code of Financial Ethics for its CEO, CFO, and Controller that may be accessed from the company's website at www.corteva.com by clicking on "Investors" and then "Corporate Governance." Any amendments to, or waiver from, any provision of the code will be posted on the company's website at the above address.

Executive Officers of the Registrant

Each of the executive officers became officers of the company in May 2019 with the exception of Mr. Charles Magro, Mr. David Anderson, and Dr. Sam Eathington who became an executive officer in November 2021, April 2021 and January 2021, respectively.

Charles V. Magro, age 52, is the Chief Executive Officer of Corteva. Prior to joining Corteva on November 1, 2021, he served as President and chief executive officer of Nutrien Ltd. ("Nutrien") from the company's launch in 2018 until April 2021. From 2014 to 2018, Mr. Magro served as President and chief executive officer of Agrium Inc., which merged with Potash Corporation of Saskatchewan to create Nutrien. As President and CEO of Nutrien, Mr. Magro led more than 27,000 employees to achieve best-in-class engagement, top safety performance and exceptional business results. He also led the company through numerous M&A transactions, expanding globally and restructuring the industry. Prior to this role, he held a variety of other key leadership positions with the company, including Chief Operating Officer, Chief Risk Officer, Executive Vice President of Corporate Development, and Vice President of Manufacturing. He joined Agrium in 2009 following a productive career with NOVA Chemicals. Since 2018, Mr. Magro has served on the Canada Pension Plan Investment Board and will continue to serve on the board through March 2022. Previously, he served as Vice Chairman of the International Fertilizer Association and past Chair and Board Member of The Fertilizer Institute. He also served as a Board Steward for the World Economic Forum's Food Systems Initiative, providing strategic leadership to build inclusive, sustainable, efficient, and healthy global food systems, as well as on the Boards of the International Plant Nutrition Institute, Nutrients for Life Foundation, the Business Council of Canada, and the Business Council of Alberta. Ingredion Inc., a global provider of ingredient solutions to the food and beverage manufacturing industry, elected Mr. Magro to its board of directors effective May 1, 2022.

David J. Anderson, age 72, is Executive Vice President and Chief Financial Officer of Corteva. Mr. Anderson is an experienced Chief Financial Officer, with a career spanning a number of diverse global companies across a range of industries. Prior to joining Corteva in April 2021, Mr. Anderson was interim chief financial officer at Criteo S.A., which he joined after serving as chief financial officer and chief operating officer at Nielsen Holdings plc. He previously served as executive vice president and chief financial officer of Alexion Pharmaceuticals, which he joined following his tenure of more than a decade as the chief financial officer for Honeywell. Prior to that, Mr. Anderson was the chief financial officer for ITT, Inc., Newport News Shipbuilding Inc., and RJR Nabisco, Inc. Mr. Anderson is currently a Board member of American Electric Power and previously a Board member of Cardinal Health.

Rajan Gajaria, age 54, is Executive Vice President, Business Platforms of Corteva. Mr. Gajaria previously served as vice president, global crop protection business platform, of DowDuPont Inc. Prior to this, he served as Vice President, Latin America and North America, for Dow AgroSciences since 2015. He was selected to lead Dow AgroSciences' Latin America and Asia Pacific geographies in 2012 after being named marketing director for the company's U.S. business in 2009. Mr. Gajaria advanced through leadership roles at Dow AgroSciences in corporate strategy, marketing, and e-business before serving as global supply chain director. He joined Dow AgroSciences' Indian joint venture partner in Mumbai in 1993, where he served in sales and marketing roles as well as in human resources before moving to the company's global headquarters in Indianapolis, Indiana. Effective February 18, 2022, Mr. Gajaria will retire from the company.

Timothy P. Glenn, age 55, is Executive Vice President, Chief Commercial Officer of Corteva. Mr. Glenn previously served as Vice President, Global Seed Business Platform of DowDuPont Inc. Prior to this, he served as President, DuPont Crop Protection since 2015, and from 2014 to 2015 served as vice president, integrated operations and commercial effectiveness for DuPont Pioneer. He previously held other leadership positions at DuPont Pioneer, including regional business director, Latin America and Canada, after rejoining DuPont Pioneer in 2006 as director, North America Marketing. In 1997, he joined Dow AgroSciences as corn product manager, Mycogen Seeds, and served in sales and business leadership roles in the crop protection and seeds businesses of Dow AgroSciences. He first joined Pioneer Hi-Bred International, Inc. in 1991, and held a variety of marketing roles in seed markets around the world.

Part III

Meghan Cassidy, age 46, is Senior Vice President, Chief Human Resources and Diversity Officer of Corteva. In February 2021, Ms. Cassidy became Chief Diversity Officer in addition to her human resources duties at Corteva. Prior to joining Corteva, Ms. Cassidy served as the head of human resources of the agriculture division of DowDuPont Inc. since September 2017. Prior to this, Ms. Cassidy was director, global talent management and leadership development for DuPont since 2015. From 2011 to 2015, she served as chief human resources officer for Sunoco Logistics after joining Sunoco in 2010 as director, corporate human resources. Ms. Cassidy's early career was spent at Aramark, where she held progressive human resources roles before serving as vice president, executive development and corporate human resources.

Dr. Sam Eathington, age 53, joined Corteva in November 2020 and became Senior Vice President, Chief Technology Officer of Corteva in January 2021, where he is responsible for leading the company's global research and development organization, building and expanding its industry-leading pipeline, and sustainability. A recognized leader in agricultural innovation, Dr. Eathington most recently served as chief science officer of The Climate Corporation (part of the crop science division of Bayer AG) from December 2015 until April 2020. Prior to assuming that role, Dr. Eathington spent 19 years with Monsanto Corporation, rising through the ranks in quantitative traits and molecular breeding to become vice president, global plant breeding beginning in February 2011.

Cornel B. Fuerer, age 55, is Senior Vice President, General Counsel and Secretary of Corteva, where he is responsible for legal, compliance, enterprise risk management, and government affairs. Mr. Fuerer previously served as general counsel of the agriculture division of DowDuPont Inc. since June 2018 and prior to that served as associate general counsel supporting the agriculture division of DowDuPont after the Merger in September 2017. From 2013 to 2017, he served as associate general counsel of DuPont with responsibility for the legal affairs of DuPont's agriculture business and from 2012 to 2013 he served as the corporate secretary of DuPont. From 2007 to 2012, Mr. Fuerer served as the vice president, general counsel and company secretary of Solae, a food ingredients joint venture between DuPont and Bunge. After joining DuPont in 1995 as an attorney in Geneva, Switzerland, he served in various legal roles around the world until his appointment at Solae in 2007.

Brian Titus, age 49, is Vice President, Controller and Principal Accounting Officer of Corteva. Mr. Titus previously served as the controller and principal accounting officer of the agriculture division of DowDuPont Inc. since February 2019. Prior to this, he was general auditor of DuPont since August 2015 and previously served as the director of corporate accounting from 2014 to 2015 and global finance leader of DuPont Crop Protection from 2013 to 2014. Prior to joining DuPont's corporate accounting group in 2010, he spent 14 years in public accounting, primarily with PricewaterhouseCoopers LLP, providing audit and transactional support services.

ITEM 11. EXECUTIVE COMPENSATION

Information related to executive compensation and the company's equity compensation plans is contained in the definitive Proxy Statement for the 2022 Annual Meeting of Stockholders of Corteva, Inc. and is incorporated herein by reference.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

Information with respect to beneficial ownership of Corteva, Inc. common stock by each director, executive officer, and all directors and executive officers of the Company as a group is contained in the definitive Proxy Statement for the 2022 Annual Meeting of Stockholders of Corteva, Inc. and is incorporated herein by reference.

Information relating to any person who beneficially owns in excess of 5 percent of the total outstanding shares of Corteva, Inc. common stock is contained in the definitive Proxy Statement for the 2022 Annual Meeting of Stockholders of Corteva, Inc. and is incorporated herein by reference.

Information with respect to compensation plans under which equity securities are authorized for issuance is contained in the definitive Proxy Statement for the 2022 Annual Meeting of Stockholders of Corteva, Inc. and is incorporated herein by reference.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

Information with respect to this Item is incorporated herein by reference to the definitive Proxy Statement for the 2022 Annual Meeting of Stockholders of Corteva, Inc., including information within the sections entitled, "Certain Relationships and Related Transactions", and "Director Independence."

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

Information with respect to this Item is incorporated herein by reference to the definitive Proxy Statement for the 2022 Annual Meetings of Stockholders of Corteva, Inc., including information within the section entitled, "Ratification of Independent Registered Public Accounting Firm."

ITEM 15. EXHIBITS AND CONSOLIDATED FINANCIAL STATEMENT SCHEDULES

(a) Financial Statements, Financial Statement Schedules and Exhibits:

1. Corteva Financial Statements (See the Index to the Consolidated Financial Statements on page F-1 of this report).
2. Corteva Financial Statement Schedule (presented below)
3. EID Financial Statements (Starting on page F-79 of this report).
4. EID Financial Statement Schedule (presented below)

Schedule II—Valuation and Qualifying Accounts (EID and Corteva, Inc.)

(Dollars in millions)

	For the Year Ended December 31,		
	2021	2020	2019
Accounts Receivable—Allowance for Doubtful Receivables			
Balance at beginning of period	\$ 208	\$ 174	\$ 127
Additions charged to expenses ¹	6	52	69
Deductions from reserves ^{1,2}	(4)	(18)	(22)
Balance at end of period	\$ 210	\$ 208	\$ 174
Deferred Tax Assets—Valuation Allowance			
Balance at beginning of period	\$ 453	\$ 457	\$ 669
Additions charged to expenses	97	56	20
Deductions from reserves ³	(184)	(60)	(232)
Balance at end of period	\$ 366	\$ 453	\$ 457

¹. Classifications in the changes in the allowance for doubtful receivables for the period ended December 31, 2020 have been adjusted from their previous presentation. Adjustments did not impact the amount of the provision or the allowance for doubtful receivables recorded in the Consolidated Statements of Operations or the Consolidated Balance Sheets.

². Deductions include write-offs, recoveries collected and currency translation adjustments.

³. Deductions include currency translation adjustments.

Financial Statement Schedules listed under the Securities and Exchange Commission ("SEC") rules but not included in this report are omitted because they are not applicable or the required information is shown in the Consolidated Financial Statements or notes thereto.

Part IV

ITEM 15. EXHIBITS AND FINANCIAL STATEMENT SCHEDULES, *continued*

3. Exhibits

Management's Reports on Responsibility for Financial Statements and Internal Control over Financial Reporting

Management's Report on Responsibility for Financial Statements

Management is responsible for the Consolidated Financial Statements and the other financial information contained in this Annual Report on Form 10-K. The financial statements have been prepared in accordance with generally accepted accounting principles in the United States of America ("GAAP") and are considered by management to present fairly the company's financial position, results of operations and cash flows. The financial statements include some amounts that are based on management's best estimates and judgments. The financial statements have been audited by the company's independent registered public accounting firm, PricewaterhouseCoopers LLP. The purpose of their audit is to express an opinion as to whether the Consolidated Financial Statements included in this Annual Report on Form 10-K present fairly, in all material respects, the company's financial position, results of operations and cash flows in conformity with GAAP. Their report is presented on the following pages.

Management's Report on Internal Control over Financial Reporting

Management is responsible for establishing and maintaining an adequate system of internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934. The company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with GAAP. The company's internal control over financial reporting includes those policies and procedures that:

- i. pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- ii. provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles and that receipts and expenditures of the company are being made only in accordance with authorization of management and directors of the company; and
- iii. provide reasonable assurance regarding prevention or timely detection of unauthorized acquisitions, use or disposition of the company's assets that could have a material effect on the financial statements.

Internal control over financial reporting has certain inherent limitations which may not prevent or detect misstatements. In addition, changes in conditions and business practices may cause variation in the effectiveness of internal controls.

Management assessed the effectiveness of the company's internal control over financial reporting as of December 31, 2021, based on criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO") in *Internal Control-Integrated Framework (2013)*. Based on its assessment and those criteria, management concluded that the company maintained effective internal control over financial reporting as of December 31, 2021.

PricewaterhouseCoopers LLP, an independent registered public accounting firm, has audited the effectiveness of the company's internal control over financial reporting as of December 31, 2021, as stated in their report, which is presented on the following pages.

Report of Independent Registered Public Accounting Firm

To the Stockholders and Board of Directors of Corteva, Inc.

Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated balance sheets of Corteva, Inc. and its subsidiaries (the “Company”) as of December 31, 2021 and 2020, and the related consolidated statements of operations, comprehensive income (loss), equity and cash flows for each of the three years in the period ended December 31, 2021, including the related notes and schedule of valuation and qualifying accounts for each of the three years in the period ended December 31, 2021 appearing under Item 15(a) (collectively referred to as the “consolidated financial statements”). We also have audited the Company's internal control over financial reporting as of December 31, 2021, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2021 and 2020, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2021 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2021, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the COSO.

Basis for Opinions

The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express opinions on the Company's consolidated financial statements and on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Critical Audit Matters

The critical audit matter communicated below is a matter arising from the current period audit of the consolidated financial statements that was communicated or required to be communicated to the audit committee and that (i) relates to accounts or disclosures that are material to the consolidated financial statements and (ii) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

Goodwill (Seed Reporting Unit) Impairment Assessment

As described in Notes 2 and 15 to the consolidated financial statements, the Company's consolidated goodwill balance was \$10.1 billion as of December 31, 2021, and the goodwill associated with the seed reporting unit was \$5.4 billion. Management tests goodwill for impairment at the reporting unit level at least annually, or more frequently when events or changes in circumstances indicate it is more likely than not that the fair value of a reporting unit has declined below its carrying value. Management performs an annual goodwill impairment test in the fourth quarter. If management chooses not to complete a qualitative assessment for a given reporting unit or if the initial assessment indicates that it is more likely than not that the carrying value of a reporting unit exceeds its estimated fair value, additional quantitative testing is required. Management performed quantitative testing on its seed reporting unit and determined that no goodwill impairment existed in 2021. Management determined fair value for the seed reporting unit using a discounted cash flow model. Management's significant assumptions in this analysis included future cash flow projections, the weighted average cost of capital, the terminal growth rate, and the tax rate.

The principal considerations for our determination that performing procedures relating to the seed reporting unit goodwill impairment assessment is a critical audit matter are (i) the significant judgment by management when developing the fair value of the seed reporting unit; (ii) a high degree of auditor judgment, subjectivity, and effort in performing procedures and evaluating management's significant assumptions related to projected revenue, the weighted average cost of capital, and the terminal value; and (iii) the audit effort involved the use of professionals with specialized skill and knowledge.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to management's goodwill impairment assessment, including controls over the valuation of the seed reporting unit. These procedures also included, among others, (i) testing management's process for developing the fair value estimate; (ii) evaluating the appropriateness of the discounted cash flow model; (iii) testing the completeness, accuracy, and relevance of underlying data used in the discounted cash flow model; and (iv) evaluating the reasonableness of significant assumptions used by management related to projected revenue, the weighted average cost of capital, and the terminal value. Evaluating management's assumptions related to projected revenue and the terminal value involved evaluating whether the assumptions used by management were reasonable considering (i) the current and past performance of the reporting unit; (ii) the consistency with external market and industry data; and (iii) whether the assumptions were consistent with evidence obtained in other areas of the audit. Professionals with specialized skill and knowledge were used to assist in the evaluation of the Company's discounted cash flow model and the weighted average cost of capital and terminal value assumptions.

NOTE 1 - BACKGROUND AND BASIS OF PRESENTATION

Corteva, Inc. is a leading global provider of seed and crop protection solutions focused on the agriculture industry. The company intends to leverage its rich heritage of scientific achievement to advance its robust innovation pipeline and continue to shape the future of responsible agriculture. The company's broad portfolio of agriculture solutions fuels farmer productivity around the globe. Corteva has two reportable segments: seed and crop protection. See Note 25 - Segment Information, to the Consolidated Financial Statements, for additional information on the company's reportable segments.

Throughout these financial statements, except as otherwise noted by the context, the terms "Corteva" or "company" used herein mean Corteva, Inc. and its consolidated subsidiaries (including EID) and the term "EID" used herein means E. I. du Pont de Nemours and Company and its consolidated subsidiaries or E. I. du Pont de Nemours and Company excluding its consolidated subsidiaries, as the context may indicate. Additionally, on June 1, 2019, DowDuPont Inc. changed its registered name to DuPont de Nemours, Inc. ("DuPont"), for certain events prior to, or on, June 1, 2019, DuPont may be referred to as DowDuPont.

Principles of Consolidation and Basis of Presentation

On June 1, 2019, Corteva, Inc. became an independent, publicly traded company through the completed separation (the "Separation") of the agriculture business of DuPont de Nemours, Inc. (formerly known as DowDuPont Inc.) ("DowDuPont" or "DuPont"). The separation was effectuated through a pro rata distribution (the "Corteva Distribution") of all of the then-issued and outstanding shares of common stock, par value \$0.01 per share, of Corteva, Inc., which was then a wholly-owned subsidiary of DowDuPont, to holders of record of DowDuPont common stock as of the close of business on May 24, 2019.

Previously, DowDuPont was formed on December 9, 2015, to effect an all-stock merger of equals strategic combination between The Dow Chemical Company ("Historical Dow") and EID. On August 31, 2017 at 11:59 pm ET (the "Merger Effectiveness Time") pursuant to the Agreement and Plan of Merger, dated as of December 11, 2015, as amended March 31, 2017 (the "Merger Agreement"), Historical Dow and EID each merged with wholly-owned subsidiaries of DowDuPont and became subsidiaries of DowDuPont (the "Merger"). Prior to the Merger, DowDuPont did not conduct any business activities other than those required for its formation and matters contemplated by the Merger Agreement.

Subsequent to the Merger, Historical Dow and EID engaged in a series of internal reorganization and realignment steps to realign their businesses into three subgroups: agriculture, materials science and specialty products through a series of tax-efficient transactions (collectively, the "Business Separations"). Effective as of 5:00 pm ET on April 1, 2019, DowDuPont completed the separation of its materials science business into a separate and independent public company by way of a distribution of Dow Inc. ("Dow") through a pro rata dividend in-kind of all of the then-issued and outstanding shares of Dow's common stock, par value \$0.01 per share, to holders of DowDuPont's common stock, as of the close of business on March 21, 2019 (the "Dow Distribution" and together with the Corteva Distribution, the "Distributions").

Prior to the Dow Distribution, Historical Dow conveyed or transferred the assets and liabilities aligned with Historical Dow's agriculture business to separate legal entities ("Dow Ag Entities") and the assets and liabilities associated with its specialty products business to separate legal entities (the "Dow SP Entities"). On April 1, 2019, Dow Ag Entities and the Dow SP Entities were transferred and conveyed to DowDuPont.

In furtherance of the Business Separations, EID engaged in a series of internal reorganization and realignment steps (the "Internal Reorganization" and the "Business Realignment," respectively) to realign its businesses into three subgroups: agriculture, materials science and specialty products. As part of the Internal Reorganization:

- the assets and liabilities aligned with EID's materials science business ("EID ECP") were transferred or conveyed to separate legal entities that were ultimately conveyed by DowDuPont to Dow on April 1, 2019;
- the assets and liabilities aligned with EID's specialty products business were transferred or conveyed to separate legal entities ("EID Specialty Products Entities") that were ultimately distributed to DowDuPont on May 1, 2019;
- on May 2, 2019, DowDuPont conveyed Dow Ag Entities to EID and in connection with the foregoing, EID issued additional shares of its Common Stock to DowDuPont; and
- on May 31, 2019, DowDuPont contributed EID to Corteva, Inc.

On May 6, 2019, the Board of Directors of DowDuPont approved the distribution of all the then issued and outstanding shares of common stock of Corteva, Inc., then a wholly-owned subsidiary of DowDuPont, to DowDuPont stockholders. On June 1,

2019, DowDuPont completed the Separation. Each DowDuPont stockholder received one share of Corteva common stock for every three shares of DowDuPont common stock held at the close of business on May 24, 2019, the record date of distribution. Corteva, Inc.'s common stock began trading the "regular way" under the ticker symbol "CTVA" on June 3, 2019, the first business day after June 1, 2019. Upon becoming an independent company, the capital structure of Corteva consisted of 748,815,000 authorized shares of common stock (par value of \$0.01 per share), which represents the number of common shares issued on June 3, 2019. Information related to the Corteva Distribution and its effect on the company's financial statements is discussed throughout these Notes to the Consolidated Financial Statements.

As a result of the Business Realignment and the Internal Reorganization discussed above, Corteva owns 100% of the outstanding common stock of EID. EID is a subsidiary of Corteva, Inc. and continues to be a reporting company, subject to the requirements of the Securities Exchange Act of 1934, as amended.

DAS Common Control Business Combination

The transfer or conveyance of DAS to Corteva was treated as a transfer of entities under common control. As such, the company recorded the assets, liabilities, and equity of DAS on its balance sheet at their historical basis. Transfers of businesses between entities under common control requires the financial statements to be presented as if the transaction had occurred at the point at which common control first existed (the Merger Effectiveness Time). As a result, the accompanying Consolidated Financial Statements and Notes thereto include the results of DAS as of the Merger Effectiveness Time. See Note 4 - Common Control Business Combination, to the Consolidated Financial Statements, for additional information.

For periods prior to the Corteva Distribution, the combined results of operations and assets and liabilities of EID and DAS were derived from the Consolidated Financial Statements and accounting records of EID as well as the carve-out financial statements of DAS. The DAS carve-out financial statements reflect the historical results of operations, financial position, and cash flows of Historical Dow's Agricultural Sciences Business and include allocations of certain expenses for services from Historical Dow, including, but not limited to, general corporate expenses related to finance, legal, information technology, human resources, ethics and compliance, shared services, employee benefits and incentives, insurance, and stock-based compensation. These expenses were allocated on the basis of direct usage when identifiable, with the remainder allocated under the basis of headcount or other measures.

The company's Consolidated Balance Sheets for all periods presented consist of Corteva, Inc. and its consolidated subsidiaries.

The company's Consolidated Statements of Operations (the "Consolidated Statements of Operations") for all periods prior to the Corteva Distribution consist of the combined results of operations for Historical EID and DAS. The Consolidated Statements of Operations for all periods after the Corteva Distribution represent the consolidated balances of the company. Intercompany balances and transactions with Historical EID and DAS have been eliminated.

During the first quarter 2020, the company recorded an increase of \$40 million to APIC relating to net assets recorded as transferred as part of the 2019 Internal Reorganizations that were retained.

Divestiture of EID ECP and EID Specialty Products Entities

The transfer of EID ECP and EID Specialty Products Entities meets the criteria for discontinued operations and as such, results of operations are presented as discontinued operations and have been excluded from continuing operations for all periods presented. The comprehensive income (loss), stockholder's equity and cash flows related to EID ECP and EID Specialty Products Entities have not been segregated and are included in the Consolidated Statements of Comprehensive Income (Loss), Consolidated Statements of Equity and Consolidated Statements of Cash Flows, respectively, for 2019. Amounts related to EID ECP and EID Specialty Products Entities are consistently included or excluded from the Notes to the Consolidated Financial Statements based on the respective financial statement line item. See Note 5 - Divestitures and Other Transactions, to the Consolidated Financial Statements, for additional information.

Certain reclassifications of prior year's data have been made to conform to current year's presentation.

Since 2018, Argentina has been considered a hyper-inflationary economy under U.S. GAAP and therefore the U.S. Dollar ("USD") is the functional currency for our related subsidiaries. Argentina contributes approximately 5 percent to both the company's annual Sales and EBITDA. We remeasure net monetary assets and translate our financial statements utilizing the official Argentine Peso ("Peso") to USD exchange rate. The ability to draw down Peso cash balances is limited at this time due to government restrictions and market availability of U.S. Dollars. The devaluation of the Peso relative to the USD over the last several years has resulted in the recognition of exchange losses (refer to Note 9 – Supplementary Information, to the Consolidated Financial Statements). As of December 31, 2021, a further 10 percent deterioration in the official Peso to USD

exchange rate would reduce the USD value of our net monetary assets and negatively impact pre-tax earnings by approximately \$15 million. We will continue to assess the implications to our operations and financial reporting.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The Consolidated Financial Statements include the accounts of the company and subsidiaries in which a controlling interest is maintained. For those consolidated subsidiaries in which the company's ownership is less than 100 percent, the outside stockholders' interests are shown as noncontrolling interests. Investments in affiliates over which the company has the ability to exercise significant influence but does not have a controlling interest are accounted for under the equity method.

The company is also involved with certain joint ventures accounted for under the equity method of accounting that are variable interest entities ("VIEs"). The company is not the primary beneficiary, as the nature of the company's involvement with the VIEs does not provide it the power to direct the VIEs significant activities. Future events may require these VIEs to be consolidated if the company becomes the primary beneficiary. At December 31, 2021 and 2020, the maximum exposure to loss related to the nonconsolidated VIEs is not considered material to the Consolidated Financial Statements.

Use of Estimates in Financial Statement Preparation

The preparation of financial statements in accordance with U.S. GAAP requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. The company's consolidated financial statements include amounts that are based on management's best estimates and judgments. Actual results could differ from those estimates.

Cash and Cash Equivalents

Cash equivalents represent investments with maturities of three months or less from time of purchase. They are carried at cost plus accrued interest.

Restricted Cash Equivalents

Restricted cash equivalents primarily consist of trust assets and contributions to the MOU Escrow Account of \$377 million and \$347 million as of December 31, 2021 and 2020, respectively. The trust assets are classified as current and the contributions to the MOU Escrow Account are classified as noncurrent and included within other current assets and other assets, respectively, in the Consolidated Balance Sheets. See Note 9 - Supplementary Information, to the Consolidated Financial Statements, for further information.

Marketable Securities

Marketable securities represent investments in fixed and floating rate financial instruments with maturities greater than three months and up to twelve months at time of purchase. Investments classified as held-to-maturity are recorded at amortized cost. The carrying value approximates fair value due to the short-term nature of the investments. Investments classified as debt securities that are available-for-sale are carried at estimated fair value with unrealized gains and losses recorded as a component of accumulated other comprehensive income (loss) or current period earnings if an allowance for credit losses has been established. The cost of investments sold is determined by specific identification.

Fair Value Measurements

Under the accounting guidance for fair value measurements and disclosures, a fair value hierarchy was established that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement.

The company uses the following valuation techniques to measure fair value for its assets and liabilities:

- | | |
|---------|--|
| Level 1 | – Quoted market prices in active markets for identical assets or liabilities; |
| Level 2 | – Significant other observable inputs (e.g. quoted prices for similar items in active markets, quoted prices for identical or similar items in markets that are not active, inputs other than quoted prices that are observable such as interest rate and yield curves, and market-corroborated inputs); |
| Level 3 | – Unobservable inputs for the asset or liability, which are valued based on management's estimates of assumptions that market participants would use in pricing the asset or liability. |

Foreign Currency Translation

The company's worldwide operations utilize the U.S. dollar ("USD") or a related foreign currency as the functional currency, where applicable. The company identifies its separate and distinct foreign entities and groups the foreign entities into two categories: 1) extension of the parent or foreign subsidiaries operating in a hyper-inflationary environment (USD functional currency) and 2) self-contained (related foreign functional currency). If a foreign entity does not align with either category, factors are evaluated and a judgment is made to determine the functional currency.

For foreign entities where the USD is the functional currency, all foreign currency-denominated asset and liability amounts are re-measured into USD at end-of-period exchange rates, except for inventories, prepaid expenses, property, plant and equipment, goodwill and other intangible assets, which are re-measured at historical rates. Foreign currency income and expenses are re-measured at average exchange rates in effect during each month, except for expenses related to balance sheet amounts re-measured at historical exchange rates. Exchange gains and losses arising from re-measurement of foreign currency-denominated monetary assets and liabilities are included in income in the period in which they occur.

For foreign entities where a related foreign currency is the functional currency, assets and liabilities denominated in the related foreign currencies are translated into USD at end-of-period exchange rates and the resultant translation adjustments are reported, net of their related tax effects, as a component of accumulated other comprehensive income (loss) in equity. Assets and liabilities denominated in other than the functional currency are re-measured into the functional currency prior to translation into USD and the resultant exchange gains or losses are included in income in the period in which they occur. Income and expenses are translated into USD at average exchange rates in effect during each month.

The company changes the functional currency of its separate and distinct foreign entities only when significant changes in economic facts and circumstances indicate clearly that the functional currency has changed.

Inventories

The company's inventories are valued at the lower of cost or net realizable value. Elements of cost in inventories include raw materials, direct labor and manufacturing overhead. Stores and supplies are valued at cost or net realizable value, whichever is lower; cost is generally determined by the average cost method.

As of December 31, 2021 and December 31, 2020, approximately 60% and 40% of the company's inventories were accounted for under the first-in, first-out ("FIFO") and average cost methods, respectively. Inventories accounted for under the FIFO method are primarily comprised of products with shorter shelf lives such as seeds. See Note 13 - Inventories, to the Consolidated Financial Statements, for further information.

The company establishes an obsolescence reserve for inventory based upon quality considerations and assumptions about future demand and market conditions.

Property, Plant and Equipment

Property, plant and equipment are carried at cost less accumulated depreciation. In connection with the Merger, the fair value of property, plant and equipment was determined using a market approach and a replacement cost approach. Depreciation is based on the estimated service lives of depreciable assets and is calculated using the straight-line method. Fully depreciated assets are retained in property and accumulated depreciation accounts until they are removed from service. When assets are surrendered, retired, sold, or otherwise disposed of, their gross carrying values and related accumulated depreciation are removed from the Consolidated Balance Sheets and included in determining gain or loss on such disposals.

Goodwill and Other Intangible Assets

The company records goodwill when the purchase price of a business acquisition exceeds the estimated fair value of net identified tangible and intangible assets acquired. Goodwill is tested for impairment at the reporting unit level at least annually, or more frequently when events or changes in circumstances indicate that the fair value of a reporting unit has more likely than not declined below its carrying value. The company performs an annual goodwill impairment test in the fourth quarter.

When testing goodwill for impairment, the company has the option to first perform qualitative testing to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value. If the company chooses not to complete a qualitative assessment for a given reporting unit or if the initial assessment indicates that it is more likely than not that the carrying value of a reporting unit exceeds its estimated fair value, additional quantitative testing is required. If additional quantitative testing is required, the reporting unit's fair value is compared with its carrying amount, and an impairment charge, if any, is recognized for the amount by which the carrying amount exceeds the reporting unit's fair value, limited to the amount of goodwill associated with the reporting unit. The company determines fair values for each of the reporting units using a discounted cash flow model (a form of the income approach) or the market approach. Under the income approach, fair value is determined based on the present value of estimated future cash flows, discounted at an appropriate risk-adjusted rate. The company's significant assumptions in this analysis included future cash flow projections, weighted average cost of capital, the terminal growth rate, and the tax rate. Under the market approach, the company uses metrics of publicly traded companies or historically completed transactions for comparable companies. See Note 15 - Goodwill and Other Intangible Assets, to the Consolidated Financial Statements, for further information on goodwill.

Indefinite-lived intangible assets are tested for impairment at least annually; however, these tests are performed more frequently when events or changes in circumstances indicate that the asset may be impaired. Impairment exists when carrying value exceeds fair value. The company performs an impairment assessment using the relief from royalty method (a form of the income approach) using Level 3 inputs within the fair value hierarchy. The significant assumptions used in the calculation included projected revenue, the royalty rate, the discount rate, and the terminal growth rate. These significant assumptions involve management judgment and estimates relating to future operating performance and economic conditions that may differ from actual cash flows.

Definite-lived intangible assets are amortized over their estimated useful lives, generally on a straight-line basis for periods ranging primarily from 2 years to 25 years. The company continually evaluates the reasonableness of the useful lives of these assets. Once these assets are fully amortized, they are removed from the Consolidated Balance Sheets.

Leases

The company determines whether an arrangement is a lease at the inception of the arrangement based on the terms and conditions in the contract. A contract contains a lease if there is an identified asset and the company has the right to control the asset. Operating lease right-of-use ("ROU") assets are included in other assets on the company's Consolidated Balance Sheets. Operating lease liabilities are included in accrued and other current liabilities and other noncurrent obligations on the company's Consolidated Balance Sheets. Finance lease assets are included in property, plant and equipment on the company's Consolidated Balance Sheets. Finance lease liabilities are included in short-term borrowings and finance lease obligations and long-term debt on the company's Consolidated Balance Sheets.

Operating lease ROU assets represent the company's right to use an underlying asset for the lease term and lease liabilities represent the company's obligation to make lease payments arising from the lease. Operating lease ROU assets and liabilities are recognized at the commencement date based on the present value of lease payments over the lease term. As most of the company's leases do not provide the lessor's implicit rate, the company uses its incremental borrowing rate at the commencement date in determining the present value of lease payments. Lease terms include options to extend the lease when it is reasonably certain those options will be exercised. Leases with an initial term of 12 months or less are not recorded on the balance sheet. The company recognizes lease expense for these leases on a straight-line basis over the lease term.

The company has lease agreements with lease and non-lease components, which are accounted for as a single lease component for all asset classes. In the Consolidated Statements of Operations, lease expense for operating leases is recognized on a straight-line basis over the lease term. For finance leases, interest expense is recognized on the lease liability and the ROU asset is amortized over the lease term. See Note 16 - Leases, to the Consolidated Financial Statements, for further information.

Impairment of Long-Lived Assets

The company evaluates the carrying value of long-lived assets to be held and used when events or changes in circumstances indicate the carrying value may not be recoverable. The carrying value of a long-lived asset group is considered impaired when the total projected undiscounted cash flows from the assets are separately identifiable and are less than its carrying value. In that event, a loss is recognized based on the amount by which the carrying value exceeds the fair value of the long-lived asset. The

company's fair value methodology is an estimate of fair market value which is made based on prices of similar assets or other valuation methodologies including present value techniques. Long-lived assets to be disposed of by sale, if material, are classified as held for sale and reported at the lower of carrying amount or fair value less cost to sell, and depreciation is ceased. Long-lived assets to be disposed of other than by sale are classified as held and used until they are disposed of and reported at the lower of carrying amount or fair value. Depreciation is recognized over the remaining useful life of the assets.

Derivative Instruments

Derivative instruments are reported in the Consolidated Balance Sheets at their fair values. The company utilizes derivatives to manage exposures to foreign currency exchange rates and commodity prices. Changes in the fair values of derivative instruments that are not designated as hedges are recorded in current period earnings. For derivative instruments designated as cash flow hedges, the gain (loss) is reported in accumulated other comprehensive income (loss) until it is cleared to earnings during the same period in which the hedged item affects earnings. For derivative instruments designated as net investment hedges, the gain (loss) is reported within accumulated other comprehensive income (loss) until the subsidiary is divested.

In the event that a derivative designated as a hedge of a firm commitment or an anticipated transaction is terminated prior to the maturation of the hedged transaction, the net gain or loss in accumulated other comprehensive income (loss) generally remains in accumulated other comprehensive income (loss) until the item that was hedged affects earnings. If a hedged transaction matures, or is sold, extinguished, or terminated prior to the maturity of a derivative designated as a hedge of such transaction, gains or losses associated with the derivative through the date the transaction matured are included in the measurement of the hedged transaction and the derivative is reclassified as for trading purposes. Derivatives designated as hedges of anticipated transactions are reclassified as for trading purposes if the anticipated transaction is no longer probable.

The company included foreign currency exchange contract settlements within cash flows from operating activities, regardless of hedge accounting qualification. See Note 22 - Financial Instruments, to the Consolidated Financial Statements, for additional discussion regarding the company's objectives and strategies for derivative instruments.

Environmental Matters

Accruals for environmental matters are recorded when it is probable that a liability has been incurred and the amount of the liability can be reasonably estimated. These accruals are adjusted periodically as assessment and remediation efforts progress or as additional technical or legal information becomes available. Accruals for environmental liabilities are included in the Consolidated Balance Sheets in accrued and other current liabilities and other noncurrent obligations at undiscounted amounts. Accruals for related insurance or other third-party recoveries for environmental liabilities are recorded when it is probable that a recovery will be realized and are included in the Consolidated Balance Sheets as accounts and notes receivable - net.

Environmental costs are capitalized if the costs extend the life of the property, increase its capacity, and/or mitigate or prevent contamination from future operations. Environmental costs are also capitalized in recognition of legal asset retirement obligations resulting from the acquisition, construction and/or normal operation of a long-lived asset. Costs related to environmental contamination treatment and cleanup are charged to expense. Estimated future incremental operations, maintenance and management costs directly related to remediation are accrued when such costs are probable and reasonably estimable.

Revenue Recognition

The company recognizes revenue when its customer obtains control of promised goods or services, in an amount that reflects the consideration which the company expects to receive in exchange for those goods or services. To determine revenue recognition for the arrangements that the company determines are within the scope of FASB ASU No. 2014-09, Revenue from Contracts with Customers (Topic 606), the company performs the following five steps: (1) identify the contract(s) with a customer, (2) identify the performance obligations in the contract, (3) determine the transaction price, (4) allocate the transaction price to the performance obligations in the contract, and (5) recognize revenue when (or as) the entity satisfies a performance obligation. See Note 6 - Revenue, to the Consolidated Financial Statements, for additional information on revenue recognition.

Prepaid Royalties

The company currently has certain third-party biotechnology trait license agreements, which require up-front and variable payments subject to the licensor meeting certain conditions. These payments are reflected as other current assets and other assets and are amortized to cost of goods sold as seeds containing the respective trait technology are utilized over the life of the license. The rate of royalty amortization expense recognized is based on the company's strategic plans which include various assumptions and estimates including product portfolio, market dynamics, farmer preferences, growth rates and projected planted acres. Changes in factors and assumptions included in the strategic plans, including potential changes to the product portfolio in favor of internally developed biotechnology, could impact the rate of recognition of the relevant prepaid royalty.

At December 31, 2021, the balance of prepaid royalties reflected in other current assets and other assets was \$303 million and \$256 million, respectively. The majority of the balance of prepaid royalties relates to the company's wholly owned subsidiary, Pioneer Hi-Bred International, Inc.'s ("Pioneer") non-exclusive license in the United States and Canada for the Monsanto Company's Genuity® Roundup Ready 2 Yield® glyphosate tolerance trait and Roundup Ready 2 Xtend® glyphosate and dicamba tolerance trait for soybeans ("Roundup Ready 2 License Agreement"). Each of these licensed technologies are now trademarks of the Bayer Group, which acquired the Monsanto Company in 2018. The prepaid royalty asset relates to a series of up-front, fixed and variable royalty payments to utilize the traits in Pioneer's soybean product mix. The company's historical expectation has been that the technology licensed under the Roundup Ready 2 License Agreement would be used as the primary herbicide tolerance trait platform in the Pioneer® brand soybean through the term of the agreement. DAS and MS Technologies, L.L.C. jointly developed and own the Enlist E3™ herbicide tolerance trait for soybeans which provides tolerance to 2, 4-D choline in Enlist Duo® and Enlist One® herbicides, as well as glyphosate and glufosinate herbicides. In connection with the validation of breeding plans and large-scale product development timelines, during the fourth quarter of 2019, the company accelerated the ramp up of the Enlist E3™ trait platform in the company's soybean portfolio mix across all brands, including Pioneer® brands, over the subsequent five years. During the ramp-up period, the company is expected to significantly reduce the volume of products with the Roundup Ready 2 Yield® and Roundup Ready 2 Xtend® herbicide tolerance traits beginning in 2021, with expected minimal use of the trait platform thereafter for the remainder of the Roundup Ready 2 License Agreement (the "Transition Plan"). The rate of royalty expense has therefore increased significantly through higher amortization of the prepaid royalty as fewer seeds containing the respective trait are expected to be utilized.

In connection with the departure from these traits, beginning January 1, 2020 the company presents and discloses the non-cash accelerated prepaid royalty amortization expense as a component of restructuring and asset related charges - net, in the Consolidated Statement of Operations. The accelerated prepaid royalty amortization expense represents the difference between the rate of amortization based on the revised number of units expected to contain the Roundup Ready 2 Yield® and Roundup Ready 2 Xtend® trait technology and the variable cash rate per the Roundup Ready 2 License Agreement.

Further changes in factors and assumptions associated with usage of the trait platform licensed under the Roundup Ready 2 License Agreement, including the Transition Plan, could further impact the rate of recognition of the prepaid royalty and Consolidated Statement of Operations presentation of the accelerated prepaid royalty amortization expense.

Cost of Goods Sold

Cost of goods sold primarily includes the cost of manufacture and delivery, ingredients or raw materials, direct salaries, wages and benefits and overhead, non-capitalizable costs associated with capital projects, royalties and other operational expenses. No amortization of intangibles is included within cost of goods sold.

Research and Development

Research and development costs are expensed as incurred. Research and development expense includes costs (primarily consisting of employee costs, materials, contract services, research agreements, and other external spend) relating to the discovery and development of new products.

Selling, General and Administrative Expenses

Selling, general and administrative expenses primarily include selling and marketing expenses, commissions, functional costs, and business management expenses.

Integration and Separation Costs

Integration and separation costs includes costs incurred to prepare for and close the Merger, post-Merger integration expenses, and costs incurred to prepare for the Business Separations. These costs primarily consist of financial advisory, information technology, legal, accounting, consulting and other professional advisory fees associated with preparation and execution of these activities.

Litigation and Other Contingencies

Accruals for legal matters and other contingencies are recorded when it is probable that a liability has been incurred and the amount of the liability can be reasonably estimated. Legal costs, such as outside counsel fees and expenses, are charged to expense in the period incurred.

Severance Costs

Severance benefits are provided to employees under the company's ongoing benefit arrangements. Severance costs are accrued when management commits to a plan of termination and it becomes probable that employees will be entitled to benefits at amounts that can be reasonably estimated.

Insurance/Self-Insurance

The company self-insures certain risks where permitted by law or regulation, including workers' compensation, vehicle liability and employee related benefits. Liabilities associated with these risks are estimated in part by considering historical claims experience, demographic factors and other actuarial assumptions. For other risks, the company uses a combination of insurance and self-insurance, reflecting comprehensive reviews of relevant risks. A receivable for an insurance recovery is generally recognized when the loss has occurred and collection is considered probable.

Income Taxes

The company accounts for income taxes using the asset and liability method. Under this method, deferred tax assets and liabilities are recognized for the future tax consequences of temporary differences between the carrying amounts and tax bases of assets and liabilities using enacted tax rates. The effect of a change in tax rates on deferred tax assets or liabilities is recognized in income in the period that includes the enactment date.

The company recognizes the financial statement effects of an uncertain income tax position when it is more likely than not, based on the technical merits, that the position will be sustained upon examination. The current portion of uncertain income tax positions is included in income taxes payable or income tax receivable, and the long-term portion is included in other noncurrent obligations or other noncurrent assets in the Consolidated Balance Sheets.

Income tax related penalties are included in the provision for (benefit from) income taxes in the Consolidated Statements of Operations. Interest accrued related to unrecognized tax benefits is included within the provision for (benefit from) income taxes from continuing operations in the Consolidated Statements of Operations.

Earnings per Common Share

The calculation of earnings per common share is based on the weighted-average number of the company's common shares outstanding for the applicable period. The calculation of diluted earnings per common share reflects the effect of all potential common shares that were outstanding during the respective periods, unless the effect of doing so is antidilutive.

NOTE 3 - RECENT ACCOUNTING GUIDANCE**Recently Adopted Accounting Guidance**

In January 2021, the FASB issued ASU 2021-01, Reference Rate Reform (Topic 848): Scope, which provides certain optional expedients that allow derivative instruments impacted by changes in the interest rate used for margining, discounting or contract price alignment to qualify for certain optional relief. The amendments in this Update are effective immediately for all entities and may be applied retrospectively as of any date from the beginning of any interim period that includes March 12, 2020 or prospectively to new modifications subsequent to the issuance of this Update. The adoption of ASU 2021-01 did not have a material impact on the company's financial position, results of operation or cash flows.

In December 2019, the FASB issued ASU 2019-12, Income Taxes (Topic 740): Simplifying the Accounting for Income Taxes, which is part of the FASB's Simplification Initiative to identify, evaluate, and improve areas of U.S. GAAP for which cost and complexity can be reduced, while maintaining or improving the usefulness of the information provided to users of financial statements. This ASU amends ASC 740, Income Taxes, by removing certain exceptions to the general principles, and clarifying and amending current guidance. The new standard is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2020. The company adopted this guidance on January 1, 2021 and it did not have a material impact on the company's financial position, results of operation or cash flows.

Accounting Guidance Issued But Not Adopted as of December 31, 2021

In November 2021, the FASB issued ASU 2021-10, Government Assistance (Topic 832): Disclosures by Business Entities about Government Assistance, which requires business entities to disclose transactions with a governmental entity for which a grant or contribution accounting model is used in recognizing and measuring such transactions. This standard is effective for fiscal years beginning after December 15, 2021, and early adoption is permitted. The company is currently evaluating the impact of adopting this guidance.

NOTE 4 - COMMON CONTROL BUSINESS COMBINATIONS**DAS Common Control Combination**

Based on an evaluation of the provisions of ASC 805 (Business Combinations), Corteva and DAS represented entities under common control, as both shared DowDuPont as their parent company. As a result, the assets, liabilities and operations of

Corteva and DAS were combined at their historical carrying amounts, and periods prior to the Internal Reorganizations are adjusted as if Corteva and DAS had been combined since the Merger Effectiveness Time, when the entities were first under common control. Accordingly, in 2019, the accompanying Consolidated Financial Statements and Notes thereto were retrospectively revised to include the transferred net assets and results of operations of DAS beginning on September 1, 2017. Refer to Note 1 - Background and Basis of Presentation, for additional information on the common control combination.

Intercompany balances and transactions with Historical EID and DAS have been eliminated.

NOTE 5 - DIVESTITURES AND OTHER TRANSACTIONS

Separation Agreements

In connection with the Distributions, DuPont, Corteva, and Dow (together, the “Parties” and each a “Party”) entered into certain agreements to effect the separation, provide for the allocation of DowDuPont’s assets, employees, liabilities and obligations (including its investments, property and employee benefits and tax-related assets and liabilities) among the Parties, and provide a framework for Corteva’s relationship with Dow and DuPont following the separations and Distributions (collectively, the “Separation Agreements”). Effective April 1, 2019, the Parties entered into the following agreements referred to herein as: the Separation and Distribution Agreement (the “Corteva Separation Agreement”); the Tax Matters Agreement; the Employee Matters Agreement; and the Intellectual Property Cross-License Agreement.

Effective June 1, 2019, in connection with the Corteva Distribution, Corteva and DuPont entered into the following agreements: the Intellectual Property Cross-License Agreement (the “Corteva-DuPont IP Cross-License Agreement”); the Letter Agreement; and the Amended and Restated Tax Matters Agreement.

DuPont

Pursuant to the Separation Agreements, DuPont and Corteva indemnifies the other against certain litigation, environmental, tax, workers' compensation and other liabilities that arose prior to the Corteva Distribution. The term of this indemnification is generally indefinite and includes defense costs and expenses, as well as monetary and non-monetary settlements and judgments. In connection with the recognition of liabilities related to these matters, the company records an indemnification asset when recovery is deemed probable. At December 31, 2021, the indemnification assets are \$25 million within accounts and notes receivable - net and \$75 million within other assets in the Consolidated Balance Sheet. At December 31, 2021, the indemnification liabilities are \$75 million within other noncurrent obligations in the Consolidated Balance Sheet.

Dow

Pursuant to the Separation Agreements, Dow and Corteva indemnifies the other against certain litigation, environmental, tax and other liabilities that arose prior to the Corteva Distribution. The term of this indemnification is generally indefinite and includes defense costs and expenses, as well as monetary and non-monetary settlements and judgments. In connection with the recognition of liabilities related to these matters, the company records an indemnification asset when recovery is deemed probable. At December 31, 2021, the indemnification liabilities are \$20 million within accrued and other current liabilities and \$42 million within other noncurrent obligations in the Consolidated Balance Sheet.

EID ECP Divestiture

As discussed in Note 1 - Background and Basis of Presentation, on April 1, 2019, EID completed the transfer of the entities and related assets and liabilities of EID ECP to DowDuPont.

As a result, the financial results of EID ECP are reflected as discontinued operations, as summarized below:

(In millions)	For the Year Ended December 31, 2019
Net sales	\$ 362
Cost of goods sold	259
Research and development expense	4
Selling, general and administrative expenses	9
Amortization of intangibles	23
Restructuring and asset related charges - net	2
Integration and separation costs	44
Other income - net	2
(Loss) income from discontinued operations before income taxes	23
Provision for (benefit from) income taxes on discontinued operations	4
(Loss) income from discontinued operations after income taxes	\$ 19

The following table presents the depreciation, amortization of intangibles, and capital expenditures of the discontinued operations related to EID ECP:

(In millions)	For the Year Ended December 31, 2019
Depreciation	\$ 28
Amortization of intangibles	23
Capital expenditures	16

EID Specialty Products Divestiture

As discussed in Note 1 - Background and Basis of Presentation, on May 1, 2019, the company completed the transfer of the entities and related assets and liabilities of the EID Specialty Products Entities to DowDuPont.

As a result, the financial results of the EID Specialty Products Entities are reflected as discontinued operations, as summarized below:

(In millions)	For the Year Ended December 31, 2019
Net sales	\$ 5,030
Cost of goods sold	3,352
Research and development expense	204

EID Specialty Products Impairment

As a result of the Merger and related acquisition method of accounting, Historical DuPont's assets and liabilities were measured at fair value resulting in increases to the company's goodwill and other intangible assets. The fair value valuation increased the risk that any declines in financial projections, including changes to key assumptions, could have a material, negative impact on the fair value of the company's reporting units and assets, and therefore could result in an impairment.

As a result of the Internal Reorganization, in the second quarter of 2019, EID assessed the recoverability of the goodwill within the electronics and communications, protection solutions, nutrition and health, transportation and advanced polymers, packaging and specialty plastics, industrial biosciences, and clean technologies reporting units, and the overall carrying value of the net assets in the disposal group that was distributed to DowDuPont on May 1, 2019. As a result of this analysis, the company determined that the fair value of certain reporting units related to the EID specialty products businesses were below carrying value resulting in pre-tax, non-cash goodwill impairment charges totaling \$1,102 million reflected in (loss) income from discontinued operations after income taxes. Revised financial projections reflect unfavorable market conditions, driven by slowed demand in the biomaterials business unit, coupled with challenging conditions in U.S. bioethanol markets. These revised financial projections resulted in a reduction in the long-term forecasts of sales and profitability as compared to prior projections.

The company's analyses above using discounted cash flow models (a form of the income approach) utilized Level 3 unobservable inputs. The company's significant assumptions in these analyses include, but are not limited to, future cash flow projections, the weighted average cost of capital, the terminal growth rate, and the tax rate. The company's estimates of future cash flows are based on current regulatory and economic climates, recent operating results, and planned business strategies. These estimates could be negatively affected by changes in federal, state, or local regulations or economic downturns. Future cash flow estimates are, by their nature, subjective and actual results may differ materially from the company's estimates. The company also used a form of the market approach (utilizes Level 3 unobservable inputs), which is derived from metrics of publicly traded companies or historically completed transactions of comparable businesses. The selection of comparable businesses is based on the markets in which the reporting units operate giving consideration to risk profiles, size, geography, and diversity of products and services. As such, the company believes the current assumptions and estimates utilized are both reasonable and appropriate.

In addition, the company performed an impairment analysis related to the equity method investments held by the EID specialty products businesses, as of May 1, 2019. The company applied the net asset value method under the cost approach to determine the fair value of the equity method investments in the EID specialty products businesses. Based on updated projections, the company determined the fair value of an equity method investment was below the carrying value and had no expectation the fair value would recover in the short-term due to the current economic environment. As a result, management concluded the impairment was other-than-temporary and recorded an impairment charge of \$63 million, reflected in (loss) income from discontinued operations after income taxes. Additionally, this impairment is reflected within restructuring and asset related charges - net in the year ended December 31, 2019, within the table above.

The following table presents the depreciation, amortization of intangibles, and capital expenditures of the discontinued operations related to the EID Specialty Products Entities:

(In millions)	For the Year Ended December 31,	
	2019	
Depreciation	\$	281
Amortization of intangibles		267
Capital expenditures		481

Merger Remedy - Divested Ag Business

As a condition of the regulatory approval for the Merger, including by the European Commission, EID was required to divest (the "Divested Ag Business") certain assets related to its crop protection business and research and development ("R&D") organization, specifically EID's Cereal Broadleaf Herbicides and Chewing Insecticides portfolios, including Rynaxypyr®, Cyazypyr® and Indoxacarb as well as the crop protection R&D pipeline and organization, excluding seed treatment, nematicides, and late-stage R&D programs. On March 31, 2017, EID and FMC Corporation ("FMC") entered into a definitive agreement (the "FMC Transaction Agreement"), and on November 1, 2017 FMC acquired the Divested Ag Business. As a result of the agreement, EID entered into favorable contracts with FMC of \$495 million, which were recorded as intangible assets recognized at the fair value of off-market contracts.

For the year ended December 31, 2019, the company recorded income from discontinued operations after income taxes related to the Divested Ag Business of \$80 million related to changes in accruals for certain prior year tax positions.

Other Discontinued Operations Activity

For the year ended December 31, 2020, the company recorded income from discontinued operations after income taxes of \$10 million related to the adjustment of certain prior year tax positions for previously divested businesses. For the year ended December 31, 2019, the company recorded income from discontinued operations after income taxes of \$89 million related to the adjustment of certain unrecognized tax benefits for positions taken on items from prior years from previously divested businesses.

NOTE 6 - REVENUE

Revenue Recognition

Products

Substantially all of Corteva's revenue is derived from product sales. Product sales consist of sales of Corteva's products to farmers, distributors, and manufacturers. Corteva considers purchase orders, which in some cases are governed by master supply agreements, to be a contract with a customer. Contracts with customers are considered to be short-term when the time between order confirmation and satisfaction of the performance obligations is equal to or less than one year. However, the company has some long-term contracts which can span multiple years.

Revenue from product sales is recognized when the customer obtains control of the company's product, which occurs at a point in time according to shipping terms. Payment terms are generally less than one year from invoicing. The company elected the practical expedient and does not adjust the promised amount of consideration for the effects of a significant financing component when the company expects it will be one year or less between when a customer obtains control of the company's product and when payment is due. When the company performs shipping and handling activities after the transfer of control to the customer (e.g., when control transfers prior to or at shipment), these are considered fulfillment activities, and accordingly, the costs are accrued when the related revenue is recognized. Taxes collected from customers relating to product sales and remitted to governmental authorities are excluded from revenues. In addition, the company elected the practical expedient to expense any costs to obtain contracts as incurred, as the amortization period for these costs would have been one year or less.

The transaction price includes estimates of variable consideration, such as rights of return, rebates, and discounts, that are reductions in revenue. All estimates are based on the company's historical experience, anticipated performance, and the company's best judgment at the time the estimate is made. Estimates of variable consideration included in the transaction price primarily utilize the expected value method based on historical experience. These estimates are reassessed each reporting period and are included in the transaction price to the extent it is probable that a significant reversal of cumulative revenue recognized will not occur upon resolution of uncertainty associated with the variable consideration. The majority of contracts have a single performance obligation satisfied at a point in time and the transaction price is stated in the contract, usually as quantity times price per unit. For contracts with multiple performance obligations, the company allocates the transaction price to each performance obligation based on the relative standalone selling price. The standalone selling price is the observable price which depicts the price as if sold to a similar customer in similar circumstances.

Licenses of Intellectual Property

Corteva enters into licensing arrangements with customers under which it licenses its intellectual property. Revenue from the majority of intellectual property licenses is derived from sales-based royalties. Revenue for licensing agreements that contain sales-based royalties is recognized at the later of (i) when the subsequent sale occurs or (ii) when the performance obligation to which some or all of the royalty has been allocated is satisfied.

Remaining Performance Obligations

Remaining performance obligations represent the transaction price allocated to unsatisfied or partially unsatisfied performance obligations. The company applies the practical expedient to disclose the transaction price allocated to remaining performance obligations for only those contracts with an original duration of one year or more. The transaction price allocated to remaining performance obligations with an original duration of more than one year related to material rights granted to customers for contract renewal options were \$123 million and \$115 million at December 31, 2021 and December 31, 2020, respectively. The company expects revenue to be recognized for the remaining performance obligations evenly over the period of 1 year to 6 years.

Contract Balances

Contract liabilities primarily reflect deferred revenue from prepayments under contracts with customers where the company receives advance payments for products to be delivered in future periods. Corteva classifies deferred revenue as current or noncurrent based on the timing of when the company expects to recognize revenue. Contract assets primarily include amounts related to conditional rights to consideration for completed performance not yet invoiced. Accounts receivable are recorded when the right to consideration becomes unconditional.

Corteva, Inc.
Notes to the Consolidated Financial Statements (continued)

Contract Balances (In millions)	December 31, 2021	December 31, 2020
Accounts and notes receivable - trade ¹	\$ 3,561	\$ 3,917

Deferred revenue - current	\$ 3,201	\$ 2,662
Deferred revenue - noncurrent ⁴	\$ 120	\$ 116

^{1.} Included in accounts and notes receivable - net in the Consolidated Balance Sheets.

^{2.} Included in other current assets in the Consolidated Balance Sheets.

^{3.} Included in other assets in the Consolidated Balance Sheets.

^{4.} Included in other noncurrent obligations in the Consolidated Balance Sheets.

Revenue recognized during the year ended December 31, 2021, December 31, 2020, and December 31, 2019 from amounts included in deferred revenue at the beginning of the period was \$2,613 million, \$2,540 million, and \$2,146 million, respectively.

Disaggregation of Revenue

Corteva's operations are classified into two reportable segments: Seed and Crop Protection. The company disaggregates its revenue by major product line and geographic region, as the company believes it best depicts the nature, amount and timing of its revenue and cash flows. Net sales by major product line are included below:

(In millions)	For the Year Ended December 31,		
	2021	2020	2019
Corn	\$ 5,618	\$ 5,182	\$ 5,126
Soybean	1,568	1,445	1,387
Other oilseeds	752	619	593
Other	464	510	484
Seed	8,402	7,756	7,590
Herbicides	3,815	3,280	3,206
Insecticides	1,730	1,764	1,652
Fungicides	1,310	1,032	1,072
Other	398	385	326
Crop Protection	7,253	6,461	6,256
Total	\$ 15,655	\$ 14,217	\$ 13,846

Corteva, Inc.
Notes to the Consolidated Financial Statements (continued)

Sales are attributed to geographic regions based on customer location. Net sales by geographic region and segment are included below:

Seed (In millions)	For the Year Ended December 31,		
	2021	2020	2019
North America ¹	\$ 5,004	\$ 4,795	\$ 4,724

Total	\$ 7,253	\$ 6,461	\$ 6,256

1. Represents U.S. & Canada.
2. Europe, Middle East, and Africa ("EMEA").

Refer to Note 24 - Geographic Information, for the breakout of consolidated net sales by geographic area.

NOTE 7 - RESTRUCTURING AND ASSET RELATED CHARGES - NET

2021 Restructuring Actions

During the first quarter of 2021, Corteva approved restructuring actions designed to right-size and optimize its footprint and organizational structure according to the business needs in each region with the focus on driving continued cost improvement and productivity. The company recorded net pre-tax restructuring charges in 2021 under the 2021 Restructuring Actions, as disclosed in the tables below. The company does not anticipate any additional material charges from the 2021 Restructuring Actions as actions associated with this charge are substantially complete.

The charges related to the 2021 Restructuring Actions related to the segments, as well as corporate expenses, were as follows:

(In millions)	For the Year Ended December 31, 2021
Seed	\$ 31
Crop Protection	55
Corporate expenses	81
Total	\$ 167

The following table is a summary of charges incurred related to 2021 Restructuring Actions for the year ended December 31, 2021:

(In millions)	For the Year Ended December 31, 2021
Severance and related benefit costs	\$ 74
Asset related charges	51
Contract termination charges	42
Total restructuring and asset charges - net	\$ 167

Corteva, Inc.
Notes to the Consolidated Financial Statements (continued)

A reconciliation of the December 31, 2020 to the December 31, 2021 liability balances related to the 2021 Restructuring Actions is summarized below:

(In millions)	<i>Severance and Related Benefit Costs</i>	<i>Asset Related¹</i>	<i>Contract Termination²</i>	<i>Total</i>
Balance at December 31, 2020	\$ —	\$ —	\$ —	\$ —
Charges to income from continuing operations	74	51	42	167
Payments	(22)	—	(30)	(52)
Asset write-offs	—	(51)	—	(51)
Balance at December 31, 2021	\$ 52	\$ —	\$ 12	\$ 64

1. In addition, the company has a liability recorded for asset retirement obligations of \$6 million as of December 31, 2021.
2. The liability for contract terminations includes lease obligations. The cash impact of these obligations will be substantially complete by the end of 2022.

Execute to Win Productivity Program

During the first quarter of 2020, Corteva approved restructuring actions designed to improve productivity through optimizing certain operational and organizational structures primarily related to the Execute to Win Productivity Program. The company recorded net pre-tax restructuring charges of \$185 million inception-to-date under the Execute to Win Productivity Program, consisting of \$124 million of asset related charges and \$61 million of severance and related benefit costs. Actions associated with the Execute to Win Productivity Program were substantially complete by the end of 2020.

The Execute to Win Productivity Program charges related to the segments, as well as corporate expenses, were as follows:

(In millions)	For the Year Ended December 31,	
	2021	2020
Seed	\$ —	\$ 15
Crop Protection	11	98
Corporate expenses	(2)	63
Total	\$ 9	\$ 176

The below is a summary of charges incurred related to the Execute to Win Productivity Program for the year ended December 31, 2020:

(In millions)	For the Year Ended December 31,	
	2021	2020
Severance and related benefit costs - net	\$ (2)	\$ 63
Asset related charges	11	113
Total restructuring and asset related charges - net	\$ 9	\$ 176

A reconciliation of the December 31, 2020 to the December 31, 2021 liability balances related to the Execute to Win Productivity Program is summarized below:

(In millions)	<i>Severance and Related Benefit (Credits) Costs</i>	<i>Asset Related¹</i>	<i>Total</i>
Balance at December 31, 2020	\$ 53	\$ 3	\$ 56
Charges to income from continuing operations for the year ended December 31, 2021	(2)	11	9
Payments	(27)	(3)	(30)
Asset write-offs	—	(11)	(11)
Balance at December 31, 2021	\$ 24	\$ —	\$ 24

1. In addition, the company has a liability recorded for asset retirement obligations of \$13 million as of December 31, 2021.

DowDuPont Cost Synergy Program

In September and November 2017, DowDuPont and EID approved post-merger restructuring actions under the DowDuPont Cost Synergy Program (the “Synergy Program”), adopted at the time by the DowDuPont Board of Directors. The Synergy Program was designed to integrate and optimize the organization following the Merger and in preparation for the Business Separations. The company recorded net pre-tax restructuring charges of \$833 million inception-to-date under the Synergy Program, consisting of severance and related benefit costs of \$316 million, contract termination costs of \$190 million, and asset related charges of \$327 million. Actions associated with the Synergy Program, including employee separations, were substantially complete by the end of 2019.

The Synergy Program net charges (benefits) related to the segments, as well as corporate expenses, were as follows:

(In millions)	For the Year Ended December 31,		
	2021	2020	2019
Seed	\$ (8)	\$ (9)	\$ 66
Crop Protection	(3)	11	27
Corporate expenses	(1)	(2)	(1)
Total	\$ (12)	\$ —	\$ 92

The below is a summary of net charges (benefits) incurred related to the Synergy Program for the years ended December 31, 2021, 2020 and 2019:

(In millions)	For the Year Ended December 31,		
	2021	2020	2019
Severance and related benefit (credits) costs - net	\$ (1)	\$ (2)	\$ (7)
Contract termination charges	(3)	—	69
Asset related charges	(8)	2	30
Total restructuring and asset related charges - net	\$ (12)	\$ —	\$ 92

Other Asset Related Charges

For the years ended December 31, 2021 and 2020, the company recognized \$125 million and \$159 million, respectively, in restructuring and asset related charges - net in the Consolidated Statements of Operations, from non-cash accelerated prepaid royalty amortization expense related to Roundup Ready 2 Yield® and Roundup Ready 2 Xtend® herbicide tolerance traits.

Asset Impairment

During the year ended December 31, 2019, the company recognized non-cash impairment charges of \$144 million pre-tax (\$110 million after-tax) in restructuring and asset related charges - net in the company's Consolidated Statements of Operations related to certain in-process research and development (“IPR&D”) assets within the seed segment. Refer to Note 15 - Goodwill and Other Intangible Assets, and Note 23 - Fair Value Measurements, for further information.

NOTE 8 - RELATED PARTY TRANSACTIONS

Services Provided by and to Historical Dow and its affiliates

Following the Merger and prior to the Dow Distribution, Corteva reported transactions with Historical Dow and its affiliates as related party transactions.

Transactions with DowDuPont

In 2019 DowDuPont contributed cash to Corteva to fund portions of the company's debt redemption/repayment transactions. See Note 17 - Long-Term Debt and Available Credit Facilities, to the Consolidated Financial Statements, for additional information.

In February 2019, the DowDuPont Board declared first quarter dividends per share of DowDuPont common stock payable on March 15, 2019. EID declared and paid distributions to DowDuPont of about \$317 million for the year ended December 31, 2019 to fund a portion of DowDuPont's dividend payments.

Corteva, Inc.
Notes to the Consolidated Financial Statements (continued)

NOTE 9 - SUPPLEMENTARY INFORMATION

Other Income - Net (In millions)	For the Year Ended December 31,		
	2021	2020	2019
Interest income	\$ 77	\$ 56	\$ 59
Equity in earnings (losses) of affiliates - net	14	—	(9)
Net gain (loss) on sales of businesses and other assets ¹	21	(2)	64
Net exchange gains (losses) ²	(54)	(174)	(99)
Non-operating pension and other post employment benefit credit (costs) ³	1,318	368	191
Miscellaneous income (expenses) - net ⁴	(28)	(36)	9
Other income - net	\$ 1,348	\$ 212	\$ 215

1. The year ended December 31, 2021 includes a gain of \$19 million relating to the sale of a business in Asia Pacific in the crop protection segment. The year ended December 31, 2020 includes a loss of \$(53) million and a gain of \$27 million relating to the expected sale of the La Porte site, for which the company signed an agreement in 2020, and the sale of a business in Asia Pacific in the crop protection segment, respectively.
2. Includes net pre-tax exchange gains (losses) of \$(67) million, \$(82) million and \$(51) million associated with the devaluation of the Argentine peso for the years ended December 31, 2021, 2020 and 2019, respectively.
3. Includes non-service related components of net periodic benefit credits (costs) (interest cost, expected long-term rate of return on plan assets, amortization of unrecognized gain (loss), amortization of prior service benefit and settlement gain (loss)).
4. Miscellaneous income (expenses) - net, includes losses from sale of receivables, tax indemnification adjustments related to changes in indemnification balances as a result of the application of the terms of the Tax Matters Agreement between Corteva and Dow and/or DuPont, and other items. The year ended December 31, 2021 also includes the Employee Retention Credit of \$60 million pursuant to the Coronavirus Aid, Relief, and Economic Security ("CARES") Act as enhanced by the Consolidated Appropriations Act ("CAA") and American Rescue Plan Act ("ARPA"), a gain from the remeasurement of an equity investment of \$47 million, a charge related to a contract termination with a third-party service provider of \$(54) million and the 2021 officer indemnification payment.

Corteva, Inc.
Notes to the Consolidated Financial Statements (continued)

The following table summarizes the impacts of the company's foreign currency hedging program on the company's results of operations. The company routinely uses foreign currency exchange contracts to offset its net exposures, by currency, related to the foreign currency-denominated monetary assets and liabilities. The objective of this program is to maintain an approximately balanced position in foreign currencies in order to minimize, on an after-tax basis, the effects of exchange rate changes on net monetary asset positions. The hedging program gains (losses) are largely taxable (tax deductible) in the United States (U.S.), whereas the offsetting exchange gains (losses) on the remeasurement of the net monetary asset positions are often not taxable (tax deductible) in their local jurisdictions. The net pre-tax exchange gains (losses) are recorded in other income - net and the related tax impact is recorded in provision for (benefit from) income taxes on continuing operations in the Consolidated Statements of Operations.

(In millions)	For the Year Ended December 31,		
	2021	2020	2019
Subsidiary Monetary Position Gain (Loss)			
Pre-tax exchange gain (loss)	\$ (72)	\$ (263)	\$ (41)
Local tax (expenses) benefits	(30)	34	2
Net after-tax impact from subsidiary exchange gain (loss)	\$ (102)	\$ (229)	\$ (39)
Hedging Program Gain (Loss)			
Pre-tax exchange gain (loss)	\$ 18	\$ 89	\$ (58)
Tax (expenses) benefits	(4)	(21)	13
Net after-tax impact from hedging program exchange gain (loss)	\$ 14	\$ 68	\$ (45)
Total Exchange Gain (Loss)			
Pre-tax exchange gain (loss)	\$ (54)	\$ (174)	\$ (99)
Tax (expenses) benefits	(34)	13	15
Net after-tax exchange gain (loss)	\$ (88)	\$ (161)	\$ (84)

Cash, cash equivalents and restricted cash equivalents

The following table provides a reconciliation of cash and cash equivalents and restricted cash equivalents presented in the Consolidated Balance Sheets to the total cash, cash equivalents and restricted cash equivalents presented in the Consolidated Statements of Cash Flows. Corteva classifies restricted cash equivalents as current or noncurrent based on the nature of the restrictions, which are included in other current assets and other assets, respectively, in the Consolidated Balance Sheets.

(In millions)	December 31, 2021	December 31, 2020
Cash and cash equivalents	\$ 4,459	\$ 3,526
Restricted cash equivalents	377	347
Total cash, cash equivalents and restricted cash equivalents	\$ 4,836	\$ 3,873

Restricted cash equivalents primarily relates to (i) a trust funded by EID for cash obligations under certain non-qualified benefit and deferred compensation plans due to the Merger, which was a change in control event, and is classified as current; and (ii) contributions to the MOU Escrow Account as further described in Note 18 - Commitments and Contingent Liabilities, to the Consolidated Financial Statements, which is classified as noncurrent.

Accounts payable

Accounts payable was \$4,126 million and \$3,615 million at December 31, 2021 and December 31, 2020, respectively. Accounts payable - trade, which is a component of accounts payable, was \$3,023 million and \$2,557 million at December 31, 2021 and December 31, 2020, respectively. Accounts payable - other, which is a component of accounts payable, was \$1,103 million and \$1,058 million at December 31, 2021 and December 31, 2020, respectively. No other components of accounts payable were more than 5 percent of total current liabilities.

Corteva, Inc.
Notes to the Consolidated Financial Statements (continued)

NOTE 10 - INCOME TAXES

Domestic and foreign components of the income (loss) from continuing operations before income taxes and the provision for (benefit from) current and deferred tax expense (benefit) are shown below:

Geographic Allocation of Income (Loss) and Provision for (Benefit from) Income Taxes	For the Year Ended December 31,		
	2021	2020	2019
(In millions)			
Income (loss) from continuing operations before income taxes			
Domestic	\$ 941	\$ (83)	\$ (1,352)
Foreign	1,405	758	1,036
Income (loss) from continuing operations before income taxes	\$ 2,346	\$ 675	\$ (316)
Current tax expense (benefit)			
Federal	\$ (13)	\$ 28	\$ (11)
State and local	6	9	1
Foreign	329	222	317
Total current tax expense (benefit)	\$ 322	\$ 259	\$ 307
Deferred tax expense (benefit)			
Federal	\$ 164	\$ (116)	\$ (392)
State and local	55	27	156
Foreign	(17)	(251)	(117)
Total deferred tax expense (benefit)	\$ 202	\$ (340)	\$ (353)
Provision for (benefit from) income taxes on continuing operations	524	(81)	(46)
Net income (loss) from continuing operations after taxes	\$ 1,822	\$ 756	\$ (270)

The effective income tax rate applicable to income (loss) from continuing operations before income taxes was different from the statutory U.S. federal income tax rate due to the factors listed in the following table:

Reconciliation to U.S. Statutory Rate	For the Year Ended December 31,		
	2021	2020	2019
Statutory U.S. federal income tax rate	21.0 %	21.0 %	21.0 %
Effective tax rates on international operations - net ¹	(2.5)	(13.9)	(18.4)
Acquisitions, divestitures and ownership restructuring activities ²	(0.1)	(0.3)	(10.7)
U.S. research and development credit	(2.4)	(2.9)	7.0
Exchange gains/losses ³	1.9	3.5	(1.8)
State and local incomes taxes - net	2.1	4.0	3.2
Impact of Swiss Tax Reform ⁴	0.2	(27.0)	11.9
Excess tax benefits/deficiencies from stock compensation	(0.2)	1.0	(0.6)
Tax settlements and expiration of statute of limitations	—	0.4	3.9
Other - net	2.3	2.2	(0.9)
Effective tax rate on income from continuing operations	22.3 %	(12.0)%	14.6 %

1. Includes the effects of local and U.S. taxes related to earnings of non-U.S. subsidiaries, changes in the amount of unrecognized tax benefits associated with these earnings, losses at non-U.S. subsidiaries without local tax benefits due to valuation allowances, and other permanent differences between tax and U.S. GAAP results. Includes a tax benefit of \$(51) million for the year ended December 31, 2020, related to a return to accrual adjustment associated with an elective change in accounting method for the 2019 tax year impact of foreign tax provisions.
2. See Notes 4 - Common Control Business Combination, and Note 5 - Divestitures and Other Transactions, to the Consolidated Financial Statements, for additional information.
3. Principally reflects the impact of foreign exchange gains and losses on net monetary assets for which no corresponding tax impact is realized. Further information about the company's foreign currency hedging program is included in Note 9 - Supplementary Information, and Note 22 - Financial Instruments, under the heading Foreign Currency Risk.
4. Reflects tax benefits of \$(182) million primarily driven by the recognition of an elective cantonal component of the recent enactment of the Federal Act on Tax Reform and AHV Financing ("Swiss Tax Reform") for the year ended December 31, 2020. Reflects tax benefits of \$(38) million associated with the enactment of the Federal Act on Tax Reform and AHV Financing ("Swiss Tax Reform"), for the year ended December 31, 2019.

Corteva, Inc.

1. Prior year classifications in property and other accruals and reserves have been adjusted from their previous presentation. Adjustments did not impact the amount of the net deferred tax asset (liability) recorded in the Consolidated Balance Sheets.
2. Primarily related to the realization of recorded tax benefits on tax loss and credit carryforwards from operations in the United States, Brazil, and Spain.
3. In connection with the company's 2021 internal legal entity restructuring, the company reduced various state net operating loss carryforwards and corresponding full valuation allowances by \$61 million. There was no impact on the statement of operations. During the year ended December 31, 2020, the company established a \$19 million state tax valuation allowance in the U.S. based on a change in judgement about the realizability of a deferred tax asset.

Details of the company's operating loss and tax credit carryforwards are shown in the following table:

Operating Loss and Tax Credit Carryforwards	<i>Deferred Tax Asset</i>	
(In millions)	2021	2020

Total accrual for interest and penalties associated with unrecognized tax benefits at end of period	\$ 11	\$ 18	\$ 24

Each year the company files hundreds of tax returns in the various national, state and local income taxing jurisdictions in which it operates. These tax returns are subject to examination and possible challenge by the tax authorities. Positions challenged by the tax authorities may be settled or appealed by the company. As a result, there is an uncertainty in income taxes recognized in the company's financial statements in accordance with accounting for income taxes and accounting for uncertainty in income taxes. It is reasonably possible that changes to the company's global unrecognized tax benefits could be significant; however, due to the uncertainty regarding the timing of completion of audits and possible outcomes, a current estimate of the range of increases or decreases that may occur within the next twelve months cannot be made. As of December 31, 2021, the company has made advance deposits of approximately \$102 million to a foreign taxing authority, partially as a prerequisite to petition the court related to an open tax examination. These payments are accounted for as a prepaid asset, included in other assets in the Consolidated Balance Sheets.

Tax years that remain subject to examination for the company's major tax jurisdictions are shown below:

Tax Years Subject to Examination by Major Tax Jurisdiction at December 31, 2021	<i>Earliest Open Year</i>
<i>Jurisdiction</i>	
Argentina	2015
Brazil	2014
Canada	2012
China	2014
France	2019
India	2015
Italy	2016
Switzerland	2016
United States:	
Federal income tax	2012
State and local income tax	2008

Undistributed earnings of foreign subsidiaries and related companies that are deemed to be indefinitely invested amounted to \$3,681 million at December 31, 2021. Distributions of profits from non-U.S. subsidiaries are not expected to cause a significant incremental U.S. tax impact in the future; however, those distributions may still be subject to certain taxes upon repatriation, primarily where foreign withholding taxes apply. The company is asserting indefinite reinvestment related to certain investments in foreign subsidiaries. Determination of the amount of unrecognized deferred tax liability related to indefinitely reinvested profits is not feasible primarily due to our legal entity structure and the complexity of U.S. and local tax laws.

For periods between the Merger Effectiveness Time and the Corteva Distribution, Corteva and its subsidiaries were included in DowDuPont's consolidated federal income tax group and consolidated tax return. Generally, the consolidated tax liability of the

DowDuPont U.S. tax group for each year was apportioned among the members of the consolidated group based on each member's separate taxable income. Corteva, DuPont and Dow intend that to the extent Federal and/or State corporate income tax liabilities are reduced through the utilization of tax attributes of the other, settlement of any receivable and payable generated from the use of the other party's sub-group attributes will be in accordance with a tax sharing agreement and/or tax matters agreement. See Note 5 - Divestitures and Other Transactions, to the Consolidated Financial Statements for further information related to indemnifications between Corteva, Dow and DuPont.

NOTE 11 - EARNINGS PER SHARE OF COMMON STOCK

On June 1, 2019, the date of the Corteva Distribution, 748,815,000 shares of the company's common stock were distributed to DowDuPont shareholders of record as of May 24, 2019.

The following tables provide earnings per share calculations for the periods indicated below:

Net Income (Loss) for Earnings Per Share Calculations - Basic and Diluted (In millions)	For the Year Ended December 31,		
	2021	2020	2019
Income (loss) from continuing operations after income taxes	\$ 1,822	\$ 756	\$ (270)
Net income (loss) attributable to continuing operations noncontrolling interests	10	20	13
Income (loss) from continuing operations attributable to Corteva common stockholders	1,812	736	(283)
(Loss) income from discontinued operations, net of tax	(53)	(55)	(671)
Net income (loss) attributable to discontinued operations noncontrolling interests	—	—	5
(Loss) income from discontinued operations attributable to Corteva common stockholders	(53)	(55)	(676)
Net income (loss) attributable to common stockholders	\$ 1,759	\$ 681	\$ (959)

Earnings (Loss) Per Share Calculations - Basic (Dollars per share)	For the Year Ended December 31,		
	2021	2020	2019
Earnings (loss) per share of common stock from continuing operations	\$ 2.46	\$ 0.98	\$ (0.38)
(Loss) earnings per share of common stock from discontinued operations	(0.07)	(0.07)	(0.90)
Earnings (loss) per share of common stock	\$ 2.39	\$ 0.91	\$ (1.28)

Earnings (Loss) Per Share Calculations - Diluted (Dollars per share)	For the Year Ended December 31,		
	2021	2020	2019
Earnings (loss) per share of common stock from continuing operations	\$ 2.44	\$ 0.98	\$ (0.38)
(Loss) earnings per share of common stock from discontinued operations	(0.07)	(0.07)	(0.90)
Earnings (loss) per share of common stock	\$ 2.37	\$ 0.91	\$ (1.28)

Share Count Information (Shares in millions)	For the Year Ended December 31,		
	2021	2020	2019
Weighted-average common shares - basic ¹	735.9	748.7	749.5
Plus dilutive effect of equity compensation plans ²	5.7	2.5	—
Weighted-average common shares - diluted	741.6	751.2	749.5
Potential shares of common stock excluded from EPS calculations ³	2.8	9.4	14.4

1. Share amounts for all periods prior to the Corteva Distribution were based on 748.8 million shares of Corteva, Inc. common stock distributed to holders of DowDuPont's common stock on June 1, 2019, plus 0.6 million of additional shares in which accelerated vesting conditions have been met.
2. Diluted earnings (loss) per share considers the impact of potentially dilutive securities except in periods in which there is a loss because the inclusion of the potential common shares would have an anti-dilutive effect.
3. These outstanding potential shares of common stock relating to stock options, restricted stock units and performance-based restricted stock units were excluded from the calculation of diluted earnings (loss) per share because (i) the effect of including stock options and restricted stock units would have been anti-dilutive; and (ii) the performance metrics have not yet been achieved for the outstanding potential shares relating to performance-based restricted stock units, which are deemed to be contingently issuable.

NOTE 12 - ACCOUNTS AND NOTES RECEIVABLE - NET

(In millions)	December 31, 2021	December 31, 2020
Accounts receivable – trade ¹	\$ 3,441	\$ 3,754
Notes receivable – trade ^{1,2}	120	163
Other ³	1,250	1,009
Total accounts and notes receivable - net	\$ 4,811	\$ 4,926

- ¹ Accounts receivable – trade and notes receivable – trade are net of allowances of \$210 million and \$208 million at December 31, 2021 and December 31, 2020, respectively. Allowances are equal to the estimated uncollectible amounts and are based on the expected credit losses and were developed using a loss-rate method.
- ² Notes receivable – trade primarily consists of receivables for deferred payment loan programs for the sale of seed products to customers. These loans have terms of one year or less and are primarily concentrated in North America. The company maintains a rigid pre-approval process for extending credit to customers in order to manage overall risk and exposure associated with credit losses. As of December 31, 2021 and 2020, there were no significant impairments related to current loan agreements.
- ³ Other includes receivables in relation to indemnification assets, value added tax, general sales tax and other taxes. No individual group represents more than 10 percent of total receivables. In addition, Other includes amounts due from nonconsolidated affiliates of \$104 million and \$106 million as of December 31, 2021 and 2020, respectively.

Accounts and notes receivable are carried at the expected amount to be collected, which approximates fair value. The company establishes the allowance for doubtful receivables using a loss-rate method where the loss rate is developed using past events, historical experience, current conditions and forecasts that affect the collectability of the financial assets.

The following table summarizes changes in the allowance for doubtful receivables for the year ended December 31, 2021 and 2020, respectively:

(In millions)	
2020	
Balance at December 31, 2019	\$ 174
Net provision for credit losses ¹	52
Write-offs charged against allowance / other ¹	(18)
Balance at December 31, 2020	\$ 208
2021	
Balance at December 31, 2020	\$ 208
Net provision for credit losses	1
Write-offs charged against allowance / other	1
Balance at December 31, 2021	\$ 210

¹ Prior year classifications in the changes in the allowance for doubtful receivables have been adjusted from their previous presentation. Adjustments did not impact the amount of the provision or the allowance for doubtful receivables recorded in the Consolidated Statements of Operations or the Consolidated Balance Sheets.

The company enters into various factoring agreements with third-party financial institutions to sell its trade receivables under both recourse and non-recourse agreements in exchange for cash proceeds. These financing arrangements result in a transfer of the company's receivables and risks to the third-party. As these transfers qualify as true sales under the applicable accounting guidance, the receivables are derecognized from the Consolidated Balance Sheets upon transfer, and the company receives a payment for the receivables from the third-party within a mutually agreed upon time period. For arrangements involving an element of recourse, which is typically provided through a guarantee of accounts in the event of customer default, the guarantee obligation is measured using market data from similar transactions and reported as a current liability in the Consolidated Balance Sheets.

Trade receivables sold under these agreements were \$272 million, \$255 million, and \$328 million for the years ended December 31, 2021, 2020 and 2019, respectively. The trade receivables sold that remained outstanding under these agreements which include an element of recourse as of December 31, 2021 and December 31, 2020 were \$166 million and \$157 million, respectively. The net proceeds received were included in cash provided by (used for) operating activities in the Consolidated

Corteva, Inc.
Notes to the Consolidated Financial Statements (continued)

Statements of Cash Flows. The difference between the carrying amount of the trade receivables sold and the sum of the cash received is recorded as a loss on sale of receivables in other income - net in the Consolidated Statements of Operations. The loss on sale of receivables were \$54 million, \$55 million, and \$44 million for the years ended December 31, 2021, 2020 and 2019, respectively. See Note 18 - Commitments and Contingent Liabilities, to the Consolidated Financial Statements, for additional information on the company's guarantees.

NOTE 13 - INVENTORIES

(In millions)	December 31, 2021	December 31, 2020
Finished products	\$ 2,497	\$ 2,584
Semi-finished products	2,076	1,813
Raw materials and supplies	607	485
Total inventories	\$ 5,180	\$ 4,882

As a result of the Merger, a fair value step-up of \$2,297 million was recorded for inventories. This fair value step-up was fully amortized, as of December 31, 2019. During the year ended December 31, 2019, the company recognized \$272 million in cost of goods sold in the Consolidated Statements of Operations related to the amortization of the step-up.

NOTE 14 - PROPERTY, PLANT AND EQUIPMENT

(In millions)	December 31, 2021	December 31, 2020
Land and land improvements	\$ 420	\$ 451
Buildings	1,487	1,525
Machinery and equipment	5,729	5,556
Construction in progress	728	721
Total property, plant and equipment	8,364	8,253
Accumulated depreciation	(4,035)	(3,857)
Total property, plant and equipment - net	\$ 4,329	\$ 4,396

Buildings, machinery and equipment and land improvements are depreciated over useful lives on a straight-line basis ranging from 2 to 25 years. Capitalizable costs associated with computer software for internal use are amortized on a straight-line basis over 2 to 7 years.

(In millions)	For the Year Ended December 31,		
	2021	2020	2019
Depreciation expense	\$ 521	\$ 495	\$ 525

NOTE 15 - GOODWILL AND OTHER INTANGIBLE ASSETS

Goodwill

The following table summarizes changes in the carrying amount of goodwill by segment for the years ended December 31, 2021 and 2020, respectively.

(In millions)	Crop Protection	Seed	Total
Balance as of December 31, 2019	\$ 4,743	\$ 5,486	\$ 10,229
Currency translation adjustment	31	38	69
Other goodwill adjustments and acquisitions ¹	(29)	—	(29)
Balance as of December 31, 2020	\$ 4,745	\$ 5,524	\$ 10,269
Currency translation adjustment	(73)	(87)	(160)
Other goodwill adjustments and acquisitions ²	—	(2)	(2)
Balance as of December 31, 2021	\$ 4,672	\$ 5,435	\$ 10,107

¹ Primarily consists of the goodwill included in the sale of businesses in the crop protection segment.

² Consists of the goodwill included in the sale of a business in the seed segment.

The company tests goodwill for impairment annually (during the fourth quarter), or more frequently when events or changes in circumstances indicate it is more likely than not that the fair value of a reporting unit has declined below its carrying value. As mentioned in Note 2 - Summary of Significant Accounting Policies, as a result of the Internal Reorganizations and Business Realignment, the company changed its reportable segments to seed and crop protection to reflect the manner in which the company's chief operating decision maker assesses performance and allocates resources. The change in reportable segments resulted in changes to the company's reporting units for goodwill impairment testing to align with the level at which discrete financial information is available for review by management. The company's reporting units include seed, crop protection and digital.

During the second quarter of 2020, the company determined a triggering event had occurred as a result of changes in the company's long-term projections driven largely by the impacts of the COVID-19 pandemic on the mid-term forecasted cash flows of the business, including, but not limited to currency fluctuations, expectations of future planted area (as influenced by consumer demand, ethanol markets and government policies and regulations) and relative commodity prices, which required an interim impairment assessment for its seed and crop protection reporting units and trade name indefinite lived intangible asset. Based on the impairment analysis performed over the company's trade name indefinite lived intangible asset it was determined that the fair value approximated the carrying value, and no impairment charge was necessary.

The company performed quantitative testing on all of its reporting units and determined that no goodwill impairments existed in 2021 and 2020. As of December 31, 2021, accumulated impairment losses on goodwill were \$4,503 million.

Other Intangible Assets

The gross carrying amounts and accumulated amortization of other intangible assets by major class are as follows:

(In millions)	December 31, 2021			December 31, 2020		
	Gross	Accumulated Amortization	Net	Gross	Accumulated Amortization	Net
Intangible assets subject to amortization (Definite-lived):						
Germplasm	\$ 6,265	\$ (571)	\$ 5,694	\$ 6,265	\$ (317)	\$ 5,948
Customer-related	1,953	(487)	1,466	1,984	(380)	1,604
Developed technology	1,485	(679)	806	1,451	(525)	926
Trademarks/trade names ¹	2,012	(172)	1,840	2,019	(99)	1,920
Favorable supply contracts	475	(396)	79	475	(302)	173
Other ²	405	(256)	149	405	(239)	166
Total other intangible assets with finite lives	12,595	(2,561)	10,034	12,599	(1,862)	10,737
Intangible assets not subject to amortization (Indefinite-lived):						
IPR&D	10	—	10	10	—	10
Total other intangible assets	10	—	10	10	—	10
Total	\$ 12,605	\$ (2,561)	\$ 10,044	\$ 12,609	\$ (1,862)	\$ 10,747

1. Beginning on October 1, 2020, the company changed its indefinite life assertion of its trade name asset to definite lived with a useful life of 25 years. This change is the result of the launch of Brevant™ seed in the retail channel in the U.S. Prior to changing the useful life of the trade name asset, the company tested the asset for impairment under ASC 350 - Intangibles, Goodwill and Other, concluding the asset was not impaired.
2. Primarily consists of sales and farmer networks, marketing and manufacturing alliances and noncompetition agreements.

During the third quarter of 2019, and in connection with strategic product and portfolio reviews, the company determined that the fair value of certain intangible assets classified as developed technology, other intangible assets and IPR&D within the seed segment that primarily relate to heritage DAS intangibles previously acquired from Cooperativa Central de Pesquisa Agrícola's ("Coodetec") was less than the carrying value due to the company's focus on advancing more competitive products and eliminating redundancy and complexity across the breeding programs. For IPR&D and developed technology, the company concluded these projects were abandoned. For other intangible assets, the company performed an impairment assessment using the relief from royalty method (a form of the income approach) using Level 3 inputs within the fair value hierarchy. The significant assumptions used in the calculation included projected revenue, royalty rates and discount rates. These significant assumptions involve management judgment and estimates relating to future operating performance and economic conditions that may differ from actual cash flows. As a result, the company recorded a pre-tax, non-cash intangible asset impairment charge of \$54 million (\$41 million after-tax), which is reflected in restructuring and asset related charges - net, in the company's Consolidated Statements of Operations for the year ended December 31, 2019.

There were no indicators of impairment for the company's other intangible assets that suggested that the fair value was less than its carrying value at December 31, 2019, except for IPR&D. As a result of the company's decision, during the fourth quarter of 2019, to accelerate the ramp up of the Enlist E3™ trait platform in the company's soybean portfolio mix across all brands over the subsequent five years with minimal use of the Roundup Ready 2 Yield® and Roundup Ready 2 Xtend® traits thereafter for the remainder of the Roundup Ready 2 License Agreement, the company determined that certain IPR&D projects associated with Roundup Ready 2 Xtend® were not recoverable and were impaired. These IPR&D projects were either abandoned or tested for impairment using the relief from royalty method (a form of the income approach) using Level 3 inputs within the fair value hierarchy. The key assumptions used in the relief from royalty method calculation included projected revenue, royalty rates and discount rates. These key assumptions involve management judgment and estimates relating to future operating performance and economic conditions that may differ from actual cash flows. As a result, the company recorded a pre-tax, non-cash intangible asset charge of \$90 million (\$69 million after-tax), which is reflected in restructuring and asset related charges - net, in the company's Consolidated Statements of Operations for the year ended December 31, 2019.

The aggregate pre-tax amortization expense from continuing operations for definite-lived intangible assets was \$722 million, \$682 million, and \$475 million, for the year ended December 31, 2021, December 31, 2020, and December 31, 2019, respectively.

Corteva, Inc.
Notes to the Consolidated Financial Statements (continued)

Total estimated amortization expense for the next five fiscal years is as follows:

(In millions)	
2022	\$ 700
2023	\$ 620
2024	\$ 606
2025	\$ 569
2026	\$ 558

NOTE 16 - LEASES

The company has operating and finance leases for real estate, transportation, certain machinery and equipment, and information technology assets. The company's leases have remaining lease terms of 1 to 50 years. For purposes of calculating operating lease liabilities, lease terms may be deemed to include options to extend the lease when it is reasonably certain that the company will exercise that option. Some leasing arrangements require variable payments that are dependent on usage, output, or may vary for other reasons, such as insurance and tax payments. The variable lease payments are not presented as part of the initial ROU asset or lease liability.

Certain of the company's leases include residual value guarantees. These residual value guarantees are based on a percentage of the lessor's asset acquisition price and the amount of such guarantee declines over the course of the lease term. The portion of residual value guarantees that are probable of payment are included in the related lease liability. At December 31, 2021, the company has future maximum payments for residual value guarantees in operating leases of \$193 million with final expirations through 2028. The company's lease agreements do not contain any material restrictive covenants. The components of lease cost are as follows:

(In millions)	For the Year Ended December 31,	
	2021	2020
Operating lease cost	\$ 158	\$ 197
Finance lease cost		
Amortization of right-of-use assets	1	2
Interest on lease liabilities	—	—
Total finance lease cost	1	2
Short-term lease cost	14	14
Variable lease cost	8	7
Total lease cost	\$ 181	\$ 220

New leases entered into during the years ended December 31, 2021 and December 31, 2020 were not material, on an individual basis.

Supplemental cash flow information related to leases is as follows:

(In millions)	For the Year Ended December 31,	
	2021	2020
Cash paid for amounts included in the measurement of lease liabilities:		
Operating cash outflows from operating leases	\$ 169	\$ 202
Operating cash outflows from finance leases	\$ —	\$ —
Financing cash outflows from finance leases	\$ 1	\$ 1

Corteva, Inc.
Notes to the Consolidated Financial Statements (continued)

Supplemental balance sheet information related to leases is as follows:

(In millions)	December 31, 2021	December 31, 2020
Operating Leases		
Operating lease right-of-use assets ¹	\$ 458	\$ 521

Less: Long-term debt due within one year	1		1	
Total	\$ 1,100	\$	1,102	

Principal payments of long-term debt are \$500 million for long-term debt maturing in 2025.

The estimated fair value of the company's long-term borrowings, was determined using Level 2 inputs within the fair value hierarchy, as described in Note 2 - Summary of Significant Accounting Policies. Based on quoted market prices for the same or similar issues, or on current rates offered to the company for debt of the same remaining maturities, the fair value of the company's long-term borrowings, not including long-term debt due within one year, was \$1,120 million and \$1,166 million at December 31, 2021 and 2020, respectively.

Debt Offering

In May 2020, EID issued \$500 million of 1.70 percent Senior Notes due 2025 and \$500 million of 2.30 percent Senior Notes due 2030 (the May 2020 Debt Offering). The proceeds of this offering are intended to be used for general corporate purposes.

Available Committed Credit Facilities

The following table summarizes the company's credit facilities:

Committed and Available Credit Facilities at December 31, 2021					
(In millions)	<i>Effective Date</i>	<i>Committed Credit</i>	<i>Credit Available</i>	<i>Maturity Date</i>	<i>Interest</i>
Revolving Credit Facility	May 2019	\$ 3,000	\$ 3,000	May 2024	Floating Rate
Revolving Credit Facility	May 2019	3,000	3,000	May 2023	Floating Rate
Total Committed and Available Credit Facilities		\$ 6,000	\$ 6,000		

Revolving Credit Facilities

In November 2018, EID entered into a \$3.0 billion, 5 year revolving credit facility and a \$3.0 billion, 3-year revolving credit facility (the "Revolving Credit Facilities"). The Revolving Credit Facilities became effective May 2019. Corteva, Inc. became a party at the time of the Corteva Distribution. In May 2021, the company entered into an amendment that extended the maturity date of the 3-year revolving credit facility from May 2022 to May 2023. Other than the change in maturity date, there were no material modifications to the terms of the credit facility. The Revolving Credit Facilities may serve as a substitute to the company's commercial paper program, and can be used from time to time, for general corporate purposes including, but not limited to, the funding of seasonal working capital needs. The Revolving Credit Facilities contain customary representations and warranties, affirmative and negative covenants and events of default that are typical for companies with similar credit ratings. Additionally, the Revolving Credit Facilities contain a financial covenant requiring that the ratio of total indebtedness to total capitalization for Corteva and its consolidated subsidiaries not exceed 0.60.

In March 2020, the company drew down \$500 million under the \$3.0 billion 3-year revolving credit facility as a result of the volatility and increased borrowing costs of commercial paper resulting from the unstable market conditions caused by the COVID-19 pandemic and repaid that borrowing in full in June 2020. There were no additional borrowings and the unused commitments under the 3-year revolving credit facility were \$3.0 billion as of December 31, 2021.

Debt Redemptions/Repayments

On March 22, 2019, EID issued notices of redemption in full of all of its outstanding notes (the "Make Whole Notes") listed in the table below:

<i>(in millions)</i>	Amount
4.625% Notes due 2020	\$ 474
3.625% Notes due 2021	296
4.250% Notes due 2021	163
2.800% Notes due 2023	381
6.500% Debentures due 2028	57
5.600% Senior Notes due 2036	42
4.900% Notes due 2041	48
4.150% Notes due 2043	69
Total	\$ 1,530

The Make Whole Notes were redeemed on April 22, 2019 at the make-whole redemption prices set forth in the respective Make Whole Notes. On and after the date of redemption, the Make Whole Notes were no longer deemed outstanding, interest on the Make Whole Notes ceased to accrue and all rights of the holders of the Make Whole Notes were terminated.

In March 2016, EID entered into a credit agreement that provided for a 3-year, senior unsecured term loan facility in the aggregate principal amount of \$4.5 billion (as amended, from time to time, the "Term Loan Facility") under which EID could make up to seven term loan borrowings and amounts repaid or prepaid were not available for subsequent borrowings. On May 2, 2019, EID terminated its Term Loan Facility and repaid the aggregate outstanding principal amount of \$3 billion plus accrued and unpaid interest through and including May 1, 2019.

In connection with the repayment of the Make Whole Notes and the Term Loan Facility, EID paid a total of \$4.6 billion in the second quarter 2019, which included breakage fees and accrued and unpaid interest on the Make Whole Notes and Term Loan Facility. The repayment of the Make Whole Notes and Term Loan Facility was funded with cash from operations and a contribution from DowDuPont.

On May 7, 2019, DowDuPont publicly announced the record date in connection with the Corteva Distribution. In connection with such announcement, EID was required to redeem \$1.25 billion aggregate principal amount of 2.20% Notes due 2020 and \$750 million aggregate principal amount of Floating Rate Notes due 2020 (collectively, the Special Mandatory Redemption, or "SMR Notes") setting forth the date of redemption of the SMR Notes. On May 17, 2019 EID redeemed and paid a total of \$2 billion, which included accrued and unpaid interest on the SMR Notes. EID funded the payment with a contribution from DowDuPont. Following the redemption, the SMR Notes are no longer outstanding and no longer bear interest, and all rights of the holders of the SMR Notes have terminated.

EID recorded a loss on the early extinguishment of debt of \$13 million for the year ended December 31, 2019, related to the difference between the redemption price and the par value of the Make Whole Notes, the Term Loan Facility, and the SMR Notes, partially offset by the write-off of unamortized step-up related to the fair value step-up of EID's debt.

Uncommitted Credit Facilities and Outstanding Letters of Credit

Unused bank credit lines on uncommitted credit facilities were \$389 million at December 31, 2021. These lines are available to support short-term liquidity needs and general corporate purposes, including letters of credit. Outstanding letters of credit were \$127 million at December 31, 2021. These letters of credit support commitments made in the ordinary course of business.

NOTE 18 - COMMITMENTS AND CONTINGENT LIABILITIES

Guarantees

Indemnifications

In connection with acquisitions and divestitures, the company has indemnified respective parties against certain liabilities that may arise in connection with these transactions and business activities prior to the completion of the transactions. The term of these indemnifications, which typically pertain to environmental, tax and product liabilities, is generally indefinite. In addition, the company indemnifies its duly elected or appointed directors and officers to the fullest extent permitted by Delaware law, against liabilities incurred as a result of their activities for the company, such as adverse judgments relating to litigation matters. If the indemnified party were to incur a liability or have a liability increase as a result of a successful claim, pursuant to the terms of the indemnification, the company would be required to reimburse the indemnified party. The maximum amount of potential future payments is generally unlimited. See below for additional information relating to the indemnification obligations under the Corteva Separation Agreement and the Chemours Separation Agreement.

Obligations for Customers and Other Third Parties

The company has directly guaranteed various debt obligations under agreements with third parties related to customers and other third parties. At December 31, 2021 and December 31, 2020, the company had directly guaranteed \$105 million and \$94 million, respectively, of such obligations. These amounts represent the maximum potential amount of future (undiscounted) payments that the company could be required to make under the guarantees in the event of default by the guaranteed party. All of the maximum future payments at December 31, 2021, had terms less than one year. The maximum future payments include \$21 million and \$17 million of guarantees related to the various factoring agreements that the company enters into with third-party financial institutions to sell its trade receivables at December 31, 2021 and December 31, 2020, respectively. See Note 12 - Accounts and Notes Receivable - Net, to the Consolidated Financial Statements, for additional information.

The maximum future payments also include agreements with lenders to establish programs that provide financing for select customers. The terms of the guarantees are equivalent to the terms of the customer loans that are primarily made to finance customer invoices. The total amounts owed from customers to the lenders relating to these agreements was \$15 million and \$16 million at December 31, 2021 and December 31, 2020, respectively.

The company assesses the payment/performance risk by assigning default rates based on the duration of the guarantees. These default rates are assigned based on the external credit rating of the counterparty or through internal credit analysis and historical default history for counterparties that do not have published credit ratings. For counterparties without an external rating or available credit history, a cumulative average default rate is used.

Indemnifications under Separation Agreements

The company has entered into various agreements where the company is indemnified for certain liabilities. In connection with the recognition of liabilities related to these matters, the company records an indemnification asset when recovery is deemed probable. See Note 5 - Divestitures and Other Transactions, to the Consolidated Financial Statements, for additional information related to indemnifications between Corteva, DuPont and Dow.

Chemours/Performance Chemicals

Pursuant to the Chemours Separation Agreement resulting from the 2015 spin-off of the Performance Chemicals segment from Historical DuPont, Chemours indemnifies the company against certain litigation, environmental, workers' compensation and other liabilities that arose prior to the distribution. The term of this indemnification is generally indefinite and includes defense costs and expenses, as well as monetary and non-monetary settlements and judgments. In connection with the recognition of liabilities related to these matters, the company records an indemnification asset when recovery is deemed probable.

In 2017, the Chemours Separation Agreement was amended to provide for a limited sharing of potential future liabilities related to alleged historical releases of perfluorooctanoic acids and its ammonium salts ("PFOA") for a five-year period that began on

July 6, 2017. In addition, in 2017, Chemours and EID settled multi-district litigation in the U.S. District Court for the Southern District of Ohio (“Ohio MDL”), resolving claims of about 3,550 plaintiffs alleging injury from exposure to PFOA in drinking water as a result of the historical manufacture or use of PFOA at the Washington Works plant outside Parkersburg, West Virginia. This plant was previously owned and/or operated by the performance chemicals segment of EID and is now owned and/or operated by Chemours.

On May 13, 2019, Chemours filed suit in the Delaware Court of Chancery against DuPont, EID, and Corteva, seeking, among other things, to limit its responsibility for the litigation and environmental liabilities allocated to and assumed by Chemours under the Chemours Separation Agreement (the “Delaware Litigation”). On March 30, 2020, the Court of Chancery granted a motion to dismiss. On December 15, 2020, the Delaware Supreme Court affirmed the judgment of the Court of Chancery. Meanwhile, a confidential arbitration process regarding the same and other claims has proceeded (the “Pending Arbitration”).

On January 22, 2021, Chemours, DuPont, Corteva and EID entered into a binding memorandum of understanding containing a settlement to resolve legal disputes originating from the Delaware Litigation and Pending Arbitration, and to establish a cost sharing arrangement and escrow account to be used to support and manage potential future legacy per- and polyfluoroalkyl substances (“PFAS”) liabilities arising out of pre-July 1, 2015 conduct (the “MOU”). The MOU replaces the 2017 amendment to the Chemours Separation Agreement. According to the terms of the cost sharing arrangement within the MOU, Corteva and DuPont together, on one hand, and Chemours, on the other hand, agreed to a 50-50 split of certain qualified expenses related to PFAS liabilities incurred over a term not to exceed twenty years or \$4 billion of qualified spend and escrow account contributions (see below for discussion of escrow account) in the aggregate. DuPont’s and Corteva’s 50% share under the MOU will be limited to \$2 billion, including qualified expenses and escrow contributions. These expenses and escrow account contributions will be subject to the existing Letter Agreement, under which DuPont and Corteva will each bear 50% of the first \$300 million (up to \$150 million each), and thereafter DuPont bears 71% and Corteva bears the remaining 29%.

In order to support and manage any potential future PFAS liabilities, the parties have also agreed to establish an escrow account (“MOU Escrow Account”). The MOU provides that (1) no later than each of September 30, 2021 and September 30, 2022, Chemours shall deposit \$100 million into an escrow account and DuPont and Corteva shall together deposit \$100 million in the aggregate into an escrow account and (2) no later than September 30 of each subsequent year through and including 2028, Chemours shall deposit \$50 million into an escrow account and DuPont and Corteva shall together deposit \$50 million in the aggregate into an escrow account. Subject to the terms and conditions set forth in the MOU, each party may be permitted to defer funding in any year (excluding 2021). Over this period, Chemours will deposit a total of \$500 million in the account and DuPont and Corteva will deposit an additional \$500 million pursuant to the terms of the Letter Agreement. Additionally, if on December 31, 2028, the balance of the escrow account (including interest) is less than \$700 million, Chemours will make 50% of the deposits and DuPont and Corteva together will make 50% of the deposits necessary to restore the balance of the escrow account to \$700 million. Such payments will be made in a series of consecutive annual equal installments commencing on September 30, 2029 pursuant to the escrow account replenishment terms as set forth in the MOU. The MOU provides that no withdrawals from the MOU Escrow Account can be made before year six, except to fund mutually agreed upon third-party settlements in excess of \$125 million. Starting with year six, withdrawals can only be made to fund qualified spend if the parties’ aggregate qualified spend in that particular year is greater than \$200 million. Beginning with year 11, the amounts in the MOU Escrow Account can be used to fund any qualified spend.

During 2021, the company contributed its initial deposit into the MOU Escrow Account, which is classified as noncurrent restricted cash equivalents and is included in other assets in the interim Consolidated Balance Sheets.

After the term of this arrangement, Chemours’ indemnification obligations under the original 2015 Chemours Separation Agreement, would continue unchanged, subject in each case to certain exceptions set out in the MOU. Under the MOU, Chemours waived specified claims regarding the construct of its 2015 spin-off transaction, and the parties will dismiss the Pending Arbitration regarding those claims. Additionally, the parties have agreed to resolve the Ohio MDL PFOA personal injury litigation (as discussed below). The parties are expected to cooperate in good faith to enter into additional agreements reflecting the terms set forth in the MOU.

During the years ended December 31, 2021 and 2020, the company recorded charges of \$48 million and \$65 million to (loss) income from discontinued operations after income taxes in the Consolidated Statement of Operations, related to the MOU. The charges recorded for the year ended December 31, 2021 primarily relate to an increase in the environmental remediation accrual for Chemours’ Fayetteville Works facility for estimated costs for on-site surface water and groundwater remediation to address and abate PFAS discharges arising out of pre-July 1, 2015 conduct. The increase is the result of further detailed engineering and design work related to Chemours’ environmental remediation activities at the site under the Consent Order between Chemours and the North Carolina Department of Environmental Quality. The charges recorded for the year ended December 31, 2020

primarily related to the execution of the MOU and the settlement of the Ohio MDL PFOA personal injury litigation (as discussed below).

Corteva Separation Agreement

On April 1, 2019, in connection with the Dow Distribution, Corteva, DuPont and Dow entered into the Corteva Separation Agreement, the Tax Matters Agreement, the Employee Matters Agreement, and certain other agreements (collectively, the “Corteva Separation Agreements”). The Corteva Separation Agreements allocate among Corteva, DuPont and Dow certain liabilities and obligations among the parties and provides for indemnification obligation among the parties. Under the Corteva Separation Agreements, DuPont will indemnify Corteva against certain litigation, environmental, workers' compensation and other liabilities that arose prior to the Corteva Distribution and (ii) Dow indemnifies Corteva against certain litigation and other liabilities that relate to the Historical Dow business, but were transferred over as part of the common control combination with DAS, and Corteva indemnifies DuPont and Dow for certain liabilities. The term of this indemnification is generally indefinite with exceptions, and includes defense costs and expenses, as well as monetary and non-monetary settlements and judgments. See Note 1 - Background and Basis of Presentation, and Note 5 - Divestitures and Other Transactions, to the Consolidated Financial Statements, for additional information relating to the Separation.

Under the Corteva Separation Agreement, certain legacy EID liabilities from discontinued and/or divested operations and businesses of EID (including Performance Chemicals) (a “stray liability”) were allocated to Corteva or DuPont. For those stray liabilities allocated to Corteva (which may include a specified amount of liability associated with that liability), Corteva is responsible for liabilities in an amount up to that specified amount plus an additional \$200 million and, for those stray liabilities allocated to DuPont (which may include a specified amount of liability associated with that liability), DuPont is responsible for liabilities up to a specified amount plus an additional \$200 million. Once each company has met the \$200 million threshold, Corteva and DuPont will share future liabilities proportionally on the basis of 29% and 71%, respectively; provided, however, that for PFAS, DuPont will manage such liabilities with Corteva and DuPont sharing the costs on a 50% - 50% basis starting from \$1 and up to \$300 million (with such amount, up to \$150 million, to be credited to each company's \$200 million threshold) and once the \$300 million threshold is met, then the companies will share proportionally on the basis of 29% and 71% respectively, subject to a \$1 million de minimis requirement. During the second quarter of 2021, the aggregate amount of the Company's cash spent and liabilities accrued exceeded the stray liability thresholds, including PFAS, noted above. Therefore, liabilities recognized subsequent to the second quarter of 2021 will be shared at the reduced rates noted above.

Litigation

The company is subject to various legal proceedings, including, but not limited to, product liability, intellectual property, antitrust, commercial, property damage, personal injury, environmental and regulatory matters arising out of the normal course of its current businesses or legacy EID businesses unrelated to Corteva's current businesses but allocated to Corteva as part of the separation of Corteva from DuPont. It is not possible to predict the outcome of these various proceedings, as considerable uncertainty exists. The company records accruals for legal matters when the information available indicates that it is probable that a liability has been incurred and the amount of the loss can be reasonably estimated. Accruals may reflect the impact and status of negotiations, settlements, rulings, advice from counsel and other information and events that may pertain to a particular matter. For the litigation matters discussed below, management believes that it is reasonably possible that the company could incur liabilities in excess of amounts accrued, the ultimate liability for which could be material to the results of operations and the cash flows in the period recognized. However, the company is unable to estimate the possible loss beyond amounts accrued due to various reasons, including, among others, that the underlying matters are either in early stages and/or have significant factual issues to be resolved. In addition, even when the company believes it has substantial defenses, the company may consider settlement of matters if it believes it is in the best interest of the company.

Chlorpyrifos Lawsuits

As of December 31, 2021, there were pending personal injury lawsuits filed and additional asserted claims against the former Dow Agrosciences LLC, alleging injuries related to chlorpyrifos exposure, the active ingredient in Lorsban®, an insecticide used by commercial farms for field fruit, nut and vegetable crops. Corteva ended its production of Lorsban® in 2020. Chlorpyrifos products are restricted-use pesticides, which are not available for purchase or use by the general public, and may only be sold to, and used by, certified applicators or someone under the certified applicator's direct supervision. These lawsuits do not relate to Dursban®, a residential type chlorpyrifos product that was authorized for indoor purposes, which was discontinued over two decades ago prior to the Merger and Corteva's formation and Separation. Claimants allege personal injury, including autism, developmental delays and/or decreased neurologic function, resulting from farm worker exposure and bystander drift and in utero exposure to chlorpyrifos. Certain claimants have also put forth remediation claims due to alleged property contamination from chlorpyrifos. Discovery is expected to continue through 2022.

Litigation related to legacy EID businesses unrelated to Corteva's current businesses

PFAS, PFOA, PFOS and Other Related Liabilities

For purposes of this report, the term PFOA means collectively perfluorooctanoic acid and its salts, including the ammonium salt and does not distinguish between the two forms, and PFAS, including PFOA, PFOS (perfluorooctanesulfonic acid), GenX and other perfluorinated chemicals and compounds ("PFCs").

EID is a party to various legal proceedings relating to the use of PFOA by its former Performance Chemicals segment for which potential liabilities would be subject to the cost sharing arrangement under the MOU as long as it remains effective.

Leach Settlement and Ohio MDL Settlement

EID has residual liabilities under its 2004 settlement of a West Virginia state court class action, *Leach v. EID*, which alleged that PFOA from EID's former Washington Works facility had contaminated area drinking water supplies and affected the health of area residents. The settlement class has about 80,000 members. In addition to relief that was provided to class members years ago, the settlement requires EID to continue providing PFOA water treatment to six area water districts and private well users and to fund, through an escrow account, up to \$235 million for a medical monitoring program for eligible class members. As of December 31, 2021, approximately \$2 million had been disbursed from the account since its establishment in 2012 and the remaining balance is approximately \$1 million.

The Leach settlement permits class members to pursue personal injury claims for six health conditions (and no others) that an expert panel appointed under the settlement reported in 2012 had a "probable link" (as defined in the settlement) with PFOA: pregnancy-induced hypertension, including preeclampsia; kidney cancer; testicular cancer; thyroid disease; ulcerative colitis; and diagnosed high cholesterol. After the panel reported its findings, approximately 3,550 personal injury lawsuits were filed in federal and state courts in Ohio and West Virginia and consolidated in multi-district litigation in the U.S. District Court for the Southern District of Ohio ("Ohio MDL"). Ohio MDL was settled in early 2017 for \$670.7 million in cash, with Chemours and EID (without indemnification from Chemours) each paying half.

Post-MDL Settlement PFOA Personal Injury Claims

The 2017 Ohio MDL settlement did not resolve claims of plaintiffs who did not have claims in the Ohio MDL or whose claims are based on diseases first diagnosed after February 11, 2017. The first was a consolidated trial of two cases; the first, a kidney cancer case, which resulted in a hung jury, while the second, *Travis and Julie Abbot v. E.I. du Pont de Nemours and Company* (the "Abbot Case"), a testicular cancer case, resulted in a jury verdict of \$40 million in compensatory damages and \$10 million for loss of consortium. The loss of consortium award was subsequently reduced to \$250,000 in accordance with state law limitations. Following entry of the judgment by the court, EID filed post-trial motions to reduce the verdict, and to appeal the verdict on the basis of procedural and substantive legal errors made by the trial court. The company believes the merits of the appeal will be successful in reducing the jury verdict or eliminating its liability, in whole or part.

In January 2021, Chemours, DuPont and Corteva agreed to settle the remaining approximately 95 matters, as well as unfiled matters, remaining in the Ohio MDL, with the exception of the Abbot case, for \$83 million, with Chemours contributing \$29 million to the settlement, and DuPont and Corteva contributing \$27 million each. The company recorded a liability for its share of the settlement, with a charge to (loss) income from discontinued operations after income taxes in the Consolidated Statement of Operations, during the year ended December 31, 2020, and paid \$27 million during the year ended December 31, 2021. As agreed to in the settlement, the plaintiffs' counsel filed a motion to dissolve the MDL.

Other PFOA Matters

EID is a party to other PFOA lawsuits that do not involve claims for personal injury. Defense costs and any future liabilities that may arise out of these lawsuits are subject to the MOU and the cost sharing arrangement disclosed above. Under the MOU, fraudulent conveyance claims associated with these matters are not qualified expenses, unless Corteva, Inc. and EID would prevail on the merits of these claims.

New York. EID is a defendant in about 50 lawsuits, including a putative class action, brought by persons who live in and around Hoosick Falls, New York. These lawsuits assert claims for medical monitoring and property damage based on alleged PFOA releases from manufacturing facilities owned and operated by co-defendants in Hoosick Falls and allege that EID and 3M supplied some of the materials used at these facilities. EID is also one of more than ten defendants in a lawsuit brought by the Town of East Hampton, New York alleging PFOA and PFOS contamination of the town's well water. Additionally, EID, along with 3M, Chemours and Dyneon, have been named defendants in complaints filed by eleven water districts in Nassau County, New York alleging that the drinking water they provide to

customers is contaminated with PFAS and seeking reimbursement for clean-up costs. The water district complaints also include allegations of fraudulent transfer.

New Jersey. At December 31, 2021, two lawsuits were pending, one brought by a local water utility and the second a putative class action, against EID alleging that PFOA from EID's former Chambers Works facility contaminated drinking water sources. The putative class action was voluntarily dismissed without prejudice by the plaintiff.

In late March of 2019, the New Jersey State Attorney General filed four lawsuits against EID, Chemours, 3M and others alleging that operations at and discharges from former EID sites in New Jersey (Chambers Works, Pompton Lakes, Parlin and Repauno) damaged the State's natural resources. Two of these lawsuits (those involving the Chambers Works and Parlin sites) allege contamination from PFAS. The Ridgewood Water District in New Jersey filed suit in the first quarter 2019 against EID, 3M, Chemours, and Dyneon alleging losses related to the investigation, remediation and monitoring of polyfluorinated surfactants, including PFOA, in water supplies. DuPont and Corteva were subsequently added as defendants to these lawsuits. These lawsuits include claims under the New Jersey Industrial Site Recovery Act ("ISRA") and for fraudulent conveyance.

Alabama / Others. EID is one of more than thirty defendants in a lawsuit by the Alabama water utility alleging contamination from PFCs, including PFOA, used by co-defendant carpet manufacturers to make their products more stain and grease resistant. In addition, the states of Michigan, Mississippi, New Hampshire, South Dakota, and Vermont recently filed lawsuits against EID, Chemours, 3M and others, claiming, among other things, PFC (including PFOA) contamination of groundwater and drinking water. The complaints seek reimbursement for past and future costs to investigate and remediate the alleged contamination and compensation for the loss of value and use of the state's natural resources. Motions to dismiss the Michigan, Vermont and New Hampshire cases have been denied.

Ohio. EID is a defendant in three lawsuits: an action by the State of Ohio based on alleged damage to natural resources, a putative nationwide class action brought on behalf of anyone who has detectable levels of PFAS in their blood serum, and an action by the City of Dayton claiming losses related to the investigation, remediation and monitoring of PFAS in water supplies. The trial with respect to the natural resources lawsuit is scheduled for April 2023.

Netherlands. In April 2021, four municipalities in the Netherlands filed complaints alleging contamination of land and groundwater resulting from the emission of PFOA and GenX by Corteva, DuPont and Chemours. The municipalities seek to recover costs incurred due to the alleged emissions, including damages for investigation costs, construction project delays, depreciation of land, soil remediation, liabilities to contractors, and attorneys' fees.

Delaware. On July 13, 2021, Chemours, DuPont, EID and Corteva entered into a settlement agreement with the State of Delaware reflecting the companies' and the State's agreement to settle and fully resolve claims alleged against the companies regarding their historical Delaware operations, manufacturing, use and disposal of all chemical compounds, including PFAS. Under the settlement, the companies will collectively pay \$50 million to fund environmental projects, including sampling and community environmental justice and equity grants, which shall be utilized to fund the Natural Resources and Sustainability Trust (the "NRST Trust"). If the companies, individually or jointly, within 8 years of the settlement, enter into a proportionally similar agreement to settle or resolve claims of another state for PFAS-related natural resource damages, for an amount greater than \$50 million, the companies shall make a supplemental payment directly to the NRST Trust ("Supplemental Payment") in an amount equal to such other states' recovery in excess of \$50 million. Supplemental Payment(s), if any, will not exceed \$25 million in the aggregate. All amounts paid by the companies under the settlement are subject to the MOU and the Corteva Separation Agreement with Chemours bearing responsibility for 50%, or \$25 million, of the \$50 million payment due to the NRST and DuPont and Corteva each bearing \$12.5 million of the remaining amount, which Corteva paid in January 2022. As of December 31, 2021, an accrual has been established in relation to this settlement and during the year ended December 31, 2021, the company recorded a charge of \$11 million to (loss) income from discontinued operations after income taxes in the Consolidated Statement of Operations. Under the settlement, if the state sues other parties and those parties seek contribution from the companies, the companies will have protection from contribution up to the amounts previously paid under the settlement agreement. The companies will also receive a credit up to the amount of the payment if the state seeks natural resource damage claims against the companies outside the scope of the settlement's release of claims.

Aqueous Firefighting Foams. Approximately 2,050 cases have been filed against 3M and other defendants, including EID and Chemours, and more recently also including Corteva and DuPont, alleging PFOS or PFOA contamination of soil and groundwater from the use of aqueous firefighting foams. Most of those cases claim some form of property damage and seek to recover the costs of responding to this contamination and damages for the loss of use and

enjoyment of property and diminution in value. Most of these cases have been transferred to a multidistrict litigation proceeding in federal district court in South Carolina. Approximately 1,860 of these cases were filed on behalf of firefighters who allege personal injuries (primarily kidney and testicular cancer) as a result of aqueous firefighting foams. Approximately 140 of these cases were filed by water utility or municipal water districts. Most of these recent cases assert claims that the EID and Chemours separation constituted a fraudulent conveyance. Discovery for these cases is expected to continue through 2022, with a water district “bellwether” trial expected for early 2023.

EID did not make firefighting foams, PFOS, or PFOS products. While EID made surfactants and intermediaries that some manufacturers used in making foams, which may have contained PFOA as an unintended byproduct or an impurity, EID’s products were not formulated with PFOA, nor was PFOA an ingredient of these products. EID has never made or sold PFOA as a commercial product.

Fayetteville Works Facility, North Carolina

Prior to the separation of Chemours, EID introduced GenX as a polymerization processing aid and a replacement for PFOA at the Fayetteville Works facility in Bladen County, North Carolina. The facility is now owned and operated by Chemours, which continues to manufacture and use GenX.

At December 31, 2021, several actions are pending in federal court against Chemours and EID relating to PFC discharges from the Fayetteville Works facility. One of these is a consolidated putative class action that asserts claims for medical monitoring and property damage on behalf of putative classes of property owners and residents in areas near or who draw drinking water from the Cape Fear River. Another action is a consolidated action brought by various North Carolina water authorities, including the Cape Fear Public Utility Authority and Brunswick County, that seek actual and punitive damages as well as injunctive relief. In another action over approximately 100 property owners near the Fayetteville Works facility filed a complaint against Chemours and EID in May 2020. The plaintiffs seek compensatory and punitive damages for their claims of private nuisance, trespass, and negligence allegedly caused by release of PFAS.

In addition to the federal court actions, there is an action on behalf of about 100 plaintiffs who own wells and property near the Fayetteville Works facility. The plaintiffs seek damages for nuisance allegedly caused by releases of certain PFCs from the site.

Generally, site-related expenses related GenX claims are subject to the cost sharing arrangements as defined in the MOU.

Environmental

Accruals for environmental matters are recorded when it is probable that a liability has been incurred and the amount of the liability can be reasonably estimated based on current law and existing technologies. These obligations are included in accrued and other current liabilities and other noncurrent obligations in the Consolidated Balance Sheet. It is reasonably possible that environmental remediation and restoration costs in excess of amounts accrued could have a material impact on the company's results of operations, financial condition and cash flows. Inherent uncertainties exist in these estimates primarily due to unknown conditions, changing governmental regulations and legal standards regarding liability, and emerging remediation technologies for handling site remediation and restoration.

For a discussion of the allocation of environmental liabilities under the Chemours Separation Agreement and the Corteva Separation Agreement, see the previous discussion on page F-46.

(In millions)	As of December 31, 2021		
	Indemnification Asset	Accrual balance ³	Potential exposure above amount accrued ³
Environmental Remediation Stray Liabilities			
Chemours related obligations - subject to indemnity ^{1,2}	\$ 159	\$ 159	\$ 262
Other discontinued or divested businesses obligations ¹	15	75	187
Environmental remediation liabilities primarily related to DuPont - subject to indemnity from DuPont ²	37	37	66
Environmental remediation liabilities not subject to indemnity	—	82	49
Indemnification liabilities related to the MOU ⁴	9	99	28
Total	\$ 220	\$ 452	\$ 592

¹ Represents liabilities that are subject the \$200 million threshold and sharing arrangements as discussed on page F-46, under Corteva Separation Agreement.

² The company has recorded an indemnification asset related to these accruals, including \$40 million related to the Superfund sites.

³ Accrual balance represents management's best estimate of the costs of remediation and restoration, although it is reasonably possible that the potential exposure, as indicated, could range above the amounts accrued, as there are inherent uncertainties in these estimates. Accrual balance includes \$68 million for remediation of Superfund sites. Amounts do not include possible impacts from the remediation elements of the EPA's October 2021 PFAS Strategic Roadmap (as applicable) or possible revisions to Chemours' Consent Order with the North Carolina Department of Environmental Quality, as any possible impacts, to the extent such items would be reimbursable under the MOU, are not yet determinable.

⁴ Represents liabilities that are subject to the \$150 million threshold and sharing agreements as discussed on page F-44, under the header "Chemours / Performance Chemicals."

Chambers Works, New Jersey

On January 28, 2022, the State of New Jersey filed a request for a preliminary injunction against EID and Chemours seeking the establishment of a Remediation Funding Source ("RFS") in an amount exceeding \$900 million for environmental remediation at EID's former Chambers Work facility in New Jersey. The RFS primarily relates to non-PFAS remediation, which is not subject to the MOU. Chemours has accepted indemnity and defense for these matters, while reserving rights and declining EID's demand relating to the ISRA and fraudulent transfer matters as alleged under the existing New Jersey natural resource lawsuits discussed on page F-48.

NOTE 19 - STOCKHOLDERS' EQUITY

Common Stock

As discussed in Note 1 - Background and Basis of Presentation, on June 1, 2019, Corteva, Inc.'s common stock was distributed to DowDuPont stockholders by way of a pro rata distribution. Each DowDuPont stockholder received one share of Corteva, Inc. common stock for every three shares of DowDuPont common stock held at the close of business on May 24, 2019, the record date of distribution. Corteva, Inc.'s common stock began trading the "regular way" under the ticker symbol "CTVA" on June 3, 2019, the first business day after June 1, 2019. The number of Corteva, Inc. common shares issued on June 1, 2019 was 748,815,000 (par value of \$0.01 per share). Information related to the Corteva Distribution and its effect on the company's financial statements are discussed throughout these Notes to the Consolidated Financial Statements.

Set forth below is a reconciliation of common stock share activity for the years ended December 31, 2021, 2020, and 2019:

Shares of common stock	Issued
Balance June 1, 2019	748,815,000
Issued	586,000
Repurchased and retired	(824,000)
Balance December 31, 2019	748,577,000
Issued	3,384,000
Repurchased and retired	(8,503,000)
Balance December 31, 2020	743,458,000
Issued	4,019,000
Repurchased and retired	(20,950,000)
Balance December 31, 2021	726,527,000

Share Buyback Plan

On August 5, 2021, Corteva, Inc. announced that its Board of Directors authorized a \$1.5 billion share repurchase program to purchase Corteva, Inc.'s common stock, par value \$0.01 per share, without an expiration date ("2021 Share Buyback Plan"). The timing, price and volume of purchases will be based on market conditions, relevant securities laws and other factors. In connection with the 2021 Share Buyback Plan, the company purchased and retired 5,572,000 shares during the year ended December 31, 2021 in the open market for a total cost of \$250 million.

On June 26, 2019, Corteva, Inc. announced that its Board of Directors authorized a \$1 billion share repurchase program to purchase Corteva, Inc.'s common stock, par value \$0.01 per share, without an expiration date ("2019 Share Buyback Plan").

In connection with the 2019 Share Buyback Plan, the company repurchased and retired 15,378,000 shares, 8,503,000 shares, and 824,000 shares in the open market for a total cost of \$700 million, \$275 million, and \$25 million during the years ended December 31, 2021, 2020, and 2019, respectively. Repurchases under the 2019 Share Buyback Plan were completed during the third quarter of 2021.

Shares repurchased pursuant to Corteva's share buyback plan are immediately retired upon repurchase. Repurchased common stock is reflected as a reduction of stockholders' equity. The company's accounting policy related to its share repurchases is to reduce its common stock based on the par value of the shares and to reduce its retained earnings for the excess of the repurchase price over the par value. When Corteva has an accumulated deficit balance, the excess over the par value is applied to APIC. When Corteva has retained earnings, the excess is charged entirely to retained earnings.

Noncontrolling Interest

In June 2020, the company completed the acquisition of the remaining 46.5 percent interest in the Phytogen Seed Company, LLC joint venture from J. G. Boswell Company. As the purchase of the remaining interest did not result in a change of control, the difference between the carrying value of the noncontrolling interest and the consideration paid, net of taxes was recorded within equity.

Corteva, Inc. owns 100 percent of the outstanding common shares of EID. However, EID has preferred stock outstanding to third parties which is accounted for as a noncontrolling interest in Corteva's Consolidated Balance Sheets. Each share of EID

Corteva, Inc.
Notes to the Consolidated Financial Statements (continued)

Preferred Stock - \$4.50 Series and EID Preferred Stock - \$3.50 Series issued and outstanding at the effective date of the Corteva Distribution remains issued and outstanding as to EID and was unaffected by the Corteva Distribution.

Below is a summary of the EID Preferred Stock at December 31, 2021 and December 31, 2020 which is classified as noncontrolling interests in the Corteva Consolidated Balance Sheets.

(Shares in thousands)	Number of Shares
Authorized	23,000
\$4.50 Series, callable at \$120	1,673
\$3.50 Series, callable at \$102	700

Other Comprehensive Income (Loss)

The changes and after-tax balances of components comprising accumulated other comprehensive income (loss) are summarized below:

(In millions)	Cumulative Translation Adjustment ¹	Derivative Instruments	Pension Benefit Plans	Other Benefit Plans	Unrealized Gain (Loss) on Investments	Total
2019						
Balance January 1, 2019	\$ (2,793)	\$ (26)	\$ (620)	\$ 79	\$ —	\$ (3,360)
Other comprehensive income (loss) before reclassifications	(274)	16	(723)	(159)	—	(1,140)
Amounts reclassified from accumulated other comprehensive income (loss)	—	12	5	(1)	—	16
Net other comprehensive income (loss)	(274)	28	(718)	(160)	—	(1,124)
Impact of Internal Reorganizations	1,123	—	91	—	—	1,214
Balance December 31, 2019	\$ (1,944)	\$ 2	\$ (1,247)	\$ (81)	\$ —	\$ (3,270)
2020						
Other comprehensive income (loss) before reclassifications	\$ (26)	\$ (81)	\$ (191)	\$ 670	\$ (10)	\$ 362
Amounts reclassified from accumulated other comprehensive income (loss)	—	12	5	1	—	18
Net other comprehensive income (loss)	(26)	(69)	(186)	671	(10)	380
Balance December 31, 2020	\$ (1,970)	\$ (67)	\$ (1,433)	\$ 590	\$ (10)	\$ (2,890)
2021						
Other comprehensive income (loss) before reclassifications	\$ (573)	\$ 143	\$ 996	\$ 25	\$ 3	\$ 594
Amounts reclassified from accumulated other comprehensive income (loss)	—	(4)	41	(646)	7	(602)
Net other comprehensive income (loss)	(573)	139	1,037	(621)	10	(8)
Balance December 31, 2021	\$ (2,543)	\$ 72	\$ (396)	\$ (31)	\$ —	\$ (2,898)

¹ The cumulative translation adjustment losses for the year ended December 31, 2021 was primarily driven by the strengthening of the U.S. Dollar ("USD") against the European Euro ("EUR"), Swiss franc ("CHF") and Turkish Lira ("TRY"). The cumulative translation adjustment losses for the year ended December 31, 2020 was primarily driven by the strengthening of the U.S. Dollar ("USD") against the Brazilian Real ("BRL"), partially offset by the weakening of the U.S. Dollar against the Swiss franc ("CHF") and European Euro ("EUR").

The tax (expense) benefit on the net activity related to each component of other comprehensive income (loss) was as follows:

(In millions)	For the Year Ended December 31,		
	2021	2020	2019
Derivative instruments	\$ (41)	\$ 24	\$ (8)
Pension benefit plans - net	(319)	54	231
Other benefit plans - net	188	(211)	52
(Provision for) benefit from income taxes related to other comprehensive income (loss) items	\$ (172)	\$ (133)	\$ 275

Corteva, Inc.
Notes to the Consolidated Financial Statements (continued)

¹. Reflected in cost of goods sold in the Consolidated Statements of Operations.

². Reflected in provision for (benefit from) income taxes from continuing operations in the Consolidated Statements of Operations.

³. These accumulated other comprehensive (loss) income components are included in the computation of net periodic benefit (credit) cost of the company's pension and other benefit plans. See Note 20 - Pension Plans and Other Post Employment Benefits, to the Consolidated Financial Statements, for additional information.

⁴. Reflected in other income - net in the Consolidated Statements of Operations.

⁵. A portion reflected in (loss) income from discontinued operations after income taxes for the year ended December 31, 2019.

NOTE 20 - PENSION PLANS AND OTHER POST EMPLOYMENT BENEFITS

The company offers various long-term benefits to its employees. Where permitted by applicable law, the company reserves the right to change, modify or discontinue the plans.

Defined Benefit Pension Plans

The company has both funded and unfunded noncontributory defined benefit pension plans covering a majority of the U.S. employees and employees in a number of other countries. The principal U.S. pension plan is the largest pension plan held by Corteva. Effective January 1, 2007, a majority of new hires are not eligible to participate in the U.S. defined benefit pension plans. The company froze the pay and service amounts used to calculate the pension benefits for active employees who participate in these plans on November 30, 2018, resulting in the participants no longer accruing additional benefits.

The company's funding policy is consistent with the funding requirements of federal laws and regulations. Pension coverage for employees of the company's non-U.S. consolidated subsidiaries is provided, to the extent deemed appropriate, through separate plans. Obligations under such plans are funded by depositing funds with trustees, covered by insurance contracts, or remain unfunded.

The company made total contributions of \$49 million, \$62 million, and \$121 million to its pension plans other than the principal U.S. pension plan for the years ended December 31, 2021, 2020 and 2019, respectively. Corteva expects to contribute approximately \$60 million to its pension plans other than the principal U.S. pension plan in 2022. The company does not anticipate making contributions to its principal U.S pension plan in 2022.

The weighted-average assumptions used to determine pension plan obligations for all pension plans are summarized in the table below:

Weighted-Average Assumptions used to Determine Benefit Obligations	December 31, 2021	December 31, 2020
Discount rate	2.82 %	2.44 %
Rate of increase in future compensation levels ¹	2.55 %	2.54 %

¹ The rate of compensation increase excludes U.S. pension plans since the employees who participate in the U.S. pension plans no longer accrue additional benefits for future service and eligible compensation.

The weighted-average assumptions used to determine net periodic benefit costs for all pension plans are summarized in the table below:

Weighted-Average Assumptions used to Determine Net Periodic Benefit Cost	For the Year Ended December 31,		
	2021	2020	2019
Discount rate	2.44 %	3.19 %	4.19 %
Rate of increase in future compensation levels ¹	2.54 %	2.60 %	2.84 %
Expected long-term rate of return on plan assets	5.73 %	6.25 %	6.24 %

¹ The rate of compensation increase excludes U.S. pension plans since the employees who participate in the U.S. pension plans no longer accrue additional benefits for future service and eligible compensation.

Other Post Employment Benefits

The company has historically provided medical, dental and life insurance benefits to certain pensioners and survivors. The majority of U.S. employees hired on or after January 1, 2007, and eligible employees under the age of 50 as of November 30, 2018, are not eligible to participate in the post-employment medical, dental and life insurance plans. Substantially all of the cost and liabilities for these retiree benefit plans are attributable to the U.S. benefit plans. The non-Medicare eligible retiree medical plan is contributory with costs shared between the company and pensioners and survivors. For Medicare eligible pensioners and survivors, Corteva provides a company-funded Health Reimbursement Arrangement ("HRA"). In December 2020, the company amended its retiree medical, dental and life insurance plans resulting in the company no longer providing retiree dental and life insurance benefits effective January 1, 2022 and Corteva's portion of the cost of non-Medicare retiree medical coverage no longer being adjusted for cost increases, which capped the Corteva cost at the level in effect as of December 31, 2021 ("2020 OPEB Plan Amendments"). As a result of these changes, the company recorded a \$(939) million decrease in OPEB benefit obligations as of December 31, 2020 with a corresponding prior service benefit within other comprehensive income for the year ended December 31, 2020. During 2021, a substantial amount of the prior service benefit within other comprehensive income (loss) in 2020 was recognized in other income - net in the Consolidated Statement of Operations.

The company also provides disability benefits to employees. Employee disability benefit plans are insured in many countries. However, primarily in the U.S., such plans are generally self-insured. Obligations and expenses for self-insured plans are reflected in the change in projected benefit obligations table on page F-56.

The company's OPEB plans are unfunded and the cost of the approved claims is paid from operating cash flows. Pre-tax cash requirements to cover actual net claims costs and related administrative expenses were \$198 million, \$207 million, and \$202 million for the years ended December 31, 2021, 2020 and 2019, respectively. Changes in cash requirements reflect the net impact of per capita health care costs, demographic changes, plan amendments and changes in participant premiums, co-pays and deductibles. In 2022, the company expects to contribute approximately \$140 million for its OPEB plans.

The weighted-average assumptions used to determine benefit obligations for OPEB plans are summarized in the table below:

Weighted-Average Assumptions used to Determine Benefit Obligations	December 31, 2021	December 31, 2020
Discount rate	2.59 %	2.09 %

The weighted-average assumptions used to determine net periodic benefit costs for the OPEB plans are summarized in the two tables below:

Weighted-Average Assumptions used to Determine Net Periodic Benefit Cost	For the Year Ended December 31,		
	2021	2020	2019
Discount rate	2.09 %	3.07 %	3.93 %

As of December 31, 2021, health care cost trend rates do not impact the benefit obligations for the OPEB plans because of the 2020 OPEB Plan Amendments. For the year ended December 31, 2020 and 2019, the health care cost trend rate was assumed to be 7.0 percent and 7.2 percent for next year, respectively.

Assumptions

Within the U.S., the company determines the expected long-term rate of return on plan assets by performing a detailed analysis of key economic and market factors driving historical returns for each asset class and formulating a projected return based on factors in the current environment. Factors considered include, but are not limited to, inflation, real economic growth, interest rate yield, interest rate spreads, and other valuation measures and market metrics. The expected long-term rate of return for each asset class is then weighted based on the strategic asset allocation approved by the governing body for the plan. The company's historical experience with the pension fund asset performance is also considered. For non-U.S. plans, assumptions reflect economic assumptions applicable to each country.

In the U.S., Corteva calculates service costs and interest costs by applying individual spot rates from a yield curve (based on high-quality corporate bond yields) to the separate expected cash flows components of service cost and interest cost. Service cost and interest cost for all other plans are determined on the basis of the single equivalent discount rates derived in determining those plan obligations.

The discount rates utilized to measure the pension and other post employment benefit obligations are based on the yield on high-quality corporate fixed income investments at the measurement date. Future expected actuarially determined cash flows are individually discounted at the spot rates under the Aon AA_Above Median yield curve (based on high-quality corporate bond yields) to arrive at the plan's obligations as of the measurement date. For non-U.S. benefit plans, historically the company utilized prevailing long-term high quality corporate bond indices to determine the discount rate, applicable to each country, at the measurement date.

The company adopts the most recently published mortality tables and mortality improvement scale released by the Society of Actuaries in measuring its U.S. pension and other post employment benefit obligations. The effect of these adoptions is amortized into net periodic benefit cost for the years following the adoption.

Corteva, Inc.
Notes to the Consolidated Financial Statements (continued)

Summarized information on the company's pension and other post employment benefit plans is as follows:

Change in Projected Benefit Obligations, Plan Assets and Funded Status

Plan Assets

All pension plan assets in the U.S. are invested through a single master trust fund. The strategic asset allocation for this trust fund is approved by the Pension Investment Committee. The general principles guiding U.S. pension asset investment policies are those embodied in the Employee Retirement Income Security Act of 1974 ("ERISA"). These principles include discharging Corteva's investment responsibilities for the exclusive benefit of plan participants and in accordance with the "prudent expert" standard and other ERISA rules and regulations. Corteva establishes strategic asset allocation percentage targets and appropriate benchmarks for significant asset classes with the aim of achieving a prudent balance between return and risk. Strategic asset allocations in other countries are selected in accordance with the laws and practices of those countries. Where appropriate, asset liability studies are utilized in this process. U.S. plan assets are managed by investment professionals employed by Corteva. The remaining assets are managed by professional investment firms unrelated to the company. Corteva's pension investment professionals have discretion to manage the assets within established asset allocation ranges approved by the Pension Investment Committee. Additionally, pension trust funds are permitted to enter into certain contractual arrangements generally described as "derivatives." Derivatives are primarily used to reduce specific market risks, hedge currency and adjust portfolio duration and asset allocation in a cost-effective manner.

The weighted-average target allocation for plan assets of the company's pension plans is summarized as follows:

Target Allocation for Plan Assets		
<i>Asset Category</i>	December 31, 2021	December 31, 2020
U.S. equity securities	11 %	20 %
Non-U.S. equity securities	11	16
Fixed income securities	58	51
Hedge funds	2	2
Private market securities	8	6
Real estate	5	4
Cash and cash equivalents	5	1
Total	100 %	100 %

U.S. equity investments are primarily large-cap companies. Global equity securities include varying market capitalization levels. Global fixed income investments include corporate-issued, government-issued and asset-backed securities. Corporate debt investments include a range of credit risk and industry diversification. U.S. fixed income investments are weighted heavier than non-U.S. fixed income securities. Other investments include cash and cash equivalents, hedge funds, real estate and private market securities such as interests in private equity and venture capital partnerships.

Fair value calculations may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the company believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

For pension plan assets classified as Level 1 measurements (measured using quoted prices in active markets), total fair value is either the price of the most recent trade at the time of the market close or the official close price, as defined by the exchange on which the asset is most actively traded on the last trading day of the period, multiplied by the number of units held without consideration of transaction costs.

For pension plan assets classified as Level 2 measurements, where the security is frequently traded in less active markets, fair value is based on the closing price at the end of the period; where the security is less frequently traded, fair value is based on the price a dealer would pay for the security or similar securities, adjusted for any terms specific to that asset or liability. Market inputs are obtained from well-established and recognized vendors of market data and subjected to tolerance and quality checks. For derivative assets and liabilities, standard industry models are used to calculate the fair value of the various financial instruments based on significant observable market inputs, such as foreign exchange rates, commodity prices, swap rates, interest rates and implied volatilities obtained from various market sources.

Corteva, Inc.
Notes to the Consolidated Financial Statements (continued)

For pension plan assets classified as Level 3 measurements, total fair value is based on significant unobservable inputs including assumptions where there is little, if any, market activity for the investment. Investment managers, fund managers, or investment contract issuers provide valuations of the investment on a monthly or quarterly basis. These valuations are reviewed for reasonableness based on applicable sector, benchmark and company performance. Adjustments to valuations are made where appropriate. Where available, audited financial statements are obtained and reviewed for the investments as support for the manager's investment valuation.

The tables below present the fair values of the company's pension assets by level within the fair value hierarchy, as described in Note 2 - Summary of Significant Accounting Policies:

Basis of Fair Value Measurements

Trust Assets

EID entered into a trust agreement in 2013 (as amended and restated in 2017) that established and requires EID to fund the Trust for cash obligations under certain non-qualified benefit and deferred compensation plans upon a change in control event as defined in the Trust agreement. Under the Trust agreement, the consummation of the Merger was a change in control event. As a result, in November 2017, EID contributed \$571 million to the Trust. At the Separation, Corteva transferred \$39 million to DuPont. During the years ended December 31, 2021 and 2020, \$43 million and \$65 million, respectively, was distributed to EID according to the Trust agreement, and at December 31, 2021 and 2020, the balance in the Trust was \$304 million and \$347 million, respectively. The Trust Assets are classified as current restricted cash equivalents and included within other current assets in the Consolidated Balance Sheets. See Note 9 - Supplementary Information, to the Consolidated Financial Statements, for further information.

Defined Contribution Plans

Corteva provides defined contribution benefits to its employees. The most significant is the U.S. Retirement Savings Plan ("the Plan"), which covers almost all of the U.S. full-service employees. This Plan includes a non-leveraged Employee Stock Ownership Plan ("ESOP"). Employees are not required to participate in the ESOP and those who do are free to diversify out of the ESOP. The purpose of the Plan is to provide retirement savings benefits for employees and to provide employees an opportunity to become stockholders of the company. The Plan is a tax qualified contributory profit sharing plan, with cash or deferred arrangement and any eligible employee of Corteva may participate. Currently, Corteva contributes 100 percent of the first 6 percent of the employee's contribution election and also contributes 3 percent of each eligible employee's eligible compensation regardless of the employee's contribution.

Corteva's contributions to the Plan were \$63 million, \$94 million, and \$142 million for the years ended December 31, 2021, 2020 and 2019, respectively. Corteva's matching contributions vest immediately upon contribution. The 3 percent nonmatching company contribution vests after employees complete three years of service. In addition, Corteva made contributions to other defined contribution plans of \$29 million, \$33 million, and \$46 million for the years ended December 31, 2021, 2020 and 2019, respectively. Included in Corteva's contributions are amounts related to discontinued operations of \$73 million for the year ended December 31, 2019.

NOTE 21 - STOCK-BASED COMPENSATION

Prior to the Corteva Distribution, Corteva employees held equity awards, including stock options, share appreciation rights ("SARs"), restricted stock units ("RSUs") and performance-based restricted stock units ("PSUs"), which were denominated in DowDuPont common stock and, in some cases, in Dow Inc. common stock, and which had originally been issued under the DuPont Equity and Incentive Plan ("EIP"), the Dow Chemical Company 2012 Stock Incentive Plan or the Dow Chemical Company 1988 Award and Option Plan.

As discussed in Note 18 - Commitment and Contingent Liabilities, on April 1, 2019 the company entered into an employee matters agreement (the "EMA") with DuPont and Dow that identifies employees and employee-related liabilities (and attributable assets) to be allocated (either retained, transferred and accepted, or assigned and assumed, as applicable) to the Parties as part of the Distributions and describes when and how the relevant transfers and assignments will occur. With some exceptions, the EMA provides for the equitable adjustment of existing equity incentive compensation awards denominated in the common stock of DowDuPont to reflect the occurrence of the Distributions.

In connection with the Separation on June 1, 2019, outstanding DowDuPont-denominated stock options, SARs, RSU and PSU awards were converted into Corteva-denominated awards under the "Employer Method," or into both DuPont-denominated awards and Corteva-denominated awards under the "Shareholder Method," using a formula designed to preserve the intrinsic value of the awards immediately prior to and subsequent to the Corteva Separation. The awards have the same terms and conditions under the applicable plans and award agreements prior to the Separation transactions. The conversions of equity awards did not have a material impact to the company's consolidated financial statements.

On June 1, 2019 ("Adoption Date"), in connection with the Separation, the Omnibus Incentive Plan (the "OIP") became effective. Under the OIP, the company may grant incentive awards, including stock options (both "incentive stock options" and nonqualified stock options), share appreciation rights, restricted shares, restricted stock units, other share-based awards and cash awards, to its and its subsidiaries' eligible employees, non-employee directors, independent contractors and consultants following the Separation until the tenth anniversary of the Adoption Date, subject to an aggregate limit and annual individual limits. Under the OIP, the maximum number of shares reserved for the grant or settlement of awards is 20 million shares, excluding shares underlying certain exempt awards, such as the awards converted to Corteva-denominated awards pursuant to the Separation. At December 31, 2021, approximately 12 million shares were authorized for future grants under the OIP. The company generally satisfies stock option exercises and the vesting of RSUs and PSUs with newly issued shares of Corteva common stock, although RSU awards granted under Historical Dow plans in certain countries are settled in cash.

The compensation committee determines the long-term incentive mix, including stock options, RSUs and PSUs and may authorize new grants annually. The company estimates expected forfeitures.

The total stock-based compensation cost included in income (loss) from continuing operations before income taxes within the Consolidated Statement of Operations was \$79 million, \$73 million, and \$84 million for the years ended December 31, 2021, 2020 and 2019, respectively. The income tax benefits related to stock-based compensation arrangements were \$(15) million, \$(15) million, and \$(17) million for the years ended December 31, 2021, 2020 and 2019, respectively.

Stock Options

The exercise price of shares subject to option is equal to the market price of the company's stock on the date of grant. All options vest serially over a period of three years. Stock option awards granted under the OIP between June 2019 and 2020 expire 10 years after the grant date. Stock option awards granted under the EIP (previous plan) between 2014 and 2015 expire seven years after the grant date and options granted between 2016 and May 2019 expire 10 years after the grant date. Stock option awards granted under the Historical Dow plans subsequent to 2010 expire 10 years after the grant date.

To measure the fair value of the awards on the date of grant, the company used the Black-Scholes option pricing model and the assumptions set forth in the below table. Under the OIP, the weighted-average grant-date fair value of options granted for the years ended December 31, 2021 and 2020 was \$11.77 and \$6.06, respectively. Under the EIP, the weighted-average grant-date fair value of options granted for the years ended December 31, 2019 was \$7.29.

Corteva, Inc.
Notes to the Consolidated Financial Statements (continued)

Weighted-Average Assumptions	OIP		EIP
	For the year ended December 31, 2021	For the year ended December 31, 2020	For the year ended December 31, 2019
Dividend yield	1.14 %	1.67 %	1.55 %
Expected volatility	29.44 %	23.14 %	19.80 %
Risk-free interest rate	1.0 %	1.3 %	2.4 %
Expected life of stock options granted during period (years)	6.0	6.0	6.1

Under the OIP, the company determined the dividend yield by dividing the annualized dividend on Corteva's Common Stock by the option exercise price. A historical daily measurement of volatility is determined based on the expected life of the option granted. For the years ended December 31, 2021 and 2020, the measurement of volatility is based on the average volatility of eight of Corteva's peer companies. Corteva's peer volatility is based on the historical volatility of each business respectively. The risk-free interest rate is determined by reference to the yield on an outstanding U.S. Treasury note with a term equal to the expected life of the option granted. Expected life is determined by utilizing the simplified method for estimating expected term as referenced under ASC 718 – Share based Payments.

Under the EIP, the company determined the dividend yield by dividing the annualized dividend on DowDuPont's Common Stock by the option exercise price.

A historical daily measurement of volatility is determined based on the expected life of the option granted. For the year ended December 31, 2019, the measurement of volatility is based on weighted average of the individual peer volatilities of DuPont and Corteva based on the size of each business respectively. DuPont and Corteva peer volatility are based on a 50/50 blend of historical volatility and implied volatility. Both volatility measures are based on the average of five peer companies for DuPont and eight peer companies for Corteva.

The risk-free interest rate is determined by reference to the yield on an outstanding U.S. Treasury note with a term equal to the expected life of the option granted. Expected life is determined by reference to the company's historical experience.

The following table summarizes stock option activity for year ended December 31, 2021 under the OIP:

Stock Options	For the Year Ended December 31, 2021			
	Number of Shares (in thousands)	Weighted Average Exercise Price (per share)	Weighted Average Remaining Contractual Term (in years)	Aggregate Intrinsic Value (in thousands)
Outstanding at January 1, 2021	8,998	\$ 34.21	5.27	\$ 50,077
Granted	849	45.37		
Exercised	(3,206)	32.44		
Forfeited/Expired	(218)	33.39		
Outstanding at December 31, 2021	6,423	\$ 36.65	5.69	\$ 68,219
Exercisable at December 31, 2021	4,739	\$ 36.15	4.76	\$ 52,726

The aggregate intrinsic values in the table above represent the total pre-tax intrinsic value (the difference between the closing stock price on the last trading day of the December 31, 2021 and the exercise price, multiplied by the number of in-the-money options) that would have been received by the option holders had all option holders exercised their in-the-money options at period end. Under the OIP, the total intrinsic value of options exercised for the years ended December 31, 2021 and 2020 were \$43 million, and \$21 million, respectively. The company recognized tax benefits from options exercised for the years ended December 31, 2021 and 2020 of \$(8) million and \$(4) million, respectively.

Under the EIP, the total intrinsic value of options exercised for the year ended December 31, 2019 was \$16 million. The company recognized tax benefits from options exercised for the year ended December 31, 2019 of \$(3) million.

As of December 31, 2021, \$4 million of total unrecognized pre-tax compensation expense related to nonvested stock options is expected to be recognized over a weighted-average period of about 1.20 years.

Restricted Stock Units and Performance Share Units

RSUs granted under the EIP serially vest over 3 years. RSUs granted under the Historical Dow plans vest after a designated period, generally 1 year to 3 years. RSUs granted under the OIP serially vest over 3 years. Upon vesting, these RSUs convert one-for-one to Corteva Common Stock. A retirement-eligible employee retains any granted awards upon retirement provided the employee has rendered at least six months of service following the grant date. Additional RSUs are also granted periodically to key senior management employees. These RSUs generally vest over periods ranging from 3 years to 5 years. The fair value of all stock-settled RSUs is based upon the market price of the underlying common stock as of the grant date.

The company grants PSUs to senior leadership. In 2021, there were 343,632 PSUs granted. Vesting for PSUs granted in 2021 and 2020 is partially based on the realization of the Company's improvement of its Return on Invested Capital ("ROIC") and Operating Earnings Per Share (EPS) during the Performance Period. Vesting for PSUs granted in 2019 is partially based on the realization of the Company's improvement of its Return on Invested Capital ("ROIC") and Operating EBITDA during the Performance Period. Performance and payouts are determined independently for each metric. The actual award, delivered in Corteva Common Stock, can range from zero percent to 200 percent of the original grant. The weighted-average grant date fair value of the PSUs granted in 2021 of \$45.37 was based upon the market price of the underlying common stock as of the grant date.

Nonvested awards of RSUs and PSUs are shown below.

RSUs & PSUs	For the Year Ended December 31, 2021	
	<i>Number of Shares (in thousands)</i>	<i>Weighted Average Grant Date Fair Value (per share)</i>
Nonvested at January 1, 2021	5,883	\$ 31.54
Granted	1,536	\$ 45.30
Vested	(1,583)	\$ 35.59
Forfeited	(234)	\$ 32.99
Nonvested at December 31, 2021	5,602	\$ 34.11

The total fair value of stock units vested under the OIP for the years ended December 31, 2021 and 2020 was \$56 million and \$49 million, respectively. The weighted-average grant-date fair value of stock units granted under the OIP for the years ended December 31, 2021 and 2020 was \$45.30 and \$31.15, respectively.

The total fair value of stock units vested under the EIP during the years ended December 31, 2019 was \$79 million. The weighted-average grant-date fair value of stock units granted under the EIP for the year ended December 31, 2019 was \$52.19.

As of December 31, 2021, \$45 million of total unrecognized pre-tax compensation expense related to RSUs and PSUs is expected to be recognized over a weighted average period of 1.13 years.

NOTE 22 - FINANCIAL INSTRUMENTS

At December 31, 2021 and 2020, the company had \$3,400 million and \$2,511 million, respectively, of held-to-maturity securities (primarily time deposits and money market funds) classified as cash equivalents, as these securities had maturities of three months or less at the time of purchase; and \$86 million and \$43 million at December 31, 2021 and 2020, respectively, of held-to-maturity securities (primarily time deposits) classified as marketable securities as these securities had maturities of more than three months to less than one year at the time of purchase. The company's investments in held-to-maturity securities are held at amortized cost, which approximates fair value. Additionally, at December 31, 2020, the company had \$226 million of available-for-sale securities (see below "Debt Securities" for further discussion). The above noted securities are included in cash and cash equivalents, marketable securities, and other current assets in the Consolidated Balance Sheets.

Derivative Instruments

Objectives and Strategies for Holding Derivative Instruments

In the ordinary course of business, the company enters into contractual arrangements (derivatives) to reduce its exposure to foreign currency and commodity price risks. The company has established a variety of derivative programs to be utilized for financial risk management. These programs reflect varying levels of exposure coverage and time horizons based on an assessment of risk.

Derivative programs have procedures and controls and are approved by the Corporate Financial Risk Management Committee, consistent with the company's financial risk management policies and guidelines. Derivative instruments used are forwards, options, futures and swaps. The company has not designated any non-derivatives as hedging instruments.

The company's financial risk management procedures also address counterparty credit approval, limits and routine exposure monitoring and reporting. The counterparties to these contractual arrangements are major financial institutions and major commodity exchanges, and multinational grain exporters. The company is exposed to credit loss in the event of nonperformance by these counterparties. The company utilizes collateral support annex agreements with certain counterparties to limit its exposure to credit losses. The company anticipates performance by counterparties to these contracts and therefore no material loss is expected. Market and counterparty credit risks associated with these instruments are regularly reported to management.

The notional amounts of the company's derivative instruments were as follows:

Notional Amounts (In millions)	December 31, 2021	December 31, 2020
<i>Derivatives designated as hedging instruments:</i>		
Foreign currency contracts	\$ 1,252	\$ 1,164
Commodity contracts	\$ 845	\$ 383
<i>Derivatives not designated as hedging instruments:</i>		
Foreign currency contracts	\$ 103	\$ 647
Commodity contracts	\$ 4	\$ —

Foreign Currency Risk

The company's objective in managing exposure to foreign currency fluctuations is to reduce earnings and cash flow volatility associated with foreign currency rate changes and to mitigate the exposure of certain investments in foreign subsidiaries against changes in the Euro/USD exchange rate. Accordingly, the company enters into various contracts that change in value as foreign exchange rates change to protect the value of its existing foreign currency-denominated assets, liabilities, commitments, investments and cash flows.

The company uses foreign exchange contracts to offset its net exposures, by currency, related to the foreign currency denominated monetary assets and liabilities of its operations. The primary business objective of this hedging program is to maintain an approximately balanced position in foreign currencies so that exchange gains and losses resulting from exchange rate changes, after related tax effects, are minimized. The company also uses foreign currency exchange contracts to offset a portion of the company's exposure to certain forecasted transactions as well as the translation of foreign currency-denominated earnings. The company also uses commodity contracts to offset risks associated with foreign currency devaluation in certain countries.

Commodity Price Risk

Commodity price risk management programs serve to reduce exposure to price fluctuations on purchases of inventory such as corn and soybeans. The company enters into over-the-counter and exchange-traded derivative commodity instruments to hedge the commodity price risk associated with agricultural commodity exposures.

Derivatives Designated as Cash Flow Hedges

Commodity Contracts

The company enters into over-the-counter and exchange-traded derivative commodity instruments, including options, futures and swaps, to hedge the commodity price risk associated with agriculture commodity exposures.

While each risk management program has a different time maturity period, most programs currently do not extend beyond the next two years. Cash flow hedge results are reclassified into earnings during the same period in which the related exposure impacts earnings. Reclassifications are made sooner if it appears that a forecasted transaction is probable of not occurring.

Corteva, Inc.
Notes to the Consolidated Financial Statements (continued)

The following table summarizes the after-tax effect of commodity contract cash flow hedges on accumulated other comprehensive loss:

(In millions)	For the Year Ended December 31,		
	2021	2020	2019
Beginning balance	\$ (16)	\$ 2	\$ (26)
Additions and revaluations of derivatives designated as cash flow hedges	92	(44)	16
Clearance of hedge results to earnings	(29)	26	12
Ending balance	\$ 47	\$ (16)	\$ 2

At December 31, 2021, an after-tax net gain of \$36 million is expected to be reclassified from accumulated other comprehensive loss into earnings over the next twelve months.

Foreign Currency Contracts

The company enters into forward contracts to hedge the foreign currency risk associated with forecasted transactions within certain foreign subsidiaries.

While each risk management program has a different time maturity period, most programs currently do not extend beyond the next two years. Cash flow hedge results are reclassified into earnings during the same period in which the related exposure impacts earnings. Reclassifications are made sooner if it appears that a forecasted transaction is not probable of occurring.

The following table summarizes the after-tax effect of foreign currency cash flow hedges on accumulated other comprehensive loss:

(In millions)	For the Year Ended December 31, 2021	For the Year Ended December 31, 2020
Beginning balance	\$ (17)	\$ —
Additions and revaluations of derivatives designated as cash flow hedges	24	(3)
Clearance of hedges results to earnings	25	(14)
Ending balance	\$ 32	\$ (17)

At December 31, 2021, an after-tax net gain of \$32 million is expected to be reclassified from accumulated other comprehensive loss into earnings over the next twelve months.

Derivatives Designated as Net Investment Hedges

Foreign Currency Contracts

The company has designated €450 million of forward contracts to exchange EUR as net investment hedges. The purpose of these forward contracts is to mitigate FX exposure related to a portion of the company's Euro net investments in certain foreign subsidiaries against changes in Euro/USD exchange rates. These hedges will expire and be settled in 2023, unless terminated early at the discretion of the company.

The company elected to apply the spot method in testing for effectiveness of the hedging relationship.

Derivatives not Designated in Hedging Relationships

Foreign Currency Contracts

The company uses foreign exchange contracts to reduce its net exposure, by currency, related to foreign currency-denominated monetary assets and liabilities of its operations so that exchange gains and losses resulting from exchange rate changes are minimized. The netting of such exposures precludes the use of hedge accounting; however, the required revaluation of the forward contracts and the associated foreign currency-denominated monetary assets and liabilities intends to achieve a minimal earnings impact, after taxes. The company also uses foreign currency exchange contracts to offset a portion of the company's exposure to the translation of certain foreign currency-denominated earnings so that gains and losses on the contracts offset changes in the USD value of the related foreign currency-denominated earnings over the relevant aggregate period.

Commodity Contracts

The company utilizes options, futures and swaps that are not designated as hedging instruments to reduce exposure to commodity price fluctuations on purchases of inventory such as corn and soybeans. The company uses forward agreements,

Corteva, Inc.
Notes to the Consolidated Financial Statements (continued)

with durations less than one year, to buy and sell USD priced commodities in order to reduce its exposure to currency devaluation for a portion of its local currency cash balances. Counterparties to the forward sales agreements are multinational grain exporters and subject to the company's financial risk management procedures.

Fair Value of Derivative Instruments

Asset and liability derivatives subject to an enforceable master netting arrangement with the same counterparty are presented on a net basis in the Consolidated Balance Sheets. The presentation of the company's derivative assets and liabilities is as follows:

		December 31, 2021		
(In millions)	Balance Sheet Location	Gross	Counterparty and Cash Collateral Netting ¹	Net Amounts Included in the Consolidated Balance Sheet
Asset derivatives:				
Derivatives designated as hedging instruments:				
Foreign currency contracts	Other current assets	\$ 37	\$ —	\$ 37
Derivatives not designated as hedging instruments:				
Foreign currency contracts	Other current assets	31	(20)	11
Commodity contracts	Other current assets	3	—	3
Total asset derivatives		\$ 71	\$ (20)	\$ 51
Liability derivatives:				
Derivatives designated as hedging instruments:				
Foreign currency contracts	Accrued and other current liabilities	\$ 1	\$ —	\$ 1
Derivatives not designated as hedging instruments:				
Foreign currency contracts	Accrued and other current liabilities	23	(20)	3
Commodity contracts	Accrued and other current liabilities	2	—	2
Total liability derivatives		\$ 26	\$ (20)	\$ 6

Corteva, Inc.

^{1.} For cash flow hedges, this represents the portion of the gain (loss) reclassified from accumulated OCI into income during the period.

^{2.} Recorded in cost of goods sold.

^{3.} Gain recognized in other income - net was partially offset by the related gain on the foreign currency-denominated monetary assets and liabilities of the company's operations. See Note 9 - Supplementary Information, to the Consolidated Financial Statements for additional information.

Debt Securities

The estimated fair value of the available-for-sale securities as of December 31, 2020 was determined using Level 1 inputs within the fair value hierarchy. Level 1 measurements were based on quoted market prices in active markets for identical assets and liabilities. The available-for-sale securities at of December 31, 2020 are held by certain foreign subsidiaries in which the USD is not the functional currency. The fluctuations in foreign exchange are recorded in accumulated other comprehensive loss within the Consolidated Statements of Equity. These fluctuations are subsequently reclassified from accumulated other comprehensive income (loss) to earnings in the period in which the marketable securities are sold and the gains and losses on these securities offset a portion of the foreign exchange fluctuations in earnings for the company.

The following table provides the investing results from available-for-sale securities for the year ended December 31, 2021:

Investing Results (In millions)	For the Year Ended December 31,	
	2021	
Proceeds from sales of available-for-sale securities	\$	226
Gross realized losses	\$	(7)

NOTE 23 - FAIR VALUE MEASUREMENTS

The following tables summarize the basis used to measure certain assets and liabilities at fair value on a recurring basis:

December 31, 2021	Significant Other Observable Inputs	
	Level 1	Level 2
(In millions)		
Assets at fair value:		
Marketable securities	\$ —	\$ 86
Derivatives relating to: ¹

Total liabilities at fair value	\$ —	\$ 24

December 31, 2020	Significant Other Observable Inputs	
	Level 1	Level 2
(In millions)		
Assets at fair value:		
Marketable securities	\$ —	43
Debt securities:		
U.S. treasuries ³	226	—
Derivatives relating to: ¹		
Foreign currency	—	55
Total assets at fair value	\$ 226	98
Liabilities at fair value:		
Derivatives relating to: ¹		
Foreign currency	\$ —	135
Total liabilities at fair value	\$ —	135

¹ See Note 22 - Financial Instruments, to the Consolidated Financial Statements, for the classification of derivatives in the Consolidated Balance Sheets.

² The company's equity securities are included in "other assets" in the Consolidated Balance Sheets.

³ The company's investments in U.S. treasuries, which are primarily available-for-sale, are included in "marketable securities" in the Consolidated Balance Sheets.

For assets and liabilities classified as Level 1 measurements (measured using quoted prices in active markets), total fair value is either the price of the most recent trade at the time of the market close or the official close price, as defined by the exchange on which the asset is most actively traded on the last trading day of the period, multiplied by the number of units held without consideration of transaction costs.

For assets and liabilities classified as Level 2 measurements, where the security is frequently traded in less active markets, fair value is based on the closing price at the end of the period; where the security is less frequently traded, fair value is based on the price a dealer would pay for the security or similar securities, adjusted for any terms specific to that asset or liability, or by using observable market data points of similar, more liquid securities to imply the price. For time deposits classified as held-to-maturity investments and reported at amortized cost, fair value is based on an observable interest rate for similar securities. Market inputs are obtained from well-established and recognized vendors of market data and subjected to tolerance and quality checks.

Corteva, Inc.
Notes to the Consolidated Financial Statements (continued)

For derivative assets and liabilities, standard industry models are used to calculate the fair value of the various financial instruments based on significant observable market inputs, such as foreign exchange rates, commodity prices, swap rates and implied volatilities obtained from various market sources. Market inputs are obtained from well-established and recognized vendors of market data and subjected to tolerance/quality checks.

For all other assets and liabilities for which observable inputs are used, fair value is derived through the use of fair value models, such as a discounted cash flow model or other standard pricing models. See Note 22 - Financial Instruments, to the Consolidated Financial Statements, for further information on the types of instruments used by the company for risk management.

There were no transfers between Levels 1 and 2 during the years ended December 31, 2021 and 2020.

For assets classified as Level 3 measurements, the fair value is based on significant unobservable inputs including assumptions where there is little, if any, market activity. The fair value of the company's interests held in trade receivable conduits is determined by calculating the expected amount of cash to be received using the key input of anticipated credit losses in the portfolio of receivables sold that have not yet been collected. Given the short-term nature of the underlying receivables, discount rate and prepayments are not factors in determining the fair value of the interests.

Fair Value Measurements on a Nonrecurring Basis

The following table summarizes the basis used to measure certain assets at fair value on a nonrecurring basis:

Basis of Fair Value Measurements on a Nonrecurring Basis	<i>Significant Other Unobservable Inputs (Level 3)</i>	<i>Total Losses</i>
(In millions)		
2019		
Assets at fair value:		
Developed technology	\$ —	\$ (1)
Other intangible assets	\$ —	\$ (6)
IPR&D	\$ —	\$ (137)

During the third and fourth quarter of 2019, the company recorded impairment charges to developed technology, other intangible assets, and IPR&D. See Note 7 - Restructuring and Asset Related Charges - Net, and Note 15 - Goodwill and Other Intangible Assets, to the Consolidated Financial Statements, for further discussion of these fair value measurements.

NOTE 24 - GEOGRAPHIC INFORMATION

Sales are attributed to geographic areas based on customer location; long-lived assets are attributed to geographic areas based on asset location.

(In millions)	Net Sales		
	For the Year Ended December 31,		
	2021	2020	2019
United States	\$ 6,782	\$ 6,510	\$ 6,255

Asia Pacific	130	149	178
Total	\$ 4,329	\$ 4,396	\$ 4,546

NOTE 25 - SEGMENT INFORMATION

Corteva's reportable segments reflects the manner in which its chief operating decision maker ("CODM") allocates resources and assesses performance, which is at the operating segment level (seed and crop protection). For purposes of allocating resources to the segments and assessing segment performance, segment operating EBITDA is the primary measure used by Corteva's CODM. The company defines segment operating EBITDA as earnings (loss) (i.e., income (loss) from continuing operations before income taxes) before interest, depreciation, amortization, corporate expenses, non-operating (benefits) costs, foreign exchange gains (losses), and net unrealized gain or loss from mark-to-market activity for certain foreign currency derivative instruments that do not qualify for hedge accounting, excluding the impact of significant items. Effective January 1, 2021, on a prospective basis, the company excludes from segment operating EBITDA net unrealized gain or loss from mark-to-market activity for certain foreign currency derivative instruments that do not qualify for hedge accounting. Non-operating (benefits) costs consists of non-operating pension and other post-employment benefit (OPEB) costs, tax indemnification adjustments, environmental remediation and legal costs associated with legacy EID businesses and sites, and the 2021 officer indemnification payment. Tax indemnification adjustments relate to changes in indemnification balances, as a result of the application of the terms of the Tax Matters Agreement, between Corteva and Dow and/or DuPont that are recorded by the company as pre-tax income or expense. Net unrealized gain or loss from mark-to-market activity for certain foreign currency derivative instruments that do not qualify for hedge accounting represents the non-cash net gain (loss) from changes in fair value of certain undesignated foreign currency derivative contracts. Upon settlement, which is within the same calendar year of execution of the contract, the realized gain (loss) from the changes in fair value of the non-qualified foreign currency derivative contracts will be reported in the respective segment results to reflect the economic effects of the foreign currency derivative contracts without the resulting unrealized mark to fair value volatility. For the year ended December 31, 2019, segment operating EBITDA is calculated on a pro forma basis, as this is the manner in which the CODM assesses performance and allocates resources or expense.

Pro forma adjustments used in the calculation of pro forma segment operating EBITDA for the year ended December 31, 2019 were determined in accordance with Article 11 of Regulation S-X that was in effect prior to recent amendments. These adjustments give effect to the Merger, the debt retirement transactions related to paying off or retiring portions of EID's existing debt liabilities (as discussed in Note 17 - Long-Term Debt and Available Credit Facilities, to the Consolidated Financial Statements), and the separation and distribution to DowDuPont stockholders of all the outstanding shares of Corteva common stock as if they had been consummated on January 1, 2016.

Corporate Profile

The company conducts its global operations through the following reportable segments:

Seed

The company's seed segment is a global leader in developing and supplying advanced germplasm and traits that produce optimum yield for farms around the world. The segment is a leader in many of the company's key seed markets, including North America corn and soybeans, Europe corn and sunflower, as well as Brazil, India, South Africa and Argentina corn. The segment offers trait technologies that improve resistance to weather, disease, insects and herbicides used to control weeds, and trait technologies that enhance food and nutritional characteristics. In addition, the segment provides digital solutions that assist farmer decision-making with a view to optimize product selection and, ultimately, help maximize yield and profitability.

Crop Protection

The crop protection segment serves the global agricultural input industry with products that protect against weeds, insects and other pests, and disease, and that improve overall crop health both above and below ground via nitrogen management and seed-applied technologies. The segment is a leader in global herbicides, insecticides, nitrogen stabilizers and pasture and range management herbicides.

Total	\$ (304)	\$ (23)	\$ (664)	\$ (991)

- Includes Board approved restructuring plans and asset related charges as well as accelerated prepaid amortization. See Note 7 - Restructuring and Asset Related Charges - Net, to the Consolidated Financial Statements, for additional information.
- Includes a loss recorded in other income - net related to the sale of the La Porte site.
- The year ended December 31, 2019 is presented on a pro forma basis, prepared in accordance with Article 11 of Regulation S-X that was in effect prior to recent amendments.
- Integration and separation costs include costs incurred to prepare for and close the Merger, post-Merger integration expenses, and costs incurred to prepare for the Internal Reorganizations. Beginning in the second quarter of 2019, this includes both integration and separation costs.
- Includes a loss recorded in other income - net related to DAS's sale of a joint venture related to synergy actions.
- Includes a charge related to the amortization of the inventory that was stepped up to fair value in connection with the Merger.
- Includes a loss on early extinguishment of debt related to the difference between the redemption price and the par value of the Make Whole Notes and Term Loan Facility, partially offset by the write-off of unamortized step-up related to the fair value step-up of EID's debt.
- Includes a charge included in other income - net associated with remeasuring the company's Argentine Peso net monetary assets, resulting from an unexpected August primary election result in Argentina. Throughout the three months ended September 30, 2019, the Argentine Peso dropped approximately a third of its value against the US dollar and in September of 2019, the country's central bank announced new restrictions on foreign currency transactions.

NOTE 26 - SUBSEQUENT EVENTS

In February 2022, the company entered into a new committed receivable repurchase facility of up to \$500 million (the "2022 Repurchase Facility"), which expires in December 2022. Under the 2022 Repurchase Facility, Corteva may sell a portfolio of available and eligible outstanding customer notes receivables to participating institutions and simultaneously agree to repurchase at a future date. The 2022 Repurchase Facility is considered a secured borrowing with the customer notes receivables inclusive of those that are sold and repurchased, equal to 105 percent of the outstanding amounts borrowed utilized as collateral. Borrowings under the 2022 Repurchase Facility will have an interest rate equal to the Adjusted Term Secured Overnight Financing Rate ("SOFR") plus a margin of 0.75 percent.

Management's Reports on Responsibility for Financial Statements and Internal Control over Financial Reporting

Management's Report on Responsibility for Financial Statements

Management is responsible for the Consolidated Financial Statements and the other financial information contained in this Annual Report on Form 10-K. The financial statements have been prepared in accordance with generally accepted accounting principles in the United States of America ("GAAP") and are considered by management to present fairly EID's financial position, results of operations and cash flows. The financial statements include some amounts that are based on management's best estimates and judgments. The financial statements have been audited by EID's independent registered public accounting firm, PricewaterhouseCoopers LLP. The purpose of their audit is to express an opinion as to whether the Consolidated Financial Statements included in this Annual Report on Form 10-K present fairly, in all material respects, EID's financial position, results of operations and cash flows in conformity with GAAP. Their report is presented on the following pages.

Management's Report on Internal Control over Financial Reporting

Management is responsible for establishing and maintaining an adequate system of internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934. EID's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with GAAP. EID's internal control over financial reporting includes those policies and procedures that:

- i. pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of EID;
- ii. provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles and that receipts and expenditures of EID are being made only in accordance with authorization of management and directors of EID; and
- iii. provide reasonable assurance regarding prevention or timely detection of unauthorized acquisitions, use or disposition of EID's assets that could have a material effect on the financial statements.

Internal control over financial reporting has certain inherent limitations which may not prevent or detect misstatements. In addition, changes in conditions and business practices may cause variation in the effectiveness of internal controls.

Management assessed the effectiveness of EID's internal control over financial reporting as of December 31, 2021, based on criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO") in *Internal Control-Integrated Framework (2013)*. Based on its assessment and those criteria, management concluded that EID maintained effective internal control over financial reporting as of December 31, 2021.

PricewaterhouseCoopers LLP, an independent registered public accounting firm, has audited the effectiveness of EID's internal control over financial reporting as of December 31, 2021, as stated in their report, which is presented on the following pages.

Charles V. Magro
Chief Executive Officer and Director

David J. Anderson
Executive Vice President,
Chief Financial Officer and Director

February 10, 2022

Report of Independent Registered Public Accounting Firm

To the Stockholders and Board of Directors of E. I. du Pont de Nemours and Company

Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated balance sheets of E. I. du Pont de Nemours and Company and its subsidiaries (the “Company”) as of December 31, 2021 and 2020, and the related consolidated statements of operations, comprehensive income (loss), equity and cash flows for each of the three years in the period ended December 31, 2021, including the related notes and schedule of valuation and qualifying accounts for each of the three years in the period ended December 31, 2021 appearing under Item 15(a) (collectively referred to as the “consolidated financial statements”). We also have audited the Company's internal control over financial reporting as of December 31, 2021, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2021 and 2020, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2021 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2021, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the COSO.

Basis for Opinions

The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express opinions on the Company's consolidated financial statements and on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Critical Audit Matters

The critical audit matter communicated below is a matter arising from the current period audit of the consolidated financial statements that was communicated or required to be communicated to the audit committee and that (i) relates to accounts or disclosures that are material to the consolidated financial statements and (ii) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

Goodwill (Seed Reporting Unit) Impairment Assessment

As described in Notes 2 and 15 to the Corteva, Inc. consolidated financial statements, the Company's consolidated goodwill balance was \$10.1 billion as of December 31, 2021, and the goodwill associated with the seed reporting unit was \$5.4 billion. Management tests goodwill for impairment at the reporting unit level at least annually, or more frequently when events or changes in circumstances indicate it is more likely than not that the fair value of a reporting unit has declined below its carrying value. Management performs an annual goodwill impairment test in the fourth quarter. If management chooses not to complete a qualitative assessment for a given reporting unit or if the initial assessment indicates that it is more likely than not that the carrying value of a reporting unit exceeds its estimated fair value, additional quantitative testing is required. Management performed quantitative testing on its seed reporting unit and determined that no goodwill impairment existed in 2021. Management determined fair value for the seed reporting unit using a discounted cash flow model. Management's significant assumptions in this analysis included future cash flow projections, the weighted average cost of capital, the terminal growth rate, and the tax rate.

The principal considerations for our determination that performing procedures relating to the seed reporting unit goodwill impairment assessment is a critical audit matter are (i) the significant judgment by management when developing the fair value of the seed reporting unit; (ii) a high degree of auditor judgment, subjectivity, and effort in performing procedures and evaluating management's significant assumptions related to projected revenue, the weighted average cost of capital, and the terminal value; and (iii) the audit effort involved the use of professionals with specialized skill and knowledge.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to management's goodwill impairment assessment, including controls over the valuation of the seed reporting unit. These procedures also included, among others, (i) testing management's process for developing the fair value estimate; (ii) evaluating the appropriateness of the discounted cash flow model; (iii) testing the completeness, accuracy, and relevance of underlying data used in the discounted cash flow model; and (iv) evaluating the reasonableness of significant assumptions used by management related to projected revenue, the weighted average cost of capital, and the terminal value. Evaluating management's assumptions related to projected revenue and the terminal value involved evaluating whether the assumptions used by management were reasonable considering (i) the current and past performance of the reporting unit; (ii) the consistency with external market and industry data; and (iii) whether the assumptions were consistent with evidence obtained in other areas of the audit. Professionals with specialized skill and knowledge were used to assist in the evaluation of the Company's discounted cash flow model and the weighted average cost of capital and terminal value assumptions.

NOTE 1 - BASIS OF PRESENTATION

As a result of the Business Realignment and the Internal Reorganization, Corteva, Inc. owns 100% of the outstanding common stock of EID. EID is a subsidiary of Corteva, Inc. and continues to be a reporting company, subject to the requirements of the Exchange Act. The primary differences between Corteva, Inc. and EID are outlined below:

- **Preferred Stock** - EID has preferred stock outstanding to third parties which is accounted for as a noncontrolling interest at the Corteva, Inc. level. Each share of EID Preferred Stock - \$4.50 Series and EID Preferred Stock - \$3.50 Series issued and outstanding at the effective date of the Corteva Distribution remains issued and outstanding as to EID and was unaffected by the Corteva Distribution.
- **Related Party Loan** - EID engaged in a series of debt redemptions during the second quarter of 2019 that were partially funded through an intercompany loan from Corteva, Inc. This was eliminated in consolidation at the Corteva, Inc. level but remains on EID's financial statements at the standalone level (including the associated interest).
- **Capital Structure** - At December 31, 2021, Corteva, Inc.'s capital structure consists of 726,527,000 issued shares of common stock, par value \$0.01 per share.

The accompanying footnotes relate to EID only, and not to Corteva, Inc., and are presented to show differences between EID and Corteva, Inc.

NOTE 2 - RELATED PARTY TRANSACTIONS

Refer to page F-28 of the Corteva, Inc. Consolidated Financial Statements for discussion of related party transactions with Historical Dow and DowDuPont.

Transactions with Corteva

In the second quarter of 2019, EID entered into a related party revolving loan from Corteva, Inc., with a maturity date in 2024. As of December 31, 2021 and December 31, 2020, the outstanding related party loan balance was \$2,162 million and \$3,459 million respectively (which approximates fair value), with interest rates of 1.67% and 1.62%, respectively, and is reflected as long-term debt - related party on EID's Consolidated Balance Sheet. Additionally, EID has incurred tax deductible interest expense of \$50 million and \$100 million and paid interest of \$51 million and \$105 million for the years ended December 31, 2021 and 2020, respectively, associated with the related party loan to Corteva, Inc.

As of December 31, 2021, EID had payables to Corteva, Inc. of \$27 million and \$117 million included in accrued and other current liabilities and other noncurrent obligations, respectively, and \$92 million included in both accrued and other current liabilities and other noncurrent obligations, respectively, at December 31, 2020, in the Consolidated Balance Sheet, related to Corteva's indemnification liabilities to Dow and DuPont per the Separation Agreements (refer to page F-20 of the Corteva, Inc. Consolidated Financial Statements for further details of the Separation Agreements).

NOTE 3 - INCOME TAXES

1. Includes the effects of local and U.S. taxes related to earnings of non-U.S. subsidiaries, changes in the amount of unrecognized tax benefits associated with these earnings, losses at non-U.S. subsidiaries without local tax benefits due to valuation allowances, and other permanent differences between tax and U.S. GAAP results. Includes a tax benefit of \$(51) million for the year ended December 31, 2020, related to a return to accrual adjustment associated with an elective change in accounting method that alters the 2019 impact of foreign tax provisions.
2. See Notes 4 - Common Control Business Combination, and Note 5 - Divestitures and Other Transactions, of the Corteva, Inc. Consolidated Financial Statements for additional information.
3. Principally reflects the impact of foreign exchange gains and losses on net monetary assets for which no corresponding tax impact is realized. Further information about the company's foreign currency hedging program is included in Note 9 - Supplementary Information, and Note 22 - Financial Instruments, of the Corteva, Inc. Consolidated Financial Statements under the heading Foreign Currency Risk.
4. Reflects tax benefits of \$(182) million primarily driven by the recognition of an elective cantonal component of the recent enactment of the Federal Act on Tax Reform and AHV Financing ("Swiss Tax Reform") for the year ended December 31, 2020. Reflects tax benefits of \$(38) million associated with the enactment of the Federal Act on Tax Reform and AHV Financing ("Swiss Tax Reform"), for the year ended December 31, 2019.

NOTE 4 - SEGMENT INFORMATION

There are no differences in reporting structure or segments between Corteva, Inc. and EID. In addition, there are no differences between Corteva, Inc. and EID segment net sales, segment operating EBITDA or pro forma segment operating EBITDA, segment assets, or significant items by segment; refer to page F-74 of the Corteva, Inc. Consolidated Financial Statements for background information on the segments as well as further details regarding segment metrics. The tables below reconcile income (loss) from continuing operations after income taxes to segment operating EBITDA, as differences exist between Corteva, Inc. and EID.

Reconciliation to Consolidated Financial Statements

Income (loss) from continuing operations after income taxes to segment operating EBITDA (In millions)	For the Year Ended December 31,		
	2021	2020	2019
Income (loss) from continuing operations after income taxes	\$ 1,784	\$ 680	\$ (351)
Provision for (benefit from) income taxes on continuing operations	512	(105)	(71)
Income (loss) from continuing operations before income taxes	2,296	575	(422)
Depreciation and amortization	1,243	1,177	1,000
Interest income	(77)	(56)	(59)
Interest expense	80	145	242
Exchange losses - net ¹	54	174	66
Non-operating (benefits) costs - net	(1,256)	(316)	(129)
Mark-to-market (gains) losses on certain foreign currency contracts not designated as hedges ²	—		
Significant items	236	388	991
Pro forma adjustments			298
Corporate expenses	138	125	119
Segment operating EBITDA³	\$ 2,714	\$ 2,212	\$ 2,106

1. Excludes a \$(33) million foreign exchange loss for the year ended December 31, 2019 associated with the devaluation of the Argentine peso. See Note 9 - Supplementary Information, of the Corteva, Inc. Consolidated Financial Statements for additional information.
2. Effective January 1, 2021, on a prospective basis, the company excludes net unrealized gain or loss from mark-to-market activity for certain foreign currency derivative instruments that do not qualify for hedge accounting. There were no unrealized mark-to-market (gains) losses for the years ended December 31, 2020 and 2019.
3. The year ended December 31, 2019 is presented on a pro forma basis, prepared in accordance with Article 11 of Regulation S-X that was in effect prior to recent amendments.

ITEM 16. FORM 10-K SUMMARY

Not applicable.

SUBSIDIARIES OF THE REGISTRANT

Set forth below are certain subsidiaries of
Corteva, Inc.

CERTIFICATIONS

I, Charles V. Magro, certify that:

1. I have reviewed this report on Form 10-K for the period ended December 31, 2021 of Corteva, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
